*Masculinity and Its Discontents* Michael J. Diamond 2021-06-24 Offering a uniquely psychoanalytic

developmental perspective on male gender identity and the sense of maleness, this book provides an in-depth analysis of the development of masculinity in childhood and its continued evolution throughout a man's life. Drawing on classical Freudian theory, as well as on more contemporary psychoanalytic theories, this book explores early infancy and child development, preoedipal factors and the oedipal complex, the influence of parenting and the unconscious transmission of gendered factors both by mothers and both biological and symbolic fathers, the male ego ideal, social, cultural, and biological influences, the role of inherent psychic bi-generality in the context of gender binaries, and the inherent gendered tensions and challenges experienced as an individual progresses into adult and later life. This book is original in its characterization of the male developmental trajectory as underpinned by psychoanalytic principles pertaining to conflict and inherent tensions that continue throughout the life cycle and strongly impact other areas of life. Deeply rooted in the unconscious, a man's multiply determined sense of masculinity requires deconstructing the mother, the feminine, and the other in the male psyche. As the text illustrates via clinical vignettes, an awareness and an understanding of these areas can improve the clinical work of psychoanalysts working with men who struggle with the intrinsic conflicts in their sense of maleness. This book will be of great clinical value to psychoanalysts, psychotherapists and other mental health practitioners, and will stimulate the thinking of scholars in such areas as gender theory, psychodynamic and sociocultural aspects of gender roles, and the changing social definition of masculinity.

**Painted Love** Hollis Clayson 2003-10-30 In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their

contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

*Mystifying the Monarch* Jeroen Deploige 2006 The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

**The Sciences of the Artificial, reissue of the third edition with a new introduction by John Laird** Herbert A. Simon 2019-08-13 Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of

artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. *The Sciences of the Artificial* distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.

Sexuality Education Clint E. Bruess 2004 *Sexuality Education: Theory and Practice, Fourth Edition* is designed to prepare future sexuality educators and administrators, as well as seasoned teachers about sexuality and also aims to clarify the false assumptions related to sexuality education. Science Fiction and Psychology Gavin Miller 2020-01-31 The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. *Science Fiction and Psychology* goes beyond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the

ascendance of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. *Science Fiction and Psychology* also considers how psychology itself has made use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present.

**The Membranes** Chi Ta-wei 2021-06-01 It is the late twenty-first century, and Momo is the most celebrated dermal care technician in all of T City. Humanity has migrated to domes at the bottom of the sea to escape devastating climate change. The world is dominated by powerful media conglomerates and runs on exploited cyborg labor. Momo prefers to keep to herself, and anyway she's too busy for other relationships: her clients include some of the city's best-known media personalities. But after meeting her estranged mother, she begins to explore her true identity, a journey that leads to questioning the bounds of gender, memory, self, and reality. First published in Taiwan in 1995, *The Membranes* is a classic of queer speculative fiction in Chinese. Chi Ta-wei weaves dystopian tropes—heirloom animals, radiation-proof combat drones, sinister surveillance technologies—into a sensitive portrait of one young woman's quest for self-understanding. Predicting everything from fitness tracking to social media saturation, this visionary and sublime novel stands out for its queer and trans themes. *The Membranes* reveals the diversity and originality of contemporary speculative fiction in Chinese, exploring gender and sexuality, technological

domination, and regimes of capital, all while applying an unflinching self-reflexivity to the reader's own role. Ari Larissa Heinrich's translation brings Chi's hybrid punk sensibility to all readers interested in books that test the limits of where speculative fiction can go.

