**The Fatal Strain** - Alan Sipress 2009-11-12

In 2009, Swine Flu reminded us that pandemics still happen, and award-winning journalist Alan Sipress reminds us that far worse could be brewing. When a highly lethal strain of avian flu broke out in Asia in 2003 and raced westward, Sipress, as a reporter for The Washington Post, tracked the virus across nine countries, watching its secrets elude the world's brightest scientists and most intrepid disease hunters. A vivid portrayal of the struggle between man and microbe, *The Fatal Strain* is a fast-moving account that weaves cultural, political, and scientific strands into a tale of inevitable pandemic.

**Queer Nostalgia in Cinema and Pop Culture** - Gilad Padva 2014-01-29

*In Defense of Processed Food* - Robert L. Shewfelt 2016-11-23

It has become popular to blame the American obesity epidemic and many other health-related problems on processed food. Many of these criticisms are valid for some processed-food items, but many statements are overgeneralizations that unfairly target a wide range of products that contribute to our health and well-being. In addition, many of the proposed dangers allegedly posed by eating processed food are exaggerations based on highly selective views of experimental studies. We crave simple answers to our questions about food, but the science behind the proclamations of food pundits is not nearly as clear as they would have you believe. This book presents a more nuanced view of the benefits and limitations of food processing and exposes some of the tricks both Big Food and its critics use to manipulate us to adopt their point of view. Food is a source of enjoyment, a part of our cultural heritage, a vital ingredient in maintaining health, and an expression of personal choice. We need to make those choices based on credible information and not be beguiled by the sophisticated marketing tools of Big Food nor the ideological appeals and gut feelings of self-appointed food gurus who have little or no background in nutrition.

**Freud in Cambridge** - John Forrester 2017-03-09

The authors explore the influence of Freud's thinking on twentieth-century intellectual and scientific life within Cambridge and beyond.

*Big Farms Make Big Flu* - Rob Wallace 2016-06-30

The first collection to explore infectious disease, agriculture, economics, and the nature of science together. Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them *Campylobacter*, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. “That is,” writes evolutionary biologist Rob Wallace, “it pays to produce a pathogen that could kill a billion people.” In *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought-provoking, Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise

and radical wit, the latest in the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

**Masud Khan** - Roger Willoughby 2005

Masud Khan was one of the most prolific, charismatic, and controversial psychoanalysts of the twentieth century. In this new biography, Willoughby (psychology, U. of Essex, U.K.) draws upon official documents, public accounts, private correspondence, and interviews with Khan's relatives, friends, and colleagues. Charting the "Prince Doctor's" personal and intellectual history, the author examines his childhood in India, his psychoanalytic training in post-war London, his rise to international prominence, and his last years of scandal, depression, and terminal illness. The biographical discussion is illuminated by Willoughby's analysis of Khan's prolific psychoanalytic output. Supplementary materials comprise a list of International Psychoanalytical Library volumes under Khan's directorship, the text of Khan's self-composed fictional obituary, and a bibliography of work by or relating to Khan, both in print and unpublished. The book includes b&w photos of Khan and his contemporaries. Distributed in the US by ISBS. Annotation ©2004 Book News, Inc., Portland, OR (booknews.com).

**Lesbian Images in International Popular Culture** - Sara E. Cooper 2013-09-13

Lesbian images are everywhere these days—cable television, film, popular magazines, advertising, Internet and the news—creating desire in men and women alike, selling commercial products and services, and stirring up controversy on many levels. But do these images truly represent the diverse identities of women-centered women worldwide? This book addresses the limited access to images of diverse and international lesbian identities and experiences, in order to provide the reader with a more complete understanding of what it means to be lesbian in a global context. It investigates how lesbians portray themselves as well as how they are portrayed by others in several areas of popular culture, including television, film, the arts, Internet, advertising and the news. It features articles on U.S. lesbian cartoonists, Canadian viewer perceptions of lesbians on the cable show *Queer as Folk*, panoramic looks at lesbians' representation in Australian and Spanish television

programming, and in-depth explorations of films by Spanish director Pedro Almodóvar, leading Indian film producers, and independent Chinese-American filmmakers. This book was published as a special issue of the Journal of Lesbian Studies.

