Negro Sculpture Carl Einstein 2016-12-05 Negro Sculpture (1915) was the first critical response to African sculpture, challenging prejudices and misconceptions around this subject. It quickly became a crucial text for the European avant-garde and today remains indispensable to understanding the shift in discussion towards non-European art taking place at the time.

The Mystery Method Mystery 2007-02-06 "One of the most admired men in the world of seduction" (The New York Times) teaches average guys how to approach, attract and begin intimate relationships with beautiful women For every man who always wondered why some guys have all the luck, Mystery, considered by many to be the world's greatest pickup artist, finally reveals his secrets for finding and forming relationships with some of the world's most beautiful women. Mystery gained mainstream attention for his role in Neil Strauss's New York Times bestselling exposé, *The Game*. Now he has written the definitive handbook on the art of the pickup. He developed his unique method over years of observing social dynamics and interacting with women in clubs to learn how to overcome the guard shield that many women use to deflect come-ons from "average frustrated chumps." *The Mystery Method: How to Get Beautiful Women Into Bed* shares tips such as: *Give more attention to her less attractive friend at first, so your target will get jealous and try to win your attention. *Always approach a target within 3 seconds of noticing her. If a woman senses your hesitation, her perception of your value will

be lower. *Don't be picky. Approach as many groups of people in a bar as you can and entertain them with fun conversation. As you move about the room, positive perception of you will grow. Now it's easy to meet anyone you want. *Smile. Guys who don't get laid, don't smile.

Thumb Culture Peter Glotz 2005 Mobile communication has an increasing impact on people's lives and society. Ubiquitous media influence the way users relate to their surroundings, and data services like text and pictures lead to a culture shaped by thumbs. Representing several years of research into the social and cultural effects of mobile phone use, this volume assembles fascinating approaches and new insights of leading scientists and practitioners. It contains the results of a first international survey on the social consequences of mobile phones and provides a comprehensive inventory of today's issues and an outlook in mobile media, society, and their future study. Peter Glotz is Emeritus Professor of Media and Society, University of St. Gallen, Switzerland. Stefan Bertschi is a researcher at the University of

St. Gallen, Switzerland.

Of Trees and Birds Alexiadou, Artemis 2019 Gisbert Fanselow's work has been invaluable and inspiring to many researchers working on syntax, morphology, and information structure, both from a theoretical and from an experimental perspective. This - volume comprises a collection of articles dedicated to Gisbert on the occasion of his 60th birthday, covering a range of topics from these areas and beyond. The contributions have in common that in a broad sense they have to do with language structures (and thus trees), and that in a more specific sense they have to do with birds. They thus cover two of Gisbert's major interests in- and outside of the linguistic world (and perhaps even at the interface).

Japan, An Attempt At Interpretation Lafcadio Hearn 1905

The Address of the Eye Vivian Sobchack 2020-05-05 Cinema is a sensuous object, but in our presence it becomes also a sensing, sensual, sense-making subject. Thus argues Vivian Sobchack as she challenges basic assumptions of current film theory that reduce film to an object of vision and the spectator to a victim of a deterministic cinematic apparatus. Maintaining that these premises ignore the material and cultural-historical situations of both the spectator and the film, the author makes the radical proposal that the cinematic experience depends on two "viewers" viewing: the spectator and the film, each existing as both subject and object of vision. Drawing on existential and semiotic phenomenology, and particularly on the work of Merleau-Ponty, Sobchack shows how the film experience provides empirical insight into the reversible, dialectical, and signifying nature of that embodied vision we each live daily as both "mine" and "another's." In this attempt to account for cinematic intelligibility and signification, the author explores the possibility of human choice and expressive freedom within the bounds of history and culture.

