Unbending Gender Joan Williams 2001-09-13 In *Unbending Gender*, Joan Williams takes a hard look at the state of feminism in America. Concerned by what she finds--young women who flatly refuse to identify themselves as feminists and working-class and minority women who feel the movement hasn't addressed the issues that dominate their daily lives--she outlines a new vision of feminism that calls for workplaces focused on the needs of families and, in divorce cases, recognition of the value of family work and its impact on women's earning power. Williams shows that workplaces are designed around men's bodies and life patterns in ways that discriminate against women, and that the work/family system that results is terrible for men, worse for women, and worst of all for children. She proposes a set of practical policies and legal initiatives to reorganize the two realms of work in employment and households--so that men and women can lead healthier and more productive personal and work lives. Williams introduces a new 'reconstructive' feminism that places class, race, and gender conflicts among women at center stage. Her solution is an inclusive, family-friendly feminism that supports both mothers and fathers as caregivers and as workers.

Conflicting Stories Elizabeth Ammons 1992-10-01 The early 1890s through the late 1920s saw an explosion in serious long fiction by women in the United States. Considering a wide range of authors--African American, Asian American, white American, and Native American--this book looks at the work of seventeen writers from that period: Frances Ellen Harper, Charlotte Perkins Gilman, Sarah Orne Jewett, Alice Dunbar-Nelson, Kate Chopin,

Pauline Hopkins, Gertrude Stein, Mary Austin, Sui Sin Far, Willa Cather, Humishuma, Jessie Fauset, Edith Wharton, Ellen Glasgow, Anzia Yezierska, Edith Summers Kelley, and Nella Larsen. The discussion focuses on the differences in their work and the similarities that unite them, particularly their determination to experiment with narrative form as they explored and voiced issues of power for women. Analyzing the historical context that both enabled and limited American women writers at the turn of the century, Ammons provides detailed readings of many texts and offers extensive commentary on the interaction between race and gender. This book joins the deepening discussion of modern women writers' creation of themselves as artists and raises fundamental questions about the shape of American literary history as it has been constructed in the academy.

"We Will Be Satisfied With Nothing Less" Hugh Davis 2011-08-15 Historians have focused almost entirely on the attempt by southern African Americans to attain equal rights during Reconstruction. However, the northern states also witnessed a significant period of struggle during these years. Northern blacks vigorously protested laws establishing inequality in education, public accommodations, and political life and challenged the Republican Party to live up to its stated ideals. In *"We Will Be Satisfied With Nothing Less,"* Hugh Davis concentrates on the two issues that African Americans in the North considered most essential: black male suffrage rights and equal access to the public schools. Davis connects the local and the national; he joins the specifics of campaigns in places such as Cincinnati, Detroit, and San Francisco with the work of the National Equal Rights League and its successor, the National Executive Committee of Colored Persons. The narrative moves forward from their launching of the equal rights movement in 1864 to the "end" of Reconstruction in the North two decades later. The struggle to gain male suffrage rights was the centerpiece of the movement's agenda in the 1860s, while the school issue remained a major objective throughout the period. Following the ratification of the Fifteenth Amendment in 1870, northern blacks devoted considerable attention to assessing their place within the Republican Party and determining how they could most effectively employ the franchise to protect the rights of all citizens.

Looking Good Margaret A. Lowe 2005-09-13 Winner of the Bridgewater State College Class of 1950 Distinguished Faculty Research Award Toward the end of the nineteenth century, as young women began entering college in greater numbers than ever before, physicians and social critics charged that campus life posed grave hazards to the female constitution and women's reproductive health. "A girl could study and learn," Dr. Edward Clarke warned in his widely read 1873 book *Sex in Education*, "but she could not do all this and retain uninjured health, and a future secure from neuralgia, uterine disease, hysteria, and other derangements of the nervous system." For half a century, ideas such as Dr. Clarke's framed the debate over a woman's place in higher education almost exclusively in terms of her body and her health. For historian Margaret A. Lowe, this obsession offers one of the clearest expressions of the social and cultural meanings given to the female body between 1875 and 1930. At the same time, the "college girl" was a novelty that tested new ideas about feminine beauty, sexuality, and athleticism. In *Looking Good*, Lowe examines the ways in which college women at three quite different institutions—Cornell University, Smith College, and Spelman College—regarded their own bodies in this period. Contrasting white and black students, single-sex and coeducational schools, secular and religious environments, and Northern and Southern attitudes, Lowe draws on student diaries, letters, and publications; institutional records; and accounts in the popular press to examine the process by which new, twentieth-century ideals of the female body took hold in America.

