*New Approaches to the Study of Religion: Regional, critical, and historical approaches* Peter Antes 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies. The work follows in the footsteps of two former publications: *Classical Approaches to the Study of Religion*, edited by Jacques Waardenburg (1973), and *Contemporary Approaches to the Study of Religion*, edited by Frank Whaling (1984/85). *New Approaches to the Study of Religion* completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades. Many of the chapters, however, are also pathbreaking and point the way to future approaches.

*The Oxford Handbook of New Religious Movements* James R Lewis 2008-07-17 The Oxford Handbook of New Religious Movements both covers the current state of the field and breaks new ground. Its contributors, drawn from both sociology and religious studies, are leading figures in the study of NRMs.

**Belief Beyond Boundaries** Joanne Pearson 2023-05-09 *Belief Beyond Boundaries* explores 'religions' or forms of spirituality that tend to be marginal to the mainstream of British and North American religious expression. The book examines how alternative spiritualities traditionally classed as 'New Age' or new religious movements have grown exponentially in recent years. It progresses to detailed examination of Paganism, Celtic spirituality, Wicca, witchcraft, North American indigenous religion and New Age, considering the impact of the rise of science on religion and the emergence of new categories of spirituality. The authors explore why these forms of spirituality are so popular in the contemporary UK and USA, and how they impact on mainstream traditions. The five textbooks and Reader that make up the Religion Today Open University/Ashgate series are: o From Sacred Text to Internet o Religion and Social Transformations o Perspectives on Civil Religion o Global Religious Movements in Regional Context o **Belief Beyond Boundaries** o Religion Today: A Reader

**Archaeology of Religion** Sharon R. Steadman 2016-07 Steadman fills an empty niche in the offerings on how archaeology interprets past religions with this useful textbook. The book includes case studies from around the world, from the study of Upper Paleolithic religions and of shamans in foraging societies to formal religious structures in advanced complex societies of Mesopotamia, Egypt, India and the Andes. Steadman also includes key contemporary religions—Christianity, Islam, and Buddhism, among others—to provide an historical and comparative context. This is an ideal text for a archaeology of religion courses and classes that include a significant component on “past religions,” as well as an excellent guide for general readers.

*Teaching New Religious Movements* David G. Bromley 2007-05-25 Since its inception around 1970, the study of New Religious Movements (NRMs) has evolved into an established multidisciplinary field. At the same time, both the movements and the scholars who study them have been the subjects of intense controversy. In this volume, a group of senior NRM scholars who have been instrumental in the development of the field will offer pivotal essays that present the basics of NRM scholarship along with guidance for teachers on classroom use. The book is organized topically around subjects that are both central to the study of NRMs and likely to be useful to non-specialists. Part I contains examinations of the definitional boundaries of the area of study, varying disciplinary perspectives on NRMs, unique methodological/ethical problems encountered in the study of NRMs, and the controversies that have confronted scholars studying NRMs and the movements themselves. Part II examines a series of topics central to teaching about NRMs: the larger sociocultural significance of the movements, their distinctive symbolic and organizational features, the interrelated processes of joining and leaving NRMs, the organization of gender roles in NRMs, media and popular culture portrayals of the movements, the occurrence of corruption and abuse within movements, and violence by and against NRMs. Part III provides informational resources for teaching about NRMs, which are particularly important in a field where knowing the biases of sources is crucial. With its interdisciplinary approach, the volume provides comprehensive, accessible information and perspectives on NRMs. It is an invaluable guide for instructors navigating this scholarly minefield.

**Lived Religion** Meredith B McGuire 2008-08-22 How can we grasp the complex religious lives of individuals such as Peter, an ordained Protestant minister who has little attachment to any church but centers his highly committed religious practice on peace-and-justice activism? Or Hannah, a devout Jew whose rich spiritual life revolves around her women's spirituality group and the daily practice of meditative dance? Or Laura, who identifies as Catholic but rarely attends Mass, and engages daily in Buddhist-style meditation at her home altar arranged with symbols of Mexican American popular religion? Diverse religious practices such as these have long baffled scholars, whose research often starts with the assumption that individuals commit, or refuse to commit, to an entire institutionally framed package of beliefs and practices. Meredith McGuire points the way forward toward a new way of understanding religion. She argues that scholars must study religion not as it is defined by religious organizations, but as it is actually lived in people's everyday lives. Drawing on her own extensive fieldwork, as well as recent work by others, McGuire explores the many, seemingly mundane, ways that individuals practice their religions and develop their spiritual lives. By examining the many eclectic and creative practices -- of body, mind, emotion, and spirit -- that have been invisible to researchers, she offers a fuller and more nuanced understanding of contemporary religion.

