Forensic GIS - Gregory A. Elmes 2014-07-08

A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technologies vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.

Children, Parents, and the Law - Leslie Joan Harris 2019-09-13

This very teachable book is ideal for child-focused courses that deal with the juvenile justice system and the child welfare system or with the legal position of children within their families and society. The Fourth Edition is updated with case law and legislation current through mid-2019, including the Supreme Court's latest decisions on special education, constitutional limits on punishing minors, new materials on conflicts between parents and state authorities over school curriculum, faith healing, and compulsory vaccination, as well as on the free speech and free exercise rights of students. The chapters on delinquency explore why the new understanding of how and when adolescents mature is revolutionizing the law, and the unit on child abuse and neglect and the child welfare system covers new state and federal legislation, as well as cases from around the country that examine the tension between

protecting children's relationships with their families and protecting them from harm. New to the Fourth Edition: The Supreme Court's latest special education decisions Cases challenging new, tough legislation eliminating exceptions to vaccination requirements More in-depth examination of the conflict between students' free speech rights and schools' anti-bullying initiatives The "Making a Murderer" case as a vehicle for analyzing limits on police interrogation of juveniles Cases exploring how Troxel affects child abuse and neglect cases Professors and students will benefit from: Problem exercises throughout the book—some short and others longer and more complex An interdisciplinary approach that incorporates information from related social sciences such as psychology and sociology Balanced perspective and coverage of issues, with no perceptible liberal or conservative bias in tone or selection of topics Ample coverage of juvenile courts Logical organization and clear structure that make it suitable for a variety of teaching styles Teaching materials include: Teacher's Manual Sample interim assessment problems

Victims in Criminal Procedure - Douglas E. Beloof 2006

In the new and revised 2005 edition of this outstanding casebook, authors Professor Doug Beloof, Judge Paul Cassell, and victims attorney Stephen Twist review the expanding role of the crime victim in criminal procedure. Crime victims law has been neglected in the education of law students even though it represents the single greatest revolution in criminal procedure in the last twenty years. The book addresses that neglect and provides lively and provocative materials about how victims

fit into the contemporary criminal justice process. The casebook examines the role of the crime victim from the early stages of the criminal process (investigation and charging) through pre-trial discovery, plea bargaining, trial, and sentencing. The book includes not only recent caselaw concerning crime victims' rights, but also law review articles, victim impact statements, and other interesting materials. The authors provides the perfect set of reading materials for a full course on victims law, a seminar style discussion class, or supplemental materials for a conventional criminal procedure course. A teacher's manual will be available.

Handbook of Public Protection - Mike Nash 2010-09-27

Public protection has become an increasingly central theme in the work of the criminal justice agencies in many parts of the world in recent years. Its high public profile and consequent political sensitivity means that growing numbers of criminal justice professionals find their daily work load dominated by the assessment and management of high risk of harm offenders. Developments such as sex offender registers and (in the UK) Multi Agency Public Protection Arrangements (Mappa) have made this issue not only a core activity for police, probation and prison services, but to a range of other organizations as well, in particular social work and the health services. Partnership has become central to the concept of public protection. At the same time the concept of public protection has occasioned increased political debate. Protecting the public from high risk or dangerous offenders has become an international issue and has increasingly shaped criminal justice policy. This text brings together leading authorities in the field, providing authoritative coverage of the theory and practice of public protection, both in the UK and internationally. It provides a critical review of

contemporary public protection practice as well as up-to-date research and thinking in the field.