Race, Gender, and Political Representation Beth Reingold 2021 "Who gets elected? Who do they represent? What issues do they prioritize? Does diversity in representation make a difference? *Race, Gender, and Political Representation* thinks differently about identity politics in the United States. It is not about women's representation or minority representation; it is about how race and gender interact to affect the election, behavior, and impact of all individuals - raced women and gendered minorities alike. By putting women of color at the center of the analysis and re-evaluating

traditional, one-at-a-time approaches to studying the politics of race or gender, the authors demonstrate what an intersectional approach to identity politics can reveal. With a wealth of original data on the presence, policy leadership, and policy impact of Black women and men, Latinas and Latinos, and white women and men in state legislative office in the late 20th and early 21st centuries, each chapter shows how the politics of race, gender, and representation are far more complex than recurring "Year of the Woman" frameworks suggest. An array of race-gender similarities and differences are evident in the experiences, activities, and accomplishments of these state legislators. Yet one thing is clear: the representation of those marginalized by multiple, intersecting systems of power and inequality is intricately bound to the representation of women of color"--

Teaching the American Civil Rights Movement Julie Buckner Armstrong 2002 The past fifteen years have seen renewed interest in the civil rights movement. Television documentaries, films and books have brought the struggles into our homes and classrooms once again. New evidence in older criminal cases demands that the judicial system reconsider the accuracy of investigations and legal decisions. Racial profiling, affirmative action, voting districting, and school voucher programs keep civil rights on the front burner in the political arena. In light of this, there are very few resources for teaching the civil rights at the university level. This timely and invaluable book fills this gap. This book offers perspectives on presenting the movement in different classroom contexts; strategies to make the movement come alive for students; and issues highlighting topics that students will find appealing. Including sample syllabi and detailed descriptions from courses that prove effective, this work will be useful for all instructors, both college and upper level high school, for courses in history, education, race, sociology, literature and political science.

Recasting American Liberty Barbara Young Welke 2001-08-13 Through courtroom dramas from 1865 to 1920 - of men forced to jump from moving cars when trainmen refused to stop, of women emotionally wrecked from the trauma of nearly missing a platform or street, and women barred from first class ladies' cars because of the color of their skin - Barbara Welke offers a dramatic reconsideration of the critical role railroads, and streetcars, played in transforming the conditions of individual liberty at the dawn of the twentieth century. The three-part narrative, focusing on the law of accidental injury, nervous shock, and racial segregation in public transit, captures Americans' journey from a cultural and legal ethos celebrating manly independence and autonomy to one that recognized and sought to protect the individual against the dangers of modern life. Gender and race become central to the transformation charted here, as much as the forces of corporate power, modern technology and urban space.

Breaking the Gender Code Georgina Hickey 2023-12-12 A history of the activism that made public spaces in American cities more accessible to women. From the closing years of the nineteenth century, women received subtle—and not so subtle—messages that they shouldn't be in public. Or, if they were, that they were not safe. Breaking the Gender Code tells the story of both this danger narrative and the resistance to it. Historian Georgina Hickey investigates challenges to the code of urban gender segregation in the twentieth century, focusing on organized advocacy to make the public spaces of American cities accessible to women. She traces waves of activism from the Progressive Era, with its calls for public restrooms, safe and accessible transportation, and public accommodations, through and beyond second-wave feminism, and its focus on the creation of alternative, women-only spaces and extensive anti-violence efforts. In doing so, Hickey explores how gender segregation intertwined with other

systems of social control, as well as how class, race, and sexuality shaped activists' agendas and women's experiences of urban space. Drawing connections between the vulnerability of women in public spaces, real and presumed, and contemporary debates surrounding rape culture, bathroom bills, and domestic violence, Hickey unveils both the strikingly successful and the incomplete initiatives of activists who worked to open up public space to women.