**The Hare Krishna Movement** Edwin Bryant 2004-06-23 Dancing and chanting with their shaven heads and saffron robes, Hare Krishnas presented the most visible face of any of the eastern religions transplanted to the West during the sixties and seventies. Yet few people know much about them. This comprehensive study includes more than twenty contributions from members, ex-members, and academics who have followed the Hare Krishna movement for years. Since the death of its founder, the movement, also known as the International Society for Krishna Consciousness (ISKCON), has experienced debates over the roles of authority, heresy, and dissent, which have led to the development of several splinter movements. There is a growing women's rights movement and a highly publicized child abuse scandal. Providing a privileged look at the people and issues shaping ISKCON, this volume also offers insight into the complex factors surrounding the emergence of religious traditions, including early Christianity, as well as a glimpse of the original seeds and the germinating stages of a religious tradition putting down roots in foreign soil.

**Society in Focus** William E. Thompson 2018-11-13 *Society in Focus: An Introduction to Sociology*, Ninth Edition, is intended for the introduction to sociology course taught at the freshman/sophomore level.

*Religious Innovation in a Global Age* George N. Lundskow 2017-02-10 Certain timeless questions rise and fall through changing social conditions, scientific advances, and cultural variation—who am I? How should I live? What happens when I die? In modern society, traditions no longer integrate the individual into a larger spiritual community, and so movements have risen to address the crisis of meaning in a rapidly changing world. This collection of essays, while considering variables of work, class, race, and gender, theoretically and empirically examines how diverse groups are trying to restore a sense of meaning through religious innovation. The first group of essays considers new developments in theory, framing critical

inquiry into recent developments in religion and the larger quest for meaning. The second section examines grass roots emancipation movements, which seek an expanded role for the individual in both belief and practice. Topics addressed include the dialectic between religious and secular values and norms, anti-Semitism, new evangelism, Neopaganism on the internet, Max Horkheimer's critical theory of religion, Christian speed/thrash metal music, Islamic fundamentalism, modernity and the role of women, French tourist destination Rocamadour's competition between the Catholic shrine and secular attractions, developments within the Polish Roman Catholic Church, the Finnish Satanism scare of 1999, and Islam and politics in Turkey. A bibliography completes each essay. Instructors considering this book for use in a course may request an examination copy here.

**Yearning to Belong** John Paul Healy 2016-02-11 Cutting across three areas of interest within New Religious Movements - insider perspectives, sociology of religion and the helping professions - this book explores insiders' experience of the Indian Guru-disciple Yogic tradition and is authored by a former member of that tradition. Highlighting the rich spiritual experience of devotees of Guru-disciple Yoga, and broadening the understanding of Guru-disciple Yoga Practice, this book also adds considerably to knowledge of conversion to New Religious Movements and to issues of affiliation and disengagement. Exploring participants' experience of attraction, affiliation and disengagement, these themes highlight individuals' personal experience of Guru-disciple Yoga Practice.

Contemporary Perspectives on Ecofeminism Mary Phillips 2015-11-19 Why is ecofeminism still needed to address the environmental emergencies and challenges of our times? Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment. This book provides a much-needed comprehensive overview of the relevance and value of using eco-feminist theories. It gives a broad coverage of traditional and emerging eco-feminist theories and explores, across a range of chapters, their various contributions and uniquely spans various strands of ecofeminist thinking. The origins of influential eco-feminist theories are discussed including key themes and some of its leading figures (contributors include Erika Cudworth, Greta Gaard, Trish Glazebrook and Niamh Moore), and outlines its influence on how scholars might come to a more generative understanding of the natural environment. The book examines eco-feminism's potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world. This timely volume makes a distinctive scholarly contribution and is a valuable resources for students and academics in the fields of environmentalism, political ecology, sustainability and nature resource management.

**Religion in the Contemporary World** Alan Aldridge 2013-04-12 In the new edition of this widely praised text, Alan Aldridge examines the complex realities of religious belief, practice and institutions. Religion is a powerful and controversial force in the contemporary world, even in supposedly secular societies. Almost all societies seek to cultivate religions and faith communities as sources of social stability and engines of social progress. They also try to combat real and imagined abuses and excess, regulating cults that brainwash vulnerable people, containing fundamentalism that threatens democracy and the progress of science, and identifying terrorists who threaten atrocities in the name of religion. The third edition has been carefully revised to make sure it is fully up to date with recent developments and debates. Major themes in the revised edition include the recently erupted 'culture war' between progressive secularists and conservative believers, the diverse manifestations of 'fundamentalism' and their impact on the wider society, new individual forms of religious expression in opposition to traditional structures of authority, and the backlash against 'multiculturalism' with its controversial implications for the social integration of ethnic and religious minority communities. Impressive in its scholarly analysis of a vibrant and challenging aspect of human societies, the third edition will appeal strongly to students taking courses in the sociology of religion and religious studies, as well as to everyone interested in the place of religion in the contemporary world.

