[It's Not You, It's Biology. - Joe Quirk 2008-09-02](#)

At last, here's what you should've learned in high school biology! This paperback edition is an Everyman's humorous look at the real differences—biological, historical, psychological—between men and women...with fun and provocative insight into what really drives behavior and interactions between men and women. Men talk about women to men. Women talk about men to women. Men and women talk to each other (or try to) about relationships. It's Not You, It's Biology provides insight, ammunition, snappy comebacks, and interesting cocktail party banter for everyone who ever wondered why we do what we do vis-a-vis the opposite sex. It's Freakonomics for the Relationship-Challenged.

The Female Brain - Louann Brizendine 2009-05-04

Accessible, fun and compelling, and based on more than three decades of research, The Female Brain will help women to better understand themselves - and the men in their lives. In this groundbreaking book, Dr Louann Brizendine describes the uniquely flexible structure of the female brain and its constant, dynamic state of change - the key difference that separates it from that of the male - and reveals how women think, what they value, how they communicate, and whom they'll love. She also reveals the neurological explanations behind why... - A woman remembers fights that a man insists never happened... - Thoughts about sex enter a woman's brain perhaps once every couple of days, but may enter a man's brain up to once every minute... - A woman's brain goes on

high alert during pregnancy - and stays that way long after giving birth...
- A woman over 50 is more likely to initiate divorce than a man... -

Women tend to know what people are feeling, while men can't spot an emotion unless someone cries or threatens them with bodily harm!
