*Medical Tourism - John Connell 2011*

Medical Tourism John Connell Although it may seem a recent phenomenon, tourism has long been associated with improved health, resulting in a boom of spas, yoga and rejuvenation treatments. Medical tourism is a more recent example of niche tourism, with increasing numbers of people travelling abroad in search of cosmetic enhancement and solutions to various serious medical conditions, often through surgery. This book looks at the background and rise of both health and medical tourism, alongside its global expansion and growing complexity, and examines how medical tourism

benefits but also challenges local healthcare providers, and contributes to regional economies and the tourism industry. It offers a unique overview of an emerging component of the tourist industry that is a distinct and controversial element of health provision. The book also provides insights into current topics such as global health and ethics, making this an essential resource for researchers and students of medical tourism and healthcare.

Hair transplantation is in demand worldwide, but because Asian hair tends to be more sparse and coarse than Caucasian hair, transplantation procedures need to be adapted to Asian patients. This book, exclusively devoted to Asian hair, is a complete and comprehensive text written by a group of authors sharing their experience in their specialized fields of hair restoration. Included are many practical tips as well as chapters on regional transplantation such as eyebrows, eyelashes, sideburns, beards, and mustaches, in addition to the usual scalp hair restoration. With its many illustrations, the book gives readers a complete knowledge of hair restoration surgery and provides a quick, easy-to-use reference on Asian hair and the differences in patients' demands. With an influx of new physicians in this challenging field of medicine, further education and training are imperative and must be available to provide a high standard of medical practice. This compilation meets that objective and ultimately

makes the valuable contribution of restoring patients' self-confidence.

biosciences landscape, this timely and important collection brings together ethnographic case studies on biotech endeavors such as genetically modified foods in China, clinical trials in India, blood collection in Singapore and China, and stem-cell research in Singapore, South Korea, and Taiwan. While biotech policies and projects vary by country, the contributors identify a significant trend toward state entrepreneurialism in biotechnology, and they highlight the ways that political thinking and ethical reasoning are converging around the biosciences. As ascendant nations in a region of postcolonial emergence, with an “uncanny surplus” in population and pandemics, Asian countries treat their populations as sources of opportunity and risk. Biotech enterprises are allied to efforts to overcome past humiliations and restore national identity and political ambition, and they are legitimized as solutions to national anxieties about food supplies, diseases, epidemics, and unknown biological crises in the

future. Biotechnological responses to perceived risks stir deep feelings about shared fate, and they crystallize new ethical configurations, often re-inscribing traditional beliefs about ethnicity, nation, and race. As many of the essays in this collection illustrate, state involvement in biotech initiatives is driving the emergence of “bio-sovereignty,” an increasing pressure for state control over biological resources, commercial health products, corporate behavior, and genetic based-identities. Asian Biotech offers much-needed analysis of the interplay among biotechnologies, economic growth, biosecurity, and ethical practices in Asia.

written for bisexual people, drags, LGBT community, non-binary gender, transfeminists, transgender people, and transsexual humans of the world. It reflects various types of stages and events that an LGBT community experiences in their lives. The author has highlighted the frequent phases of transgenderhood, which most of the lesbians, gays, bisexuals and transgenders undergo. The book covers imperative information about detransition, digital transgender archive, gender transition, healthcare, law, legal recognition, legal status of transgender people, LGBT in mythology, LGBT movements, LGBT sex education, medicalization, scientific studies of transsexuality, sex and gender, sexual orientation, spirituality, transfeminism, transgender day of remembrance, transgender history, transgender people and religion, and transvestism. It also focuses on some perceptive and discerning issues like criticism, discrimination, LGBT health disparities, suicide among LGBT youth,

transgender inequality, transgender sex workers, transmisogyny, transphobia, violence against transgender people, and violence and criminal justice system. The author is acknowledging all the colleagues, friends, relatives, social media friends, and contemporaries for their suggestions, feedbacks, and opinions. This book will definitely be a 24x7 guide and a handy tool for all transgenders worldwide. The author feels highly indebted to 'The Almighty Living God', who has helped him directly or indirectly in writing of this book. May all LGBTs of the world live happy and peaceful life !

Asia - Mark McLelland 2014-09-15

This collection brings together cutting-edge work by established and emerging scholars focusing on key societies in the East Asian region: China, Taiwan, Hong Kong, Japan, North and South Korea, Mongolia and Vietnam. This scope enables the collection to reflect on the nature of the transformations in constructions of sexuality in highly developed, developing and emerging societies and economies. Both Japan and China have established traditions of 'sexuality' studies reflecting longstanding indigenous understandings of sex as well as more recent developments which interface with Euro-American medical and psychological understandings. Authors reflect upon the complex colonial and economic interactions and cultural flows which have affected the East Asian region over the last two centuries. They trace local flows of ideas instead of defaulting to Euro-American paradigms for sexuality studies. Through looking at regional and global

exchanges of ideas about sexuality, this volume adds considerably to our understanding of the East Asian region and contributes to wider discussions of social transformation, modernisation and globalisation. It will be essential reading in undergraduate and graduate programs in sexuality studies, gender studies, women's studies and masculinity studies, as well as in anthropology, sociology, history, cultural studies, area studies and health sciences.