**The Goodness Paradox** - Richard Wrangham 2019-01-29

"A fascinating new analysis of human violence, filled with fresh ideas and gripping evidence from our primate cousins, historical forebears, and contemporary neighbors." —Steven Pinker, author of *The Better Angels of Our Nature* We Homo sapiens can be the nicest of species and also the nastiest. What occurred during human evolution to account for this paradox? What are the two kinds of aggression that primates are prone to, and why did each evolve separately? How does the intensity of violence among humans compare with the aggressive behavior of other primates? How did humans domesticate themselves? And how were the acquisition of language and the practice of capital punishment determining factors in the rise of culture and civilization? Authoritative, provocative, and engaging, *The Goodness Paradox* offers a startlingly original theory of how, in the last 250 million years, humankind became an increasingly peaceful species in daily interactions even as its capacity for coolly planned and devastating violence remains undiminished. In tracing the evolutionary histories of reactive and proactive aggression, biological anthropologist Richard Wrangham forcefully and persuasively argues for the necessity of social tolerance and the control of savage

divisiveness still haunting us today.

*Theories and Models of Communication* - Paul Copley 2013-01-30

Open publication This unique volume offers an overview of the diversity in research on communication: including perspectives from biology, sociality, economics, norms and human development. It includes general social science and humanities approaches to communication, from systems theory to cultural theory, as well as perspectives more specifically related to communication acts, such as linguistics and cognition. The volume also features chapters on the participants and various elements in communication processes, on possible effects and on wider consequences of mediation [with technical media]. The scope of the contributions is global, and the volume is relevant to both the empirical and the philosophical traditions in human sciences. Designed as a stand-alone collection to engage undergraduates as well as postgraduates and academics, this is also the first book in, and an introduction to, the de Gruyter Mouton multi-volume *Handbooks of Communication Science*.

*Handbook of EMDR and Family Therapy Processes* - Francine Shapiro 2011-01-31

*Minor Histories* - Mike Kelley 2004-02-06

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. "Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO

sightings and abduction scenarios.

*Lessons in Perception* - Paul Taberham 2018-06-19

*Lessons in Perception* seeks to clarify notoriously elusive themes of the avant-garde with the use of existing research from the field of psychology. There is a long-standing history of reference to psychological concepts in relation to avant-garde film, such as its unique relationship to memory, visual perception, narrative comprehension, and synesthesia. Yet direct analysis of these topics in light of existing psychological research remains largely unexplored until now. More broadly, the aim of the book is to frame avant-garde filmmaking practice as a form of "practical psychology." In doing so, two principal arguments are proposed: first, that many avant-garde filmmakers draw creative inspiration from their own cognitive and perceptual capacities, and touch on topics explored by actual psychologists; secondly, that as practical psychologists, avant-garde filmmakers provide "lessons in perception" that offer psychological experiences that are largely unrehearsed in commercial cinema

**Reflections on Character and Leadership** - Manfred F. R. Kets de Vries 2010-04-09

*Reflections on Character and Leadership* is the first of the three books in the Manfred Kets de Vries on the Couch series. Here, Kets de Vries looks at entrepreneurship, the pathology of leadership, and the personality of the leader. The reader will visit the disturbed inner worlds of leaders like Alexander the Great, Shaka Zulu and Robert Maxwell, discover how to distinguish between a cold fish and a live volcano, and identify impostors, despots, organizational fools and global leaders. The book highlights the basic principles of the clinical paradigm—the process of putting organizations and the individuals who lead them on the psychoanalyst's couch. It includes studies of personality archetypes and the effects they have on organizational life and culture—and the effects that organizations have on them. Referring frequently to key management concepts, Kets de Vries looks not only at what happens when things go wrong, but also at how to create the psychological and organizational space to make sure that things go right. About the series: The series offers an overview of Kets de Vries's work spanning four decades, a period in which he has established himself as the leading figure in the clinical study of organizational leadership. The books in this series contain a representative selection of Kets de Vries' writings about leadership from a wide variety of published sources and cover character and leadership in a global context, career development and leadership in organizations. The original essays were all written or published between 1976 and 2008. Updated where appropriate and revised by the author, they present a digest of the work of one of the most influential management thinkers of the present day.

