**The Road to Reinvention** - Josh Linkner  
2014-05-27

Companies, communities, and individuals fall for many reasons, but one of the most common—and easily avoidable—is the failure to reinvent. When people and organizations rest on prior successes rather than driving purposeful transformation, they discover too late that they have lost their market position altogether to competitors and external forces. The most successful companies, brands, and individuals make reinvention a regular part of their business strategies. Transformation demands an ongoing process of discovery and imagination, and The Road to Reinvention lays out a systematic approach for

continually challenging and reinventing yourself and your business. Venture capitalist and serial entrepreneur Josh Linkner identifies six elements in any business that are ripe for reinvention and shares examples, methods, and step-by-step techniques for creating deliberate, productive disruption. Throughout *The Road to Reinvention*, Linkner also explores the history—the great rise, unprecedented fall, and now rebirth—of his beloved hometown, Detroit. First rising to greatness as the result of breathtaking innovation, Detroit had generations of booming growth before succumbing to apathy, atrophy, and finally bankruptcy. Now, the city is rising from the ashes and driving sustainable success through an intense focus on reinvention. Linkner brings an insider's view of this incredible story of grit, determination, and creativity, sharing his perspective on Detroit's successes and setbacks as a profound example of large-scale organizational and personal transformation. Change is inevitable. You need

to decide: Will you drive that change, or be driven away by it? Will you disrupt or be disrupted? By choosing to deliberately reimagine your own status quo, you can secure a strong future for both your company and your career.

**Build** - Tony Fadell 2022-05-03

THE NEW YORK TIMES BESTSELLER. An unorthodox guide to making things worth making, from 'the father of the iPod and iPhone' and the creator of Nest. Everyone deserves a mentor. For every career crisis, every fork in the road, you need someone to talk to. Someone who's been there before, who knows exactly how wobbly and conflicted you feel, who can give it to you straight: Here's how to think about choosing a job. Here's how to be a better manager. Here's how to approach design. Here's how to start a company. Here's how to run it. Tony Fadell learned all these lessons the hard way. He spent the first 10 years of his career in Silicon Valley failing spectacularly, and the next 20 building some of the most impactful devices in history - the iPod, iPhone, and Nest Learning Thermostat. He has enough stories and advice about leadership, design, startups, mentorship, decision making, devastating screwups, and

unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. But Tony's doesn't follow the standard Silicon Valley credo that you have to radically reinvent everything you do. His advice is unorthodox because it's old school. Because it's based on human nature, not gimmicks. Tony keeps things simple: he just tells you what works. He gives you exactly what you need to make things worth making. PRAISE FOR BUILD 'This is the most fun - and the most fascinating - memoir of curiosity and invention that I've ever read.' Malcolm Gladwell, Host of the Revisionist History podcast. Author of Outliers and Talking to Strangers. 'Whether you're looking to build a great product, a creative team, a strong culture, or a meaningful career, Tony's guidance will get you thinking and rethinking.' Adam Grant, Author of Think Again & Host of the TED podcast WorkLife