Language, Discourse and Power in African American Culture Marcyliena Morgan 2002-07-04 African American language is central to the teaching of linguistics and language in the United States, and this book, in the series Studies in the Social and Cultural Foundations of Language, is aimed specifically at upper level undergraduates and graduates. It covers the entire field - grammar, speech, and verbal genres, and it also discusses the various historical strands that need to be identified in order to understand the development of African American English. The first section deals with the social and cultural history of the American South, the second with urban and northern black popular culture, and the third with policy issues. Morgan examines the language within the context of the changing and complex African American and general American speech communities, and their culture, politics, art and institutions. She also covers the current heated political and educational debates about the status of the African American dialect.

Sisters in the Struggle Bettye Collier-Thomas 2001-08 Tells the stories and documents the contributions of African American women involved in the struggle for racial and gender equality through the civil rights and black power movements in the United States.

Healing Identities Cynthia Burack 2018-08-06 Group identifications famously pose the problem of destructive rhetoric and action against others. Cynthia Burack brings together the theory work of women of color and the tools of psychoanalysis to examine the effects of group collaborations for social justice and progressive politics. This juxtaposition illuminates some assumptions about race and equality encoded in psychoanalysis. Burack's discursive analysis suggests the positive, identity-affirming aspects of group relational life for African American women. One analytic response to groups emphasizes the dangers of these identifications and exhorts people to abandon or transcend them for their own good and for the good of others who may be harmed by group-based forms of cultural or material violence. Another response understands that people feel a need for group identifications and asks how they may be made more resistant to malignant group-based discourse and action. What can black feminist thought teach scholars and democratic citizens about groups? Burack shows how the rhetoric of black feminism models reparative, rather than destructive, forms of group dialogue and action. Although it may be impossible to eliminate group identifications that provide much of the impetus for bias and violence, she argues, we can encourage more progressive forms of leadership, solidarity, and coalition politics.

Down by the Riverside Larry Murphy 2000-11 Explains the history and development of African American religion and theology from the time of slavery until the 21st century.

African-American Odyssey Albert S. Broussard 1998 T. McCants Stewart was a prominent African-American in his day, a lawyer during the Reconstruction who later became a minister, politician, and racial activist and was regarded by his peers as one of the most significant black leaders of his generation. This book illuminates the professional career and private lives of Stewart and his descendants over three generations, providing an epic account of an African-American family in America. Albert Broussard researched Stewart family papers and interviewed nearly every surviving family member to tell their unusual story. He not only presents the first major study of T. McCants Stewart's civil rights and political career; he also

tells how Stewart's descendants rejected white society's negative image of blacks and worked to improve themselves and uplift their race: Stewart's son Gilchrist became a successful civil rights leader and attorney and his daughter Carlotta an educator, while granddaughter Katherine directed a Head Start program and her husband Robert Flippin was the first black parole officer at San Quentin prison. The saga of the Stewarts begins in antebellum Charleston but moves on to New York, Africa, Hawaii, and numerous other locales to relate how this family fulfilled a mission to provide leadership and service to its community. Exploring issues of class, intergenerational relations, and community activism, it provides a wealth of material on the black community that spans two centuries. A particular value of Broussard's work is his account of how Stewart women coped with an overbearing patriarch and forged meaningful careers in an era when black females usually held menial jobs. By sharing experiences of both genders, he offers insights into the different strategies that black men and women used to meet their personal goals and collective obligations. Intelligent, ambitious, and entrepreneurial, the Stewarts have much to tell us about what it was to be African-American over the last hundred years. By linking their history to the changing status of African-Americans at home and abroad, this book weaves the contributions of an extraordinary family into the larger drama of American race relations.