Reclaiming Conversation Sherry Turkle 2015-10-06 “In a time in which the ways we communicate and connect are constantly changing, and not always for the better, Sherry Turkle provides a much needed voice of caution and reason to help explain what the f*** is going on.” —Aziz Ansari, author of *Modern Romance*

Renowned media scholar Sherry Turkle investigates how a flight from conversation undermines our relationships, creativity, and productivity—and why reclaiming face-to-face conversation can help us regain lost ground. We live in a technological universe in which we are always communicating. And yet we have sacrificed conversation for mere connection. Preeminent author and researcher Sherry Turkle has been studying digital culture for over thirty years. Long an enthusiast for its possibilities, here she investigates a troubling consequence: at work, at home, in politics, and in love, we find ways around conversation, tempted by the possibilities of a text or an email in which we don’t have to look, listen, or reveal ourselves. We develop a taste for what mere connection offers. The dinner table falls silent as children compete with phones for their parents’ attention. Friends learn strategies to keep conversations going when only a few people are looking up from their phones. At work, we retreat to our screens although it is conversation at the water cooler that increases not only productivity but commitment to work. Online, we only want to share opinions that our followers will agree with – a politics that shies away from the real conflicts and solutions of the public square. The case for conversation begins with the necessary conversations of solitude and self-reflection. They are endangered: these days, always connected, we see loneliness as a problem that technology should solve. Afraid of being alone, we rely on other people to give us a sense of ourselves, and our capacity for empathy and relationship suffers. We see the costs of the flight from conversation everywhere: conversation is the cornerstone for democracy and in business it is good for the bottom line. In the private sphere, it builds empathy, friendship,

love, learning, and productivity. But there is good news: we are resilient. Conversation cures. Based on five years of research and interviews in homes, schools, and the workplace, Turkle argues that we have come to a better understanding of where our technology can and cannot take us and that the time is right to reclaim conversation. The most human—and humanizing—thing that we do. The virtues of person-to-person conversation are timeless, and our most basic technology, talk, responds to our modern challenges. We have everything we need to start, we have each other. Turkle's latest book, *The Empathy Diaries* (3/2/21) is available now.

The App Generation Howard Gardner 2013-10-22 No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be "app-dependent" versus "app-enabled" and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.

Anthropology Christoph Wulf 2013-04-08 Originally published in

German, Christoph Wulf's *Anthropology* sets its sights on a topic as ambitious as its title suggests: anthropology itself. Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science, philosophy, history, and many other disciplines, Wulf examines—with breathtaking scope—all the ways that anthropology has been understood and practiced around the globe and through the years. Seeking a central way to understand anthropology in the midst of many different approaches to the discipline, Wulf concentrates on the human body. An emblem of society, culture, and time, the body is also the result of many mimetic processes—the active acquisition of cultural knowledge. By examining the role of the body in the performance of rituals, gestures, language, and other forms of imagination, he offers a bold new look at how culture is produced, handed down, and transformed. Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole, *Anthropology* looks squarely at the mystery of humankind and the ways we have attempted to understand it.

Popular Film and Television Comedy Frank Krutnik 2006-10-19
Steve Neale and Frank Krutnik take as their starting point the remarkable diversity of comedy's forms and modes - feature-length narratives, sketches and shorts, sit-com and variety, slapstick and romance. Relating this diversity to the variety of comedy's basic conventions - from happy endings to the presence of gags and the involvement of humour and laughter - they seek both to explain the nature of these forms and conventions and to relate them to their institutional contexts. They propose that all forms and modes of the comic involve deviations from aesthetic and cultural conventions and norms, and, to demonstrate this, they discuss a wide range of programmes and films, from *Blackadder* to *Bringing up Baby*, from *City Limits* to *Blind Date*, from the *Roadrunner* cartoons to *Bless this House* and *The Two Ronnies*. Comedies looked at in particular detail include: the classic slapstick films of Keaton, Lloyd, and Chaplin; Hollywood's

'screwball' comedies of the 1930s and 1940s; Monty Python, Hancock, and Steptoe and Son. The authors also relate their discussion to radio comedy.