**Transnational Agency and Migration** Stefan Köngeter 2015-07-16 Migrants, both spatially and mentally, no longer settle in only one national territory but interact or move across borders regularly, profoundly challenging the nation-state and the image of society as a container. This volume explores the ways in which migrants, activists and professionals connect social worlds across national boundaries through a variety of social practices. The contributions from various disciplines - anthropology, economics, political and social sciences, educational studies and social work - illuminate the meaning of agency in situations where the capabilities of transnational actors are constrained by nation-states, their borders and social institutions. Based on a relational understanding of transnational agency which builds upon new insights and developments within transnational studies and network theory, this compilation of chapters presents transnational processes and developments in and across various regions of the globe - in East Asia, the Americas, the EU, Southeast Asia, Africa and Australia, in the borderlands of Mexico and the US, in the transatlantic space of the 19th-century fin de siècle world - in order to demonstrate the importance of gaining, assisting and expanding agency in transnational contexts.

**Female Leaders in New Religious Movements** Inga Bårdsen Tøllefsen 2017-10-06 In this book, historians of religion and gender studies explore the biographies of a number of female leaders, and the factors within their groups and cultural contexts that support these women's religious leadership. New Religious Movements have been supportive of women taking roles of leadership for a long time. Authors of this book examine issues of gender and female leadership from diverse theoretical and methodological standpoints. The book covers a broad range of groups both with regard to time and place, covering Paganism, Hindu guru groups, Christian organizations, esoteric/ mystical movements, African churches, and a Japanese NRM. The common focal point is the powerful, prophetic, charismatic women who have founded and/ or led New Religious Movements.

On the Margins of Religion Frances Pine 2008-03-30 Focusing on places, objects, bodies, narratives and ritual spaces where religion may be found or inscribed, the authors reveal the role of religion in contesting rights to places, to knowledge and to property, as well as access to resources. Through analyses of specific historical processes in terms of responses to socio-economic and political change, the chapters consider implicitly or explicitly the problematic relation between science (including social sciences and anthropology in particular) and religion, and how this connects to the new religious globalisation of the twenty-first century. Their ethnographies highlight the embodiment of religion and its location in landscapes, built spaces and religious sites which may be contested, physically or ideologically, or encased in memory and often in silence. Taken together, they show the importance of religion as a resource to the believers: a source of solace, spiritual comfort and self-willed submission.

Flows of Faith Lenore Manderson 2012-02-18 Unique local transformations of the practice of established religions in Asia and the Pacific are juxtaposed with the emergence of new religious movements whose incidence is growing across the region. In *Flows of Faith*, the contributing authors take as their starting point questions of how religions manifest outside their cultural boundaries and provide the basis for new social identities, political movements and social transformations. With fresh insights into the globalization of beliefs, their local inflections, and their institutionalization, the authors explore how old and new religions work in different settings, and how their reception and membership challenge

orthodox understandings of religion and culture. The chapters – set in Asia, the Pacific, Australia, and the US – illustrate the contrasts and commonalities of these belief systems, and their allegiances and networks in the region and beyond. They include new religious movements – Falun Gong, Brahma Kumaris, the Hare Krishna movement, based in East and South Asia with outreach posts in Australia and the U.S. – and established ‘old’ religions – Christianity, Buddhism, Hinduism and Islam – that are revitalized and recreated in different settings and places. *Flows of Faith* describes the transnational reaches of faith. Religious practices and their local manifestations track the movement of peoples, through mission outreach, flight, migration, and pilgrimage. In each new setting, religions are shaped by and in turn shape political and cultural forces, proving that they are resilient and generative, originary and distinctive. The volume is a major contribution, providing readers with a fresh and creative approach into the living experience of religious communities in a contemporary globalised world.