Christianity on Trial Mark L. Chapman 2006-02-02 Since slavery times African-American religious thinkers have struggled to answer this question: Is Christianity a source of liberation or a source of oppression? In a study that reviews representative thinkers over the last fifty years, Mark Chapman reviews the variety of ways that African-Americans have addressed this problem and how it has informed their work and lives. Beginning with Benjamin Mays, the leading Negro theologian of the post-World War II period, Chapman explores the critical implications of this question right

up to the present day. The pivotal turning point in this period is the emergence of the Black Power movement in the 1960s. Sparked in part by the challenge of the Black Muslims, for whom Christianity was simply the white man's religion, inherently racist and oppressive, the era of Black Power saw the rise of militant Black theologies as well. After analyzing the work of the Muslim Elijah Muhammad, Chapman turns to the pioneering work of Black theologians Albert Cleage and James H. Cone. Chapman demonstrates the differences but also uncovers surprising lines of continuity between the older Negro theologians and the later Black theologians, particularly in their efforts to uncover the truly liberative potential of Christianity. 'Christianity on Trial' concludes by exploring the recent emergence of womanist theology. As articulated by Delores S. Williams and other African-American women, womanist theology challenges not only the patriarchal aspects of historical Christianity, but the same limitations in previous Black theologies.

Inner Lives Paula Johnson 2004-03-01 The rate of women entering prison has increased nearly 400 percent since 1980, with African American women constituting the largest percentage of this population. However, despite their extremely disproportional representation in correctional institutions, little attention has been paid to their experiences within the criminal justice system. *Inner Lives* provides readers the rare opportunity to intimately connect with African American women prisoners. By presenting the women's stories in their own voices, Paula C. Johnson captures the reality of those who are in the system, and those who are working to help them. Johnson offers a nuanced and compelling portrait of this fastest-growing prison population by blending legal history, ethnography, sociology, and criminology. These striking and vivid narratives are accompanied by equally compelling arguments by Johnson on how to reform our nation's laws and social policies, in order to eradicate existing inequalities. Her thorough and insightful analysis of the historical and legal background of contemporary criminal law doctrine, sentencing theories, and correctional policies sets the stage for understanding the current system.

When and where I Enter Paula Giddings 1984 This book is a testimonial to the profound influence of African-American women on race and women's movements throughout American history. Drawing on speeches, diaries, letters, and other original documents, the author portrays how black women have transcended racist and sexist attitudes - often confronting white feminists and black male leaders alike - to initiate social and political reform. From the open disregard for the rights of slave women to examples of today's more covert racism and sexism in civil rights and women's organizations, the author illuminates the black woman's crusade for equality. In the process, she paints portraits of black female leaders, such as anti-lynching activist Ida B. Wells, educator and FDR adviser Mary McLeod Bethune, and the heroic civil rights leader Fannie Lou Hamer, among others, who fought both overt and institutionalized oppression.

African American Women in the Struggle for the Vote, 1850-1920 Rosalyn Terborg-Penn 1998-05-22 Rosalyn Terborg-Penn draws from original documents to take a comprehensive look at the African American women who fought for the right to vote. She analyzes the women's own stories, and

Civil Rights and the Making of the Modern American State Megan Ming Francis 2014-04-21 This book extends what we know about the development of civil rights and the role of the NAACP in American politics. Through a sweeping archival analysis of the NAACP's battle against lynching and mob violence from 1909 to 1923, this book examines how the NAACP raised public awareness, won over American presidents, secured the support of Congress, and won a landmark criminal procedure case in front of the Supreme Court.