Going to the Mountain Ndaba Mandela 2018-06-28 'You empower yourself and then you reach out to others.' Uplifting life lessons from one of the greatest leaders the world has ever known... through the eyes of the grandson whose life he changed forever. In his book *Going to the Mountain*, Ndaba Mandela shares the story of his coming-of-age alongside South Africa's rebirth. It is a remarkable journey, and one that took him from the violent, segregated Soweto ghettos to his grandfather's presidential home. As a young boy, Ndaba was constantly shunted from place to place. But at eleven years old he was unexpectedly invited to live with his grandfather, Nelson Mandela, even though he had met him only once before, during a prison visit. And, slowly, they built a relationship that would affect both of them profoundly. Ndaba's teenage years were complicated, but as he approached his twenty-first birthday, Mandela decided that Ndaba was finally ready to 'go to the mountain' - a test of courage during which you become a man. At the end of this gruelling ritual journey, the elders of the Mandelas' tribe gathered and Ndaba's grandfather was there, as ever, to share his greatest life lessons. From Nelson Mandela, Ndaba learned the spirit of endurance, the triumph of forgiveness, the power of resistance and the beauty of reconciliation. And as Mandela grew older, Ndaba had the chance to repay his grandfather's love and support by demonstrating the ways in which he'd understood all that he had taught him. Intimate and inspirational, *Going to the Mountain* is a powerful reminder of how one person can impact profoundly on another, and a testament to the awesome power within us to change ourselves and our world.

Trust in the World Josef Fruchtl 2017-09-20 This book examines the theory, originally raised in Gilles Deleuze's philosophy of film,

that cinema has the power to restore our trust in the world. Früchtl demonstrates that cinema does this in three main ways: by restoring our belief in the absurd, in the body and in a sceptical abstention from judging and acting. Cinema shares this ability with other arts, but what sets it apart in particular is that it evokes Modernity and its principle of subjectivity. This book further develops the idea of trust and cinema by synthesizing the philosophies of complementary thinkers such as Kant, Nancy, Agamben, Benjamin and Rancière. It concludes with examination of Cavell's solution to the problem of scepticism and a synthesis of Kantian aesthetic theory with Cavellian pragmatism. Originally published in German under the title *Vertrauen in die Welt*, this English-language translation features a new introduction that situates Früchtl's work within contemporary analytical philosophy of film. It will be of interest to scholars working in Continental aesthetics, philosophy of film, and film theory.

English in Europe Manfred Görlach 2002-05-23 English in Europe charts the English invasion of Europe since 1945. Sixteen distinguished European scholars report on the English words and phrases that have become integral parts of their languages. Each describes the effect of English on the host language, and shows how the process of incorporation often modifies pronunciation and spelling and frequently transforms meaning and use. The languages surveyed are Icelandic, Dutch, French, Spanish, Norwegian, German, Italian, Romanian, Polish, Croatian, Finnish, Albanian, Russian, Bulgarian, Hungarian, and Greek. The book is designed as a companion to *A Dictionary of European Anglicisms* but may be read as an independent work. This is the first systematic survey of a phenomenon that is fascinating, alarming, and apparently unstoppable.

New Technologies at Work Christina Garsten 2020-06-11

Information and communication technologies have completely revolutionized our working practices. Career patterns, professional identities, speed of communication, time management, and mobility have been irrevocably changed in an amazingly short period. Drawing on worldwide case studies, this fascinating book explores these transformations and looks to what developments are in store for us in the future. Flexible hours, email, virtual meetings rooms, and working from home are all relatively new additions to our professional lives. The effects of these technological advances have been dramatic and far-reaching. Not only have they helped to connect organizations and institutions in developing countries to the rest of the world, but they also allow people to maintain extensive geographical networks with friends, families, and colleagues. The use of virtual reality and multimedia has had a huge impact on careers ranging from investment banking to molecular biology, and has brought fundamental changes to education and training, the generation of new ideas, and problem solving. This book investigates both the impact of information technology on working practices and, more complexly, how I.T. is bound up in social, political, and economic issues. How are power relations established and maintained through transnational networking? Can the Internet be used as a political tool to manipulate the masses? In what ways has digital technology changed the aesthetics and practices of the Euro-American dance world? What initiatives have been undertaken to ensure people aren't excluded from the digital world and have they succeeded? Through answering these and many more questions, this groundbreaking book is an essential guide to the modern day world.

The Art of Beowulf Arthur Gilchrist Brodeur 1959 During the twenty years that have passed since the publication of J.R.R. Tolkien's famous lecture, "Beowulf, the Monsters and the Critics," interest in Beowulf as a work of art has increased gratifyingly, and many fine papers have made distinguished contributions to

our understanding of the poem as poetry and as heroic narrative. Much more, however, remains to be done. We have still no systematic and sensitive appraisal of the poem later than Walter Morris Hart's *Ballad and Epic*, no thorough examination of the poet's gifts and powers, of the effects for which he strove and the means he used to achieve them. More than enough remains to occupy a generation of scholars. It is my hope that this book may serve as a kind of prolegomenon to such study. It makes no claim to completeness or finality; it contributes only the convictions and impressions which have been borne in upon me in the course of forty years of study of the poem. - Preface.