**The Maternal Image of God in Victorian Literature** Rebecca Styler 2023-07-10 This book is the study of a religious metaphor: the idea of God as a mother, in British and US literature 1850–1915. It uncovers a tradition of writers for whom divine motherhood embodied ideals felt to be missing from the orthodox masculine deity. Elizabeth Gaskell, Josephine Butler, George Macdonald, Frances Hodgson Burnett and Charlotte Perkins Gilman independently reworked their inherited faith to create a new symbol that better met their religious needs, based on ideal Victorian notions of motherhood and ‘Mother Nature’. Divine motherhood signified compassion, universal salvation and a realised gospel of social reform led primarily by women to establish sympathetic community. Connected to Victorian feminism, it gave authority to women's voices and to ‘feminine’ cultural values in the public sphere. It represented divine immanence within the world, often providing the grounds for an ecological ethic, including human-animal fellowship. With reference also to writers including Charlotte Brontë, Anna Jameson, Charles Kingsley, Elizabeth Charles, Theodore Parker, Harriet Beecher Stowe, Mary Baker Eddy and authors of literary utopias, this book shows the extent of maternal theology in Victorian thought and explores its cultural roots. The book reveals a new way in which Victorian writers creatively negotiated between religious tradition and modernity.

*Gender and Power in Contemporary Spirituality* Anna Fedele 2013-03-05 This book explores the entanglements of gender and power in spiritual practices and analyzes strategies used by spiritual practitioners to attain what to social scientists might seem an impossible goal: creating spiritual communities without creating gendered hierarchies. What strategies do people within these networks use to attain gender equality and gendered empowerment? How do they try to protect and develop individual freedom? How do gender and power nevertheless play a role? The chapters in this book together and separately demonstrate that, in order to understand contemporary spirituality, the analytical lenses of gender and power are essential. Furthermore, they show that it is not possible to make a clear distinction between established religions and contemporary spirituality: the two sometimes overlap, and at other times spirituality distances itself from religion while reproducing some of its underlying interpretative frameworks. This book does not take the discourses of spiritual practitioners for granted, yet recognizes the reflexivity of spiritual practitioners and the reciprocal relationship between spirituality and disciplines such as anthropology. The ethnographic descriptions of lived spirituality included in this volume span a wide range of countries, from Portugal, Italy, and the Netherlands to Mexico and Israel.

**Building Cultural Nationalism in Malaysia** Timothy P. Daniels 2005 This text contains an examination of processes of cultural citizenship in peninsular Malaysia. In particular, it focuses upon the diverse residents of the southwestern state of Melaka and their negotiations of belonging and incorporation in Malaysian society. Following political independence and the formation of the Federation of Malaysia in 1957 Malaysian citizenship was extended to most members of these diverse social identities. In this post-colonial context, Timothy P. Daniels examines how public celebrations and representations, religious festivals, and patterns of social relations are connected to processes of inclusion and exclusion.

*Japanese New Religions in Global Perspective* Peter B Clarke 2013-11-05 Since the 1960s virtually every part of the world has seen the arrival and establishment of Japanese new religious movements, a process that has followed quickly on the heels of the most active period of Japanese economic expansion overseas. This book examines the nature and extent of this religious expansion outside Japan.

**New Religious Movements: A Guide for the Perplexed** Paul Oliver 2012-02-02 Discusses the philosophical, sociological, and psychological themes in new religious movements, and includes a survey and explanation of a few groups.

**Religion, Spirituality and the Social Sciences** Spalek, Basia 2008-09-03 "This edited collection addresses important theoretical and methodological issues to explore ways of engaging with religion and spirituality when carrying out social science research. Divided into three sections, the book examines the notion of secularism in relation to contemporary Western society, including a focus upon secularisation; explores how the values underpinning social scientific enquiry might serve to marginalise religion and spirituality; and reflects on social science research methodologies when researching religion and spirituality."--BOOK JACKET.

**Cosmologies of Suffering** Agita Lüse 2009-01-14 The edited volume elaborates on a range of themes that emerged during a workshop of the 8th biennial of the European Association of Social Anthropologists in Vienna in 2004. Among these themes are: the paradoxical permanence of ‘transition’ in post-communist countries, the accompanying persistence of social suffering and the structural conditions that give rise to it. A final theme focuses on the resources that people mobilize to cope with suffering and trauma. Ways of coping manifest a stance towards agency shared by sufferers from diverse post-communist regions, such as ethnically divided Croatia, politically and economically unstable Zimbabwe, relatively more peaceful countries such as Hungary, Poland and Slovenia, and, finally, two religiously unique areas in Siberia, Russia. Ethnographic accounts from these diverse settings testify that agency has often involved relinquishing reliance on one's self and turning towards a power higher than the self, whether this is conceptualized through the lens of transcendence, religion, or cosmology.

