*Who's Who in the South and Southwest,
1986-1987 - 1986-08*

The Rise and Triumph of the Modern Self -

Carl R. Trueman 2020-10-26

Modern culture is obsessed with identity. Since the landmark Obergefell v. Hodges Supreme Court decision in 2015, sexual identity has dominated both public discourse and cultural trends—and yet, no historical phenomenon is its own cause. From Augustine to Marx, various views and perspectives have contributed to the modern understanding of self. In *The Rise and Triumph of the Modern Self*, Carl Trueman carefully analyzes the roots and development of the sexual revolution as a symptom, rather than the cause, of the human search for identity. This timely exploration of the history of thought behind the sexual revolution teaches readers about the past, brings clarity to the present, and gives guidance for the future as Christians navigate the culture's ever-changing search for identity.

Therapeutically Applied Role-Playing Games

- Elizabeth D. Kilmer 2023-04-05

Therapeutically Applied Role-Playing Games provides a comprehensive approach to implementing therapeutically applied role-playing game (TA-RPG) groups for mental health practitioners. When facilitated by a trained professional, TA-RPGs are a powerful tool for insight, growth, and change for individuals and

communities. The Game to Grow Method of Therapeutically Applied Role-Playing Games is a transdiagnostic, transtheoretical, group intervention developed over a decade of practice using Dungeons & Dragons and other popular tabletop role-playing game systems, as well as leveraging therapeutic factors from acceptance and commitment therapy, marriage and family therapy, drama therapy, and interpersonal process groups. TA-RPGs are conceptualized as a gaming system layered on top of established intervention techniques. They can accommodate a multitude of game systems and align with theoretical mechanisms for change found across therapeutic orientations. This work serves as a comprehensive training manual for TA-RPGs, providing a valuable resource for mental health professionals interested in incorporating TA-RPGs into their practice.

No Easy Answers - 2007

No Easy Answers is the first comprehensive study of US sex offender registration, community notification and residency restriction laws, their public safety impact, and the effect they have on former offenders and their families. It concludes the laws are poorly crafted and misguided, failing to protect children from sex crimes but making it nearly impossible for former offenders to rebuild their lives. In many states, everyone convicted of a sex crime must register and the requirement can last for life. The requirements are overbroad in scope and overlong in duration. As a result, there are more than 600,000 registered sex offenders, including individuals convicted of sexual sex between teenagers, prostitution, and public urination, as well as those who committed their only offenses decades ago. Unfettered public access to online sex offender registries exposes registrants to harassment, ostracism, and even violence, with

little evidence that this form of community notification protects anyone from sexual violence. Residency restrictions prohibit former offenders from living within a designated distance (anywhere from 500 to 2,500 feet) from places where children gather. The restrictions have the effect of banishing former offenders from entire towns, forcing them to live far from home, families, jobs, and treatment, and hindering law-enforcement supervision. The restrictions may have no impact on the likelihood of recidivism. Sex offender laws reflect public concern that children are at grave risk of sexual abuse by strangers who are repeat offenders. The real risks children face are quite different: statistics demonstrate that most sexual abuse of children is committed by family members or persons known and often trusted by the victim, and by someone who has not previously been convicted of a sex offense. The laws also reflect the widely shared but erroneous belief that sex offenders continually repeat their offenses. Authoritative studies, however, indicate that three out of four adult offenders do not reoffend.