Mapping Scientific Frontiers Chaomei Chen 2013-07-30 This is an examination of the history and the state of the art of the quest for visualizing scientific knowledge and the dynamics of its development. Through an interdisciplinary perspective this book presents profound visions, pivotal advances, and insightful contributions made by generations of researchers and professionals, which portrays a holistic view of the underlying principles and mechanisms of the development of science. This updated and extended second edition: highlights the latest advances in mapping scientific frontiers examines the foundations of strategies, principles, and design patterns provides an integrated and holistic account of major developments across disciplinary boundaries "Anyone who tries to follow the exponential growth of the literature on citation analysis and scientometrics knows how difficult it is to keep pace. Chaomei Chen has identified the significant methods and applications in visual graphics and made them clear to the uninitiated. Derek Price would have loved this book which not only pays homage to him but also to the key players in information science and a wide variety of others in the sociology and history of science." - Eugene Garfield "This is a wide ranging book on information visualization, with a specific focus on science mapping. Science mapping is still in its infancy and many intellectual challenges

remain to be investigated and many of which are outlined in the final chapter. In this new edition Chaomei Chen has provided an essential text, useful both as a primer for new entrants and as a comprehensive overview of recent developments for the seasoned practitioner.” – Henry Small
Chaomei Chen is a Professor in the College of Information Science and Technology at Drexel University, Philadelphia, USA, and a Changjiang Scholar at Dalian University of Technology, Dalian, China. How We Desire Carolin Emcke 2018-05-28
What if, instead of discovering our sexuality only once, during puberty, we discover it again later—and then again, after that? What if our sexuality reinvents itself every time our desire shifts, every time the object of our desire changes? What if the nature of our desire is constantly changing—growing deeper, lighter, wilder, more reckless, more tender, more selfish, more devoted, more radical? *How We Desire* is an enthralling essay about gender, sexuality and love by one of Germany’s most admired writers. It’s about growing up, and discovering the contours of desire and difference, about understanding that we sometimes ‘slip into norms the way we slip into clothes, putting them on because they’re laid out ready for us’. In telling her own story, Emcke draws back the veil on how we experience desire, no matter what our sexual orientation. And she examines how prejudice against homosexuality has survived its decriminalisation in the west. This marvellous book pays homage to the radical magic and liberating tenderness of desire itself. Carolin Emcke was born in 1967. She studied philosophy, politics and history in London, Frankfurt and at Harvard. From 1998 to 2013 she reported from war and crisis zones including Kosovo, Afghanistan, Pakistan, Iraq, Gaza and Haiti. She has written a number of books, and in 2016 she received the Peace Prize of the German Book Trade, which has

also been won by Svetlana Alexievich, Orhan Pamuk and Susan Sontag. *How We Desire* is the first book by Carolin Emcke to be translated into English. 'Hypnotic.' Sydney Morning Herald 'A beautiful account of discovering and rediscovering one's identity.' Otago Daily Times 'Delicate and vulnerable, angry, passionate, clever and thoughtful. An amazing work.' Westdeutsche Allgemeine Zeitung 'Her words tremble with fury...A compelling conversation, urging readers to rethink the borderlands of the erotic.' Australian 'Huge intellect and tremendous energy.' Developmental Tasks in Adolescence Klaus Hurrelmann

2018-11-08 The topic of adolescent development in Europe is one which has received little academic attention in recent years.

Developmental Tasks in Adolescence makes an exciting contribution to the field by applying socialisation theory to four major developmental tasks of life: Qualifying, Bonding, Consumption and Participation, arguing that if the tasks in these areas are mastered, then personal individuation and social integration can take place, a prerequisite for the formation of self-identity. In highly developed societies, adolescence encompasses a period of about 15 years on average. Puberty, or the transition from childhood, starts earlier and earlier, and the transition to adulthood is increasingly postponed. *Developmental Tasks in Adolescence* proposes that the way in which adolescents master the tasks of everyday life has become a pattern of orientation for the life stages which follow because of the new lifestyle requirements that are typical for modern democratic societies. Today, a life full of uncertainties and ambiguities is no longer limited to adolescence, but rather continues into adulthood. Hurrelmann and Quenzel's sociological approach is valuable reading for students and academics in psychology, sociology, education, social work and youth studies, and for those on professional training courses in these fields.