When We Imagine Grace Simone C. Drake 2016-08-08 Plutarch, the famed Greek biographer, wrote *The Lives of the Roman Emperors* early in his career. Simone Drake could have called her book *The Lives of Black Men*. She contrasts the portrayal of black men in mainstream media with the way she insists black men must imagine their lives, ambitions, and desires in both the civic arena and the domestic arena. The narrow popular representation of black men as being in perennial crisis is one she rejects, opting instead to see them as active agents of their own destinies. Her book uncovers the ways in which black men in history, literature, film, political arenas, and popular culture have either challenged or been challenged by pathological constructions of black masculinity. *Imagining Grace* refers to Toni Morrison's *Beloved*, a black feminist framework Drake uses to see power in vulnerability and emotiveness from Tom Joyner's radio show to Richard Pryor's comedy to some of President Obama's social policy. Drake is synthesizing black feminist and black masculinity studies. Her black lives feature the African American cowboy, Nat Love, also Drake's own grandfather, who imagined grace through military service in the first colored military unit to fight in World War II (what emerges is a narrative of black pride and shame), and thence to movies, where Drake explores the theme of black fathers and daughters (framed by a court case involving *The Cosby Show* as intellectual property). The chapter that follows, on twisted criminalities, contrasts the valorization of black criminals (thugs) as heroes with the denigration of gay black men, where we encounter the limits of grace in *American Gangster*, Cornelius Edy's poetry, and the viral video of Antoine Dodson (discussing the attempted rape of his sister). In concluding with Berry Gordy and hi-hop (Jay-Z), Drake meditates on black entrepreneurship as a nationalist site of redemption. We are given in this book a way of seeing and knowing black maleness sophisticated in concept but bracingly vivid in the telling. "

Chicana Power! Maylei Blackwell 2016-06-27 The first book-length study of women's involvement in the Chicano Movement of the late 1960s and 1970s, *Chicana Power!* tells the powerful story of the emergence of Chicana feminism within student and community-based organizations throughout southern California and the Southwest. As Chicanos engaged in widespread protest in their struggle for social justice, civil rights, and self-determination, women in *el movimiento* became increasingly militant about the gap between the rhetoric of equality and the organizational culture that suppressed women's leadership and subjected women to chauvinism, discrimination, and sexual harassment. Based on rich oral histories and extensive archival research, Maylei Blackwell analyzes the struggles over gender and sexuality within the Chicano Movement and illustrates how those struggles produced new forms of racial consciousness, gender awareness, and political identities. *Chicana Power!* provides a critical genealogy of pioneering Chicana activist and theorist Anna Nieto-Gomez and the Hijas de Cuauhtémoc, one of the first Latina feminist organizations, who together with other Chicana activists forged an autonomous space for women's political participation and challenged the gendered confines of Chicano nationalism in the movement and in the formation of the field of Chicana studies. She uncovers the multifaceted vision of liberation that continues to reverberate today as contemporary activists, artists, and intellectuals, both grassroots and academic, struggle for, revise, and rework the political legacy of Chicana feminism.

When and Where I Enter Paula J. Giddings 2009-10-06 "History at its best—clear, intelligent, moving. Paula Giddings has written a book as priceless

as its subject”—Toni Morrison Acclaimed by writers Toni Morrison and Maya Angelou, Paula Giddings’s *When and Where I Enter* is not only an eloquent testament to the unsung contributions of individual women to our nation, but to the collective activism which elevated the race and women’s movements that define our times. From Ida B. Wells to the first black Presidential candidate, Shirley Chisholm; from the anti-lynching movement to the struggle for suffrage and equal protection under the law; Giddings tells the stories of black women who transcended the dual discrimination of race and gender—and whose legacy inspires our own generation. Forty years after the passing of the Voting Rights Act, when phrases like “affirmative action” and “wrongful imprisonment” are rallying cries, Giddings words resonate now more than ever.

Words of Fire Beverly Guy-Sheftall 2011-07-26 "In this pathbreaking collection of articles, Dr. Beverly Guy-Sheftall has taken us from the early 1830s to contemporary times. Only since the seventies have black women used the term "feminism." And yet, it is that concept that she uses to bring into the same frame the ideas and analyses of Maria Stewart, Sojourner Truth, and Frances W.E. Harper of the early nineteenth century, and the work of women such as the late Audre Lorde, Barbara Smith, and bell hooks who stand on the threshold of the twenty-first century... She has refused to cut off contemporary African American women from the long line of sisters who have righteously struggled for the liberation of African American women from the dual oppressions of racism and sexism." —From the epilogue by Johnnetta B. Cole, President, Spelman College "The indefatigable Beverly Guy-Sheftall has put together a breathtaking sweep of African American feminist thought in one indispensable volume." —Elizabeth Spelman, Professor of Philosophy, Smith College