**Feminist Narratives and the Sociology of Religion** Nancy Nason-Clark 2001 In 14 essays, US and Canadian sociologists of religion cultivate the growing gender and feminist consciousness in their profession, and challenge established scholars and graduate students to be cognizant of it. They combine biography and scholarly pursuits, academic rigor and personal passion. There is no index. c. Book News Inc.

**Facing the Wild** Chilla Bulbeck 2012-06-25 What do wild animals mean to humans? Will they survive both rampant habitat loss and extinction caused by human encroachment and, as ecotourists, our enthusiasm for them? With ecotourism now the fastest growing segment of tourism, and encounters with wild animals – be it swimming with dolphins, going on safari or bird watching – ever more popular, these are critical questions. Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry, conservation efforts and society at large. *Facing the Wild* is the first serious empirical examination of why people seek out animals in their natural environment, what the desire for this experience tells us about the meanings of animals, nature, authenticity and wilderness in contemporary industrialized societies, and whether visitors change their environmental perspectives and behaviour, as the custodians of wildlife parks would like them to. The book explores the contradictions and ambivalence that so many people experience in the presence of ‘wild nature’ – in loving it we may diminish it and in the act of wanting to see it we may destroy it. Ultimately the book makes a case for ‘respectful stewardship’ of a ‘hybrid nature’ and provides

insight for both practitioners and ecotourists alike.

**Women in New Religions** Elizabeth Puttick 1997 It is often believed that women are oppressed and exploited by the charismatic male leaders of new religious movements. This book exposes the abuse of power within some movements, but also demonstrates that there is more evidence of fulfillment and empowerment. This book explores the social and spiritual issues tracing developments from the 1960s counter-culture to 1990s Goddess spirituality and culminates in a new typology of religious needs and values.

**Women in New Religions** Laura Vance 2015-03-13 An in-depth history of selected New Religions that highlights the roles of women in their founding and continual practice Women in New Religions offers an engaging look at women's evolving place in the birth and development of new religious movements. It focuses on four disparate new religions—Mormonism, Seventh-day Adventism, The Family International, and Wicca—to illuminate their implications for gender socialization, religious leadership and participation, sexuality, and family ideals. Religious worldviews and gender roles interact with one another in complicated ways. This is especially true within new religions, which frequently set roles for women in ways that help the movements to define their boundaries in relation to the wider society. As new religious movements emerge, they often position themselves in opposition to dominant society and concomitantly assert alternative roles for women. But these religions are not monolithic: rather than defining gender in rigid and repressive terms, new religions sometimes offer possibilities to women that are not otherwise available. Vance traces expectations for women as the religions emerge, and transformation of possibilities and responsibilities for women as they mature. Weaving theory with examination of each movement's origins, history, and beliefs and practices, this text contextualizes and situates ideals for women in new religions. The book offers an accessible analysis of the complex factors that influence gender ideology and its evolution in new religious movements, including the movements' origins, charismatic leadership and routinization, theology and doctrine, and socio-historical contexts. It shows how religions shape definitions of women's place in a way that is informed by response to social context, group boundaries, and identity.

**Handbook of the Theosophical Current** Olav Hammer 2013-01-09 This title represents pioneering research into an important but under-researched current. The three sections in the book are devoted to the Theosophical Society, Theosophically influenced religious currents, and the interaction between Theosophy and surrounding culture.

**The Graceful Guru** Karen Pechilis 2004 A distinctive aspect of Hindu devotion is the veneration of a human guru, who is not only an exemplar and a teacher but is also understood to be an embodiment of the divine. Historically, the role of guru in the public domain has been exclusive to men. The new visibility of female gurus in India and the U.S. today, and indeed across the globe, has inspired this first-ever scholarly study of the origins, variety, and worldwide popularity of Hindu female gurus. In the Introduction, Karen Pechilis examines the historical emergence of Hindu female gurus with reference to the Hindu philosophy of the self, women spiritual exemplars as wives and saints, Tantric worship of the Goddess, and the internationalization of gurus in the U.S. in the twentieth century. Nine essays profile specific female gurus, presenting biographies of these remarkable women while highlighting overarching issues and themes concerning women's status as religious leaders; these themes are nuanced in the afterword to the volume. The essays explore how Hindu female gurus embody grace in both senses--as a feminine ideal and an attribute of the divine--and argue that their status as leaders is grounded in their negotiation of these two types of grace. This book provides biographical profiles of the following female gurus plus sensitive scholarly analysis of their spiritual paths: Ammachi, Anandamayi Ma, Gauri Ma, Gurumayi, Jayashri Ma, Karunamayi Ma, Ma Jaya Sati Bhagavati, Mother Meera, Shree Maa and Sita Devi.