Consuming the Romantic Utopia Eva Illouz 2023-04-28 To what extent are our most romantic moments determined by the portrayal of love in film and on TV? Is a walk on a moonlit beach a moment of perfect romance or simply a simulation of the familiar ideal seen again and again on billboards and movie screens? In her unique study of American love in the twentieth century, Eva Illouz unravels the mass of images that define our ideas of love and romance, revealing that the experience of "true" love is deeply embedded in the experience of consumer capitalism. Illouz studies how individual conceptions of love overlap with the world of clichés and images she calls the "Romantic Utopia." This utopia lives in the collective imagination of the nation and is built on images that unite amorous and economic activities in the rituals of dating, lovemaking, and marriage. Since the early 1900s, advertisers have tied the purchase of beauty products, sports cars, diet drinks, and snack foods to success in love and happiness. Illouz reveals that, ultimately, every cliché of romance—from an intimate dinner to a dozen red roses—is constructed by advertising and media images that preach a democratic ethos of consumption: material goods and happiness are available to all. Engaging and witty, Illouz's study begins with readings of ads, songs, films, and other public representations of romance and concludes with individual interviews in order to analyze the ways in which mass messages are internalized. Combining extensive historical research, interviews, and postmodern social theory, Illouz brings an impressive scholarship to her fascinating portrait of love in America.

Trust and Communication in a Digitized World Bernd Blöbaum 2016-02-24 This book explores models and concepts of trust in a digitized world. Trust is a core concept that comes into play in multiple social and economic relations of our modern life. The book provides insights into the current state of research while presenting the viewpoints of a variety of disciplines such as communication studies, information systems, educational and

organizational psychology, sports psychology and economics. Focusing on an investigation of how the Internet is changing the relationship between trust and communication, and the impact this change has on trust research, this volume facilitates a greater understanding of these topics, thus enabling their employment in social relations.

The Anglicization of European Lexis Cristiano Furiassi 2012

This volume explores the lexical influence of English on European languages, a topical theme with linguistic and cultural implications. It provides an extensive introductory background to a cross-national view of English-induced lexical borrowing, posing crucial analytical questions such as what counts as an Anglicism. It also offers a typology of borrowings with examples from the languages represented: Armenian, Danish, French, German, Italian, Norwegian, Polish, Serbian, Spanish, and Swedish. The articles in this volume address general and language-specific issues related to the analysis and collection of Anglicisms, extending the scope to the largely unexplored area of phraseology and bringing new insights into corpus-based and corpus-driven methodologies. This volume fits into a well-established and constantly developing research field and will appeal to scholars interested in the spread of English as an international language, contact and contrastive linguistics, lexicology and lexicography, and computer corpus lexicography.

Beethoven's Folksong Settings Barry A. R. Cooper 1994

Beethoven composed far more folksong settings than any other type of composition. Most are British songs, including Auld Lang Syne and the The Miller of Dee, with text by such authors as Burns, Byron and Scott. Yet Beethoven's settings, commissioned by George Thomson of Edinburgh, have been neglected by performers and scholars alike, and nearly all accounts of them are both superficial and startlingly inaccurate. This book is based on a very elaborate study of a wide range of sources, and dispels the many myths that have been circulating about this music. Every

one of the 179 settings is dated to within a few weeks and an account is given of the sources of the melodies and texts, the difficulties of sending the music across Europe during the Napoleonic Wars (smugglers were even called upon to assist!), the fees Beethoven received, and when and how the texts were added. By comparing Beethoven's settings with those of his predecessors Pleyel, Haydn and Kozeluch, the author demonstrates that Beethoven comprehensively transcended the bounds of convention, producing settings of extra-ordinary quality and originality. Suggestions are also made for overcoming the problems of presenting these songs in performance.

