Perspectives of Close Relationships - Weber

Making It Work - Hirokazu Yoshikawa

2006-12-07

Low-skilled women in the 1990s took widely different paths in trying to support their children. Some held good jobs with growth potential, some cycled in and out of low-paying jobs, some worked part time, and others stayed out of the labor force entirely. Scholars have closely analyzed the economic consequences of these varied trajectories, but little research has focused on the consequences of a mother's career path on her children's development. *Making It Work*, edited by Hirokazu Yoshikawa, Thomas Weisner, and Edward Lowe, looks past the economic statistics to illustrate how different employment trajectories affect the social and emotional lives of poor women and their children. *Making It Work* examines Milwaukee's New Hope program, an experiment testing the effectiveness of an anti-poverty initiative that provided health and child care subsidies, wage supplements, and other services to full-time low-wage workers. Employing parent surveys, teacher reports, child assessment measures, ethnographic studies, and state administrative records, *Making It Work* provides a detailed picture of how a mother's work trajectory affects her, her family, and her children's school performance, social behavior, and expectations for the future. Rashmita Mistry and Edward D. Lowe find that increases in a mother's income were linked to higher school performance in her children. Without large financial worries, mothers gained extra confidence in their ability to parent, which translated into better test scores and higher teacher appraisals for their

children. JoAnn Hsueh finds that the children of women with erratic work schedules and non-standard hours—conditions endemic to the low-skilled labor market—exhibited higher levels of anxiety and depression. Conversely, Noemi Enchautegui-de-Jesus, Hirokazu Yoshikawa, and Vonnie McLoyd discover that better job quality predicted lower levels of acting-out and withdrawal among children. Perhaps most surprisingly, Anna Gassman-Pines, Hirokazu Yoshikawa, and Sandra Nay note that as wages for these workers rose, so did their marriage rates, suggesting that those worried about family values should also be concerned with alleviating poverty in America. It is too simplistic to say that parental work is either "good" or "bad" for children. *Making It Work* gives a nuanced view of how job quality, flexibility, and wages are of the utmost importance for the well-being of low-income parents and children.

Persuasion - Sharon Shavitt 1994

This text is designed to make the psychology of persuasion accessible to the non-specialist or non-scientist. It includes an introduction to the subject followed by an examination of issues of definition and measurement, and basic theory and research.

Atlas of the Heart - Brené Brown 2021-11-30

In her latest book, five-time #1 New York Times bestselling author Dr Brené Brown, writes, "If we want to find the way back to ourselves and each other, we need language and the grounded confidence to both tell our stories, and to be stewards of the stories that we hear. This is the framework for meaningful connection." In *Atlas of the Heart*, Brown takes us on a journey through 87 of the emotions and experiences that define what it means to be human. As she maps

*Downloaded from
legacy.opendemocracy.net on
2023-11-28 by guest*

the necessary skills and lays out an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances - a universe where we can share and steward the stories of our bravest and most heart-breaking moments with one another in a way that builds connection. Over the past two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as Brown's singular skills as a researcher/storyteller, to lay out an invaluable, research-based framework that shows us that naming an experience doesn't give the experience more power, it gives us the power of understanding, meaning and choice. Brown shares, "I want this to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves. Even when we have no idea where we are."

Odyssey of the Heart - John H. Harvey 2001-11

Written in a personal, story-telling style, Odyssey weaves excerpts of actual relationships with current and classic research to provide a better perspective on our own experiences in light of the principles of relationships. Highlights of its comprehensive coverage include the classic research on personal attraction, dating and meeting others for closeness, and the maintenance and dissolution of relationships. "Recommendations for Growth" provides an opportunity for readers to directly apply current research and theory to their own relationships. Features new to this edition include the latest research and therapeutic techniques on maintaining and enhancing relationships; a new chapter on the family with recent demographic changes and a look at the ongoing debates about the impact of cohabitation, divorce, and blended families; and new chapters on same sex relationships and the dark side of relationships, including why women stay in abusive relationships. Odyssey of the Heart serves as a text for courses on close and/or interpersonal relationships. Its accessibility and inclusion of many actual experiences will engage the general reader.