The book is written in an accessible style with clear descriptions of technical terms, guides to further reading, and extensive cross-referencing between entries. A useful additional feature of this book is that it is cross-referenced throughout with *Key Thinkers in Linguistics and the Philosophy of Language* (Edinburgh, 2005), revealing significant connections and continuities in the two related disciplines. **Object Relations Theory and Self Psychology in Soc** Eda Goldstein 2010-07-06 Object Relations and Self Psychology are two leading schools of psychological thought discussed in social work classrooms and applied by practitioners to a variety of social work populations. Yet both groups have lacked a basic manual for teaching and reference -- until now. For them, Dr. Eda G. Goldstein's book fills a void on two fronts: Part I provides a readable, systematic, and comprehensive review of object relations and self psychology, while Part II gives readers a friendly, step-by-step description and illustration of basic treatment techniques. For educators, this textbook offers a learned and accessible discussion of the major concepts and terminology, treatment principles, and the relationship of object relations and self psychology to classic Freudian theory. In a single volume, Dr. Goldstein has met the complex challenges of education and clinical practice.

Law Enforcement Intelligence David L. Carter 2012-06-19 This intelligence guide was prepared in response to requests from law enforcement executives for guidance in intelligence functions in a post-September 11 world. It will help law enforcement agencies develop or enhance their intelligence capacity and enable them to fight terrorism and other crimes while preserving community policing relationships. The world of law enforcement intelligence has changed dramatically since September 11, 2001. State, local, and tribal law enforcement agencies have been tasked with a variety of new responsibilities; intelligence is just one. In addition, the intelligence discipline has evolved significantly in recent years. As these various trends have merged, increasing numbers of American law enforcement agencies have begun to explore, and sometimes embrace, the intelligence function. This guide is intended to help them in this process. The guide is directed primarily toward state, local, and tribal law enforcement agencies of all sizes that need to develop or reinvigorate their intelligence function. Rather than being a manual to teach a person how to be an intelligence analyst, it is directed toward that manager, supervisor, or officer who is assigned to create an intelligence function. It is intended to provide ideas, definitions, concepts, policies, and resources. It is a primera place to start on a new managerial journey. Every law enforcement agency

in the United States, regardless of agency size, must have the capacity to understand the implications of information collection, analysis, and intelligence sharing. Each agency must have an organized mechanism to receive and manage intelligence as well as a mechanism to report and share critical information with other law enforcement agencies. In addition, it is essential that law enforcement agencies develop lines of communication and information-sharing protocols with the private sector, particularly those related to the critical infrastructure, as well as with those private entities that are potential targets of terrorists and criminal enterprises. Not every agency has the staff or resources to create a formal intelligence unit, nor is it necessary in smaller agencies. This document will provide common language and processes to develop and employ an intelligence capacity in SLTLE agencies across the United States as well as articulate a uniform understanding of concepts, issues, and terminology for law enforcement intelligence (LEI). While terrorism issues are currently most pervasive in the current discussion of LEI, the principles of intelligence discussed in this document apply beyond terrorism and include organized crime and entrepreneurial crime of all forms. Drug trafficking and the associated crime of money laundering, for example, continue to be a significant challenge for law enforcement. Transnational computer crime, particularly Internet fraud, identity theft cartels, and global black marketeering of stolen and counterfeit goods, are entrepreneurial crime problems that are increasingly being relegated to SLTLE agencies to investigate simply because of the volume of criminal incidents. Similarly, local law enforcement is being increasingly drawn into human trafficking and illegal immigration enterprises and the often associated crimes related to counterfeiting of official documents, such as passports, visas, driver's licenses, Social Security cards, and credit cards. All require an intelligence capacity for SLTLE, as does the continuation of historical organized crime activities such as auto theft, cargo theft, and

virtually any other scheme that can produce profit for an organized criminal entity. To be effective, the law enforcement community must interpret intelligence-related language in a consistent manner. In addition, common standards, policies, and practices will help expedite intelligence sharing while at the same time protecting the privacy of citizens and preserving hard-won community policing relationships.~