Why Love Hurts Eva Illouz 2013-05-20 Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from

which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

Liar Robert Feldman 2013-03-31 Ever told someone they looked 'great' when they really looked awful? Ever said you'd be 'there in a second' ... knowing it would be more like five minutes? Ever made up an excuse to get out of a difficult situation? Or claimed that you never told lies? Never? Liar! But don't feel bad - we all tell lies, all the time. Two to three times in a ten-minute conversation is the average according to the latest research. From the 'white lies' that help smooth over tricky social situations to lies told with intent to harm, lying plays a huge - and crucial - role in our society at every level. Drawing on mindboggling examples of real-life liars who were caught in the act as well as years of research into deception, Robert Feldman, one of the world's leading authorities in the field, reveals the truth about why we lie, including how children learn to do it, what it costs us, how we benefit and how it can fail with catastrophic consequences.

The Hunger Pastor (German Classics) Wilhelm Raabe 2015-01-07 Wilhelm Raabe's novel entitled *Der Hungerpastor* (1864) is a classic example of the so-called "poetic realism" to which many - primarily bourgeois - German writers were devoted between 1850 and 1890. --- Wilhelm Raabe (1831 - 1910) became famous following the publication of his first novel, *Die Chronik der*

Sperlingsgasse (The Sparrow Lane Chronicle), in 1856. His late works are known for their social criticism, while earlier novels, such as *The Hunger Pastor*, were intended to be primarily educational. --- With the figure of Hans Unwirrsch in *The Hunger Pastor*, Raabe completely lives up to his motto - "Look up to the stars. Pay attention to the streets." The budding pastor, who was born into poverty, "hungers" for knowledge and a respected place in society, but he constantly stumbles over obstacles that his own life, as well as the lives of his family and friends, place before him. --- Raabe's rambling style makes his works difficult reading for many contemporary readers. In this version of *The Hunger Pastor*, several chapters have therefore been summarized by the translator, while the most important ones are published in their original length. --- Despite some anti-Semitic elements, which were commonly found in the works of some 19th century bourgeois writers in Germany, *The Hunger Pastor* is and remains a German literature classic.

Mastering the Art of French Cooking, Volume 1 Julia Child

2011-10-05 NEW YORK TIMES BESTSELLER • The definitive

cookbook on French cuisine for American readers: "What a cookbook should be: packed with sumptuous recipes, detailed instructions, and precise line drawings. Some of the instructions look daunting, but as Child herself says in the introduction, 'If you can read, you can cook.'" —Entertainment Weekly "I only wish that I had written it myself." —James Beard Featuring 524 delicious recipes and over 100 instructive illustrations to guide readers every step of the way, *Mastering the Art of French Cooking* offers something for everyone, from seasoned experts to beginners who love good food and long to reproduce the savory

delights of French cuisine. Julia Child, Simone Beck, and Louisette Bertholle break down the classic foods of France into a logical sequence of themes and variations rather than presenting an endless and diffuse catalogue of dishes—from historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. Throughout, the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations—bound to increase anyone’s culinary repertoire. “Julia has slowly but surely altered our way of thinking about food. She has taken the fear out of the term ‘haute cuisine.’ She has increased gastronomic awareness a thousandfold by stressing the importance of good foundation and technique, and she has elevated our consciousness to the refined pleasures of dining.” —Thomas Keller, *The French Laundry*

Zwischen den Kulturen Carola Hilfrich-Kunjappu 2015-03-10 Die Beiträge dieses Bandes gehen auf ein Symposium zurück, das 1994 vom Franz-Rosenzweig-Forschungszentrum der Hebräischen Universität in Jerusalem veranstaltet wurde. Ziel war die Erarbeitung eines methodischen Rahmens zur Analyse deutsch-jüdischer Interkulturalität. Im Mittelpunkt stand der Versuch einer Definition des 'Zwischenraums' zwischen zwei Kulturen, der einerseits die Bedingung für mögliche kulturelle Erneuerung darstellt, andererseits aber auch für die realen Katastrophen im Kontext interkultureller Begegnungen. Die Problematik interkultureller Übersetzung ist ihrerseits als Theorie und Praxis dieses 'Zwischenraums' zu verstehen, insofern sie im Zwischenraum zwischen Übersetzbarkeit und Unübersetzbarkeit angesiedelt ist.