Study Guide and Workbook to Accompany

Zimbardo and Weber's Psychology, Second Edition - Peter C. Gram 1997

Psychology, Third Edition, builds upon the experience and reputations of Phil Zimbardo and Ann Weber with the addition of a new co-author, Bob Johnson, who has a wealth of teaching experience at the community college level. This briefer, less expensive book presents psychology in a meaningful, manageable format that focuses on the key questions and core concepts of psychology. Introductory psychology covers such a wide range of topics and issues that it becomes difficult for readers to see the forest for the trees. To make key psychological concepts more meaningful, the authors found inspiration in a classic chess study. This study showed that experts did no better than novices at remembering the location of pieces on a chess board when they were placed randomly. Only when the patterns represented actual game situations did they make sense and therefore become more easily memorable for the experts. Clearly, meaningful patterns are easier to remember and understand than random arrangements, and Psychology applies this by presenting the field of psychology in meaningful patterns to enhance comprehension. These concepts are then applied to readers' own lives, study skills, and the world around them. Finally, Psychology integrates a cross-cultural and multicultural perspective to make psychology meaningful for everyone. For anyone interested in Introductory Psychology.

Perspectives on Close Relationships - John H. Harvey 1994

This edited collection of original chapters was written expressly for this volume and for a student audience, by recognized experts in the relationships field. This series of distinguished "lectures" or intensive classes is designed to intrigue and invite student interest and involvement. Seven different disciplines within the field are represented offering students a variety of perspectives. Courses in Close Relationships, Personal Relationships, Family Relationships, Marriage and Family Living, and Liking/Loving, in departments of psychology, sociology, communication anthropology, child and family development, and counseling.

Interpersonal Accounts - John H. Harvey 1990

Attributions, Accounts, and Close

Relationships - John H. Harvey 2012-12-06

ATTRIBUTIONS, ACCOUNTS AND CLOSE RELATIONSHIPS documents attributional and accounts approaches to the study of close relationships. Issues of focus include communication problems in marriage and their relationship with causal attributions; marital violence and its relationship with early learning experience; ego-defensive attribution and excuse-making in couples and with respect to medical problems; and attributions about transitions in relationships.

Social Psychology Quarterly - 1979

Attributions, Accounts, and Close

Relationships - John H. Harvey 1992-01-02

ATTRIBUTIONS, ACCOUNTS AND CLOSE RELATIONSHIPS documents attributional and accounts approaches to the study of close relationships. Issues of focus include communication problems in marriage and their relationship with causal attributions; marital violence and its relationship with early learning experience; ego-defensive attribution and excuse-making in couples and with respect to medical problems; and attributions about transitions in relationships.

Islamic Terror - Avner Falk 2008-07-30

Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints, including religious, cultural, historical, political, social, economic and, above all, psychological. Drawing on his training as a clinical psychologist, Falk's writings specialize in psychohistory and political psychology. Here, he examines topics including infantile experience and adult terrorism, the meaning of terror, terrorists and their mothers, narcissistic rage and Islamic terror, and whether terrorists are normal people, as some scholars claim. He also describes the infantile development of terrorist pathology, non-psychoanalytic theories of terrorism, globalization's effect on terrorism, and the notion of the clash of civilizations. Other topics addressed in this reader-friendly analysis include history's first Islamic terrorists and three important cases—two recent, deadly terrorists and a primary figure in our current war on terror. Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints,