**The Forbidden Tale** - kameel ahmady

Gender is one of the most important aspects of human life. It encompasses sexual identities and roles, sexual orientation, lust, pleasure, intimacy, and reproduction. It can also include people's thoughts, dreams, desires, beliefs, views, values, behaviors, practices, roles, and relationships; but these aspects are not always directly experienced or expressed. Gender is affected by biological, psychological, social, economic, cultural, moral, legal, historical, religious and spiritual interactions. There is little

in the way of media coverage or reports about the Iranian LGBT community, and most of these reports are documentaries about people who have left Iran and live in another country. There has been only limited research on the experience of LGB communities in contemporary Iranian society and their views concerning this community. The research for *Forbidden Tale* seeks to fill this knowledge gap, and is the first research about the LGB community in Iran and the distinctive contexts in which this community functions. The anthropological and fieldwork study of LGB people in Iran by Kameel Ahmady and his team examines the field of gender by looking at the many complex aspects of sexual identity and its intricacies in that community, in the context of an increasing recognition of sexual orientation and the challenges that current practices of LGB and gender in Iran present. Myths and narratives that have often led to misconceptions about gender, and the mistaken policies and practices which ensue

from them, are examined to provide a more holistic approach. This study is complex because it enters the realm of private and public life in today's Iran beyond a simple and general view of sexual orientation and gender-related Impressions. This research first focused on in-depth interviews of over 300 LGB people, 60% male and 40% female, in the three metropolitan cities of Tehran, Mashhad and Isfahan. One specific feature of the research is that it focuses solely on LGB and on trans-sex people who have both male and female sexes, both of which are active at the same time. The focus is on challenges arising from present-day changes in gender relations and interaction in Iran, examining the theoretical and methodological frameworks created by the LGBT community, as well as by universities and research centers, public and social activists, and students outside that community. The main goals of this research project are to understand LGB community's feelings and beliefs through a critical analysis of

their own perspective, and to examine their challenges in living in a religious, class-based, traditional and patriarchal society that rejects LGB as an identity. The vulnerability of LGBT people in Iran has been routinely suppressed. The aim now is to clarify the situation of those who have been deliberately ignored and marginalized. The present study takes advantage of a combination of methods and approaches in order to provide a theoretical method suited for research on LGBT experience and nevertheless, to encompass the feelings and perceptions of the researcher as an 'objectivity' in the research confirmation criteria. This research was conducted between 2017-2018 and field data were collected in summer and autumn, 2017.

Trans History - Tess deCarlo 2018-05-29

What is transsexualism? Some estimate suggest that as many as 1 in 4,500 males may be transsexual and 1 in 8,000 females

Transsexualism is most commonly defined as the desire to live as the opposite sex accompanied by a wish to change the body to that preferred sex through surgery or hormone therapy The term was coined in the middle of the 20th Century, but there are many references to the phenomenon throughout history - from Ancient Greek mythology to Roman times Anthropologists have found instances of transsexualism in most societies and cultures, including Native American tribes such as the Navajo who have words in their own language for transsexual men and women

*Lady Boys, Tom Boys, Rent Boys* - Peter A. Jackson 2020-11-25

*Lady Boys, Tom Boys, Rent Boys: Male and Female Homosexualities in Contemporary Thailand* offers methods that will help social workers, researchers, and students create HIV/AIDS intervention services for gay men, lesbians, and transgender individuals in or from Thailand. Many of these methods can also be used by practitioners or HIV/AIDS educators in North America and developing countries to address issues of culturally diverse clientele. In response to Western and Thai sexuality studies that fail to accurately represent the diverse sexualities of Thailand, this book discusses and describes certain factors that need to be taken into consideration when developing intervention programs. Demonstrating how cultural and social factors influence services, *Lady Boys, Tom Boys, Rent Boys* will help you provide clients with effective and relevant services. Drawing attention to Eurocentric ideology that may

hinder cross-cultural collaboration for Thai-Western service provisions, this book offers you information that will help you understand how cultural, political, and economic systems shape sexuality and gender roles in Thai society. Lady Boys, Tom Boys, Rent Boys provides you with the necessary knowledge for providing successful services, including: how Thai sexualities are identified by examining the meaning of terms such as “toms” (masculine Thai lesbians), “dee” (feminine-identified women who have relations with other women), “kathoei” (males that dress like women and wear make-up), or “lady boys” (transsexual or transvestite males) how Thai society actually defines “having sex” and recognizing the differences from Western connotations of sex to effectively teach individuals about the risk of HIV/AIDS ways Western views of confidentiality and privacy differ from Thai views in order to understand why individuals hesitate to get tested for or seek counselling about HIV/AIDS the relationship

between occupation and sexual identity in movies and magazines that reveal how sexuality is characterized in Thailand the unique social identity of “toms” and how Thai society labels what is masculine and feminine reasons for hiding sexual identity, such as rejection, fear of stereotypes, and having a relationship that is viewed by society as wrong and meaningless protecting commercial sex workers (CSW) from infection by developing culturally appropriate interventions One of the only books to address HIV/AIDS issues of gay and transgender individuals in Thailand, Lady Boys, Tom Boys, Rent Boys will help you increase awareness about HIV/AIDS and create successful intervention programs for clients.

Bangkok & Beyond Travel Adventures -

Christopher Evans 2011-04-15

Here is a guide to the most amazing city in Thailand, perhaps in all of the Far East - Bangkok - and to all the surrounding sites. This is based on sections extracted from the more comprehensive Hunter guide to the number-one tourist destination in Southeast Asia. The finest hotels, with impeccable service, cost a fraction of what you would pay elsewhere, and shoppers will never tire of the vast selections, from silk scarves and designer gowns to exotic jewelry. Try elephant trekking, sea canoeing or Thai massage. Taste the exquisite cuisine, explore mystic temples (30,000 of them!) and sail to unspoiled islands. "The Adventure Guides" are about living more intensely, waking up to your surroundings and truly experiencing all that you encounter. The regional chapters take you on an introductory tour, with stops at museums, historic sites and local attractions. Places to stay and eat; transportation to, from and around your