**Fighting Nature** - Peta Tait 2016-08-10

Throughout the 19th century animals were integrated into staged scenarios of confrontation, ranging from lion acts in small cages to large-scale re-enactments of war. Initially presenting a handful of exotic animals, travelling menageries grew to contain multiple species in their thousands. These 19th-century menageries entrenched beliefs about the human right to exploit nature through war-like practices against other

animal species. Animal shows became a stimulus for antisocial behaviour as locals taunted animals, caused fights, and even turned into violent mobs. Human societal problems were difficult to separate from issues of cruelty to animals. Apart from reflecting human capacity for fighting and aggression, and the belief in human dominance over nature, these animal performances also echoed cultural fascination with conflict, war and colonial expansion, as the grand spectacles of imperial power reinforced state authority and enhanced public displays of nationhood and nationalistic evocations of colonial empires. *Fighting Nature* is an insightful analysis of the historical legacy of 19th-century colonialism, war, animal acquisition and transportation. This legacy of entrenched beliefs about the human right to exploit other animal species is yet to be defeated. "Peta Tait brings to the book an impressive scholarly command of the documentary material, from which she draws a range of vivid examples and revealing analyses of human-animal confrontation in popular entertainments ... The book is written with verve and clarity, and will be of interest to a wide readership in performance studies and cultural history." Professor Jane R. Goodall, Western Sydney University Peta Tait FAHA is Professor of Theatre and Drama at La Trobe University and Visiting Professor at the University of Wollongong, and author of *Wild and dangerous performances: animals, emotions, circus* (2012).

*Liz* - C. David Heymann 2011-04-04

Elizabeth Taylor's own story was more dramatic than any part she ever played on the screen. C. David Heymann brings her magnificently to life in this acclaimed biography--updated with a new chapter covering her final years. She was an icon, one of the most watched, photographed, and gossiped-about personalities of our time. Child star, daughter of a controlling stage mother, Oscar-winning actress, seductress and eight-time wife, mother of four children and grandmother of ten, champion of funding for AIDS research, purveyor of perfumes and jewelry, close friend of celebrities and tycoons—Elizabeth Taylor, for almost eight decades, played most completely, beautifully, cunningly, flamboyantly, and scandalously her greatest role of all: herself. The basis of an Emmy Award-nominated miniseries, Liz portrays Taylor's life and career in fascinating, revealing detail and includes an additional new chapter, bringing her beloved fans up to date on her final years. By way of more than a thousand interviews with stars, directors, producers, designers, friends, family, business associates, and employees and through extensive research among previously disclosed court, business, medical, and studio documents, bestselling author Heymann reminds readers of her very public escapades and unveils her most private moments. Here are the highs and lows of her film career and the intimate circumstances of her marriages to Nicky Hilton, Michael Wilding, Mike Todd, Eddie Fisher, Richard Burton, Senator John Warner, and Larry Fortensky. Here, too, is the truth about Taylor's father and her friendships with leading men Montgomery Clift, James Dean, and Rock Hudson, as well as with the eccentric Malcolm Forbes and Michael Jackson. From her illnesses, injuries, weight issues, and battles against drug and alcohol, to her sexual exploits, diamond-studded adventures, and tumultuous love affairs, this is the enormously contradictory and glamorous life of Hollywood's last great star.