including religious, cultural, historical, political, social, economic and, above all, psychological. Drawing on his training as a clinical psychologist, Falk's writings specialize in psychohistory and political psychology. Here, he examines topics including infantile experience and adult terrorism, the meaning of terror, terrorists and their mothers, narcissistic rage and Islamic terror, and whether terrorists are normal people, as some scholars claim. He also describes the infantile development of terrorist pathology, non-psychoanalytic theories of terrorism, globalization's effect on terrorism, and the notion of the clash of civilizations. Examining the emotional structure of traditional Muslim families, Falk shows us the Muslim child's ambivalence toward his or her parents, ways in which Muslims abuse women and children, and the roots of Muslim rage, and why all of that plays into the development of future terrorism. Other topics addressed in this reader-friendly analysis include history's first Islamic terrorists and three important cases—two recent, deadly terrorists and a primary figure in our current war on terror. The central idea throughout the book is that a person's attitude toward terror and terrorism—as well as whether he or she becomes a murderous terrorist, or even who wages a global war on terror—has much to do with that person's own terrifying experiences in infancy and childhood. Such terror, usually experienced first in the earliest interactions with the mother, is symbolically expressed, as Falk shows, in fairy tales and myths about terrifying witches and female monsters. Further terror may be experienced in the relationship with the father and also in various other traumatic ways. It is these early terrors, when extreme and uncontrollable, that most often produce terrorists and wars on terror, Falk argues. Thus, his book focuses on the conscious, but also on the irrational and unconscious causes of terrorism.

Bibliographic Guide to Psychology - New York Public Library. Research Libraries 1993

The Dark Side of Close Relationships - Brian H. Spitzberg 2013-06-17

This collection of essays represents a follow-up to the editors' 1994 publication, *The Dark Side of Interpersonal Communication*. In the preface

to that collection of essays, they argued that "To fully understand how people function effectively requires us to consider how individuals cope with social interaction that is difficult, problematic, challenging, distressing, and disruptive." In this companion volume, the focus expands from social interaction to close relationships. Aside from the inherent need to investigate the bad as well as the good of interpersonal relationships, the editors and their colleagues simply find the dark side metaphor to be intellectually arousing. It stimulates investigation of important yet often neglected phenomena, and it especially encourages consideration of the hidden and forbidden, and the paradoxical and ironic elements of human relating. This volume assembles the cutting-edge work of first rate scholars from the ranks of communication, psychology, sociology, and cognate disciplines. As in the previous text, the subject matter and stylistic approaches are diverse, reflecting the broad and interdisciplinary domain that is the dark side of human affairs. The selection of topics is somewhat selective, reflecting only a sample of emerging scholarship in the interdisciplinary study of relationships. These internationally recognized scholars examine various topics related to the dark side, including fatal attractions, jealousy and envy, misunderstanding, gossip, conflict, codependence, sexual coercion, stalking, relationship termination, unrequited love, and mental health problems in relationships. Some chapters present original data and models, whereas others reconfigure the way in which the understandings of relationships can be better understood. In addition, the bookend chapters examine the ideology, nature, and problems of dark side scholarship. Collectively, the scholarly journeys made in this volume are intended to illustrate the complexities--both moral and functional--involved in close relationship processes. The intent is neither to valorize nor demonize the darker aspects of close relationships, but rather to emphasize their importance to the day-to-day "doing" of relationships. Only by accepting such processes as integral to relationships can their role be fully understood.

Odyssey of the Heart - John H. Harvey

2001-11-01

Written in a personal, story-telling style, *Odyssey* weaves excerpts of actual relationships with current and classic research to provide a better perspective on our own experiences in light of the principles of relationships. Highlights of its comprehensive coverage include the classic research on personal attraction, dating and meeting others for closeness, and the maintenance and dissolution of relationships. "Recommendations for Growth" provides an opportunity for readers to directly apply current research and theory to their own relationships. Features new to this edition include the latest research and therapeutic techniques on maintaining and enhancing relationships; a new chapter on the family with recent demographic changes and a look at the ongoing debates about the impact of cohabitation, divorce, and blended families; and new chapters on same sex relationships and the dark side of relationships, including why women stay in abusive relationships. *Odyssey of the Heart* serves as a text for courses on close and/or interpersonal relationships. Its accessibility and inclusion of many actual experiences will engage the general reader.

Communication Competence - Annegret F. Hannawa 2015-10-16

Almost everything that matters to humans is derived from and through communication. Just because people communicate every day, however, does not mean that they are communicating competently. In fact, evidence indicates that there is a substantial need for better interpersonal skills among a significant proportion of the populace. Furthermore, "dark side" experiences in everyday life abound, and features of modern society pose new challenges that make the concept of communication competence increasingly complex. The *Handbook of Communication Competence* brings together scholars from across the globe to examine these various facets of communication competence, including its history, its essential components, and its applications in interpersonal, group, institutional, and societal contexts. The book provides a state-of-the-art review for scholars and graduate students, as well as practitioners in counseling, developmental, health care, educational,

Downloaded from
legacy.opendemocracy.net on

intercultural, and human resource management contexts, illustrating that communication competence is vital to health, relationships, and all collective human endeavors.