**Approaches to Psychology** William E. Glassman 2004 This revised and expanded edition of Approaches to Psychology builds on the wide appeal of the earlier editions. It explains what the discipline of psychology is, how it developed and how it contributes to the understanding of human behaviour and experience. This book introduces students to the five major conceptual frameworks or "approaches" to psychology: biological, behaviourist, cognitive, psychodynamic and humanistic. The methods, theories and assumptions of each approach are explored so that the reader builds an understanding of psychology as it applies to human development, social and abnormal behaviour. **I Can't Say That!: Going Beyond the Talk: Equipping Your Children to Make Choices about Sexuality and Gender from a Biblical Sexual Ethic** Corey Gilbert 2019-04-09 Gender Identity. Pornography. Hook-up culture. Same-Sex Attraction. Masturbation. Abuse. These issues are the tip of the iceberg when it comes to what our children are being forced to navigate at increasingly younger ages. As a parent, are you leading your family in conversations, so that your voice is the first one they hear on these sensitive issues? Do you know what the Bible says--and doesn't say--on the issues surrounding sexuality and gender? Do your children know what you believe and why you

believe it? You are not alone if you feel as though you don't know how and when to have these conversations. Many parents worry about having "The Talk" with their children because they are concerned about bringing it up too early, they are uncomfortable talking about sex, or they feel unprepared to answer questions that their child might ask. In *I Can't Say That!*, Dr. Gilbert walks parents through age-appropriate conversations and teaches parents how to create a culture of conversation through micro-conversations. In his roles as a counselor and professor, Dr. Gilbert has heard repeatedly from young adults that they never had conversations about the complicated issues surrounding sexuality with their parents and they wish that they had. His motivation in *I Can't Say That!* is to equip parents with the information they need so that they can in turn equip their children to make choices from a biblical sexual ethic.

**Essays on Art and Language** Charles Harrison 2003-09-12 Critical and theoretical essays by a long-time participant in the Art & Language movement. These essays by art historian and critic Charles Harrison are based on the premise that making art and talking about art are related enterprises. They are written from the point of view of Art & Language, the artistic movement based in England—and briefly in the United States—with which Harrison has been associated for thirty

years. Harrison uses the work of Art & Language as a central case study to discuss developments in art from the 1950s through the 1980s. According to Harrison, the strongest motivation for writing about art is that it brings us closer to that which is other than ourselves. In seeing how a work is done, we learn about its achieved identity: we see, for example, that a drip on a Pollock is integral to its technical character, whereas a drip on a Mondrian would not be. Throughout the book, Harrison uses specific examples to address a range of questions about the history, theory, and making of modern art—questions about the conditions of its making and the nature of its public, about the problems and priorities of criticism, and about the relations between interpretation and judgment.

*Transfigurations* Asbjørn Grønstad 2008 In many senses, viewers have cut their teeth on the violence in American cinema: from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes; to the 1970s masterpieces of Martin Scorsese, Sam Peckinpah and Francis Ford Coppola; to our present-day undertakings in imagining global annihilations through terrorism, war, and alien

grudges. Transfigurations brings our cultural obsession with film violence into a renewed dialogue with contemporary theory. Grønstad argues that the use of violence in Hollywood films should be understood semiotically rather than viewed realistically; Transfigurations thus alters both our methodology of reading violence in films and the meanings we assign to them, depicting violence not as a self-contained incident, but as a convoluted network of our own cultural ideologies and beliefs. *The Cambridge Handbook of Linguistic Typology* Alexandra Y. Aikhenvald 2017-03-30 Linguistic typology identifies both how languages vary and what they all have in common. This Handbook provides a state-of-the art survey of the aims and methods of linguistic typology, and the conclusions we can draw from them. Part I covers phonological typology, morphological typology, sociolinguistic typology and the relationships between typology, historical linguistics and grammaticalization. It also addresses typological features of mixed languages, creole languages, sign languages and secret languages. Part II features contributions on the typology of morphological processes, noun categorization devices, negation, frustrative modality, logophoricity, switch reference and motion events. Finally, Part III focuses on typological profiles of the mainland South Asia area, Australia, Quechuan and Aymaran, Eskimo-Aleut, Iroquoian, the Kampa subgroup of Arawak, Omotic, Semitic, Dravidian, the Oceanic subgroup of Austronesian and the Awyu-Ndumut family (in West Papua). Uniting the expertise of a stellar selection of scholars, this Handbook highlights linguistic typology as a major discipline within the field of linguistics.