Perspectives On Loss - John H. Harvey
2014-01-14

Losses are integral to the human experience, but they sometimes unfold in subtle ways. Loss is not just about death, but can encompass a number of situations, such as those gradual losses experienced by the elderly: loss of vision, mental capacity, or hope. Intended to stimulate ideas and research in the new area of psychological aspects of loss, this sourcebook collects the writing of a set of distinguished scholars representing psychology and related fields. The author presents a case for a broadly-construed field of loss-both personal and interpersonal-that would complement other fields such as death and dying, traumatology, and stress and coping. No other volume is as comprehensive in its treatment of this intriguing subject. The book begins with an introduction to the concept of loss and discusses the definition of the term and the salience of the topic in the general public in the 1990s. Contributors were chosen to represent some of the most interesting current work on different types of loss and adaptation in the whole of the social and behavioral sciences. Contents cover such diverse subjects as loss in intimate relationships, disability, chronic illness, genocide, sports, unemployment, and homelessness. The book concludes with a commentary section on loss theory and research.

The Interpersonal Communication Book - Joseph A. DeVito 2001

Offering the perfect balance of theory and practical skills, this market-leading text equips students to make reasoned and effective communication decisions. Recognized for its ability to help students understand the crucial connection between theory and practice, the Ninth Edition includes a new feature called "Ask the Researcher" in which renowned researchers provide practical, and sometimes provocative, answers to questions often raised by students in the course. An entirely new chapter Unit 22 "Interpersonal Communication and Relationships in the Workplace" extends DeVito's trademark coverage of interpersonal relationships into the

workplace. Further supporting the text's mission to provide students with an interactive and engaging introduction to interpersonal communication, the Ninth Edition features an exciting new integrated text and technology learning system. Contextually-placed web icons in the text's margins direct students to the book's Companion Website where they engage in interactive exercises or simulations that help them gain a better understanding of concepts presented in the text. Superior coverage of cultural diversity, expanded coverage of ethics, and new discussions of the effects of technology make *The Interpersonal Communication Book*, Ninth Edition, the best choice for preparing students to communicate successfully in today's world.

Interpersonal Accounts - John H. Harvey 1990

The human is perhaps bestdubbed 'homo narrans', the story-teller. In our search for meanings we constantly tell stories and make accounts to explain events and frame relationships. This book presents the first systematic analysis from a psychological standpoint of this universal and fundamental human capacity. Nowhere is our account-making more evident than at times of acute personal stress. In divorce and separation, death of a spouse, redundancy or retirement, for example, we deal best with loss when we have worked through its meaning to close, empathic others. It is in the process of account-making that people look to create meaning out of loss. So fundamental an activity as account-making must, the authors believe, have evolutionary origins. Drawing on the work of Jaynes, they consider the process in relation to the origin of human consciousness and the beginnings of story-telling as a human activity. In arguing for the centrality of accounts to our psychology, the authors are careful to distinguish them from other processes of attribution and narratization. Nevertheless, the theories developed here will have a far-reaching impact on the development of social psychology and beyond the confines of the discipline too.

The Interpersonal Communication Reader - Joseph A. DeVito 2002

Offering popular and scholarly selections, this book helps readers better understand concepts in interpersonal communication and offers

practical advice to facilitate more effective communication. The Interpersonal Communication Reader features brief, engaging selections on topics ranging from basic principles of interpersonal communication, verbal and nonverbal messages, and interpersonal relationships, to topics that are rarely covered in depth in other books, such as

feedback, gossip, and apologies. Emphasizing the practical skills of interpersonal communication and relationships, the selections also highlight the theoretical and research foundations on which these skills rest. For anyone interested in interpersonal communication.
