The Archaeology of Childhood Jane Eva Baxter 2005 The study of children and childhood in historical and prehistoric life is an overlooked area of study that Jane Baxter addresses in this brief book. Her timely contribution stresses the importance of studying children as active participants in past cultures, instead of regarding them mainly for their effect on adult life. Using the critical concepts of gender and socialization, she develops new theoretical and methodological approaches for the archaeological study of this large but invisible population. Baxter presents examples from the analysis of toys, miniatures, and other objects traditionally associated with children, from the gendered distribution of activity space, from the remains of children-as-apprentices, and from mortuary evidence. Baxter's work will aid archaeologists bring a more nuanced understanding of children's role in the historical and archaeological record.

Ambiguous Images Kelley Hays-Gilpin 2004 A significant contribution to the relatively unexplored field of gender in rock art, this volume contains information for those interested in past gender systems. Hays-Gilpin argues that art is both a product of its physical and social environment and a tool of influence in shaping behavior and ideas within a society. Rock art is often one of the strongest lines of evidence available to scholars in understanding ritual practices, gender roles, and ideological constructs of prehistoric peoples.

The Neolithic Revolution in the Near East Alan H. Simmons 2011-04-15 One of humanity's most

important milestones was the transition from hunting and gathering to food production and permanent village life. This Neolithic Revolution first occurred in the Near East, changing the way humans interacted with their environment and each other, setting the stage, ultimately, for the modern world. Based on more than thirty years of fieldwork, this timely volume examines the Neolithic Revolution in the Levantine Near East and the Mediterranean island of Cyprus. Alan H. Simmons explores recent research regarding the emergence of Neolithic populations, using both environmental and theoretical contexts, and incorporates specific case studies based on his own excavations. In clear and graceful prose, Simmons traces chronological and regional differences within this land of immense environmental contrasts—woodland, steppe, and desert. He argues that the Neolithic Revolution can be seen in a variety of economic, demographic, and social guises and that it lacked a single common stimulus. Each chapter includes sections on history, terminology, geographic range, specific domesticated species, the composition of early villages and households, and the development of social, symbolic, and religious behavior. Most chapters include at least one case study and conclude with a concise summary. In addition, Simmons presents a unique chapter on the island of Cyprus, where intriguing new research challenges assumptions about the impact and extent of the Neolithic. The Neolithic Revolution in the Near East conveys the diversity of our Neolithic ancestors, providing a better understanding of the period and the new social order that arose because of it. This insightful volume will be especially useful to Near Eastern scholars and to students of archaeology and the origins of agriculture.

Case Studies in Environmental Archaeology Elizabeth Reitz 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology. The book uses case studies to resolve questions related to human behavior in the past

rather than to demonstrate the application of methods. Each chapter is an original or revised work by an internationally-recognized scientist. This second edition is based on the 1996 book of the same title. The editors have invited back a number of contributors from the first edition to revise and update their chapter. New studies are included in order to cover recent developments in the field or additional pertinent topics.

Sources and Interpretation in Ancient Judaism Meron Piotrkowski 2018-07-17 *Sources and Interpretation in Ancient Judaism* is a Festschrift in honor of Prof. Tal Ilan. The essays reflect realms within the broad field of Ancient Judaism that are central to Ilan's scholarship: Second Temple literary sources and history, Gender, Jewish papyrology and rabbinic literature.

The Story of Work Jan Lucassen 2021-07-27 The first truly global history of work, an upbeat assessment from the age of the hunter-gatherer to the present day We work because we have to, but also because we like it: from hunting-gathering over 700,000 years ago to the present era of zoom meetings, humans have always worked to make the world around them serve their needs. Jan Lucassen provides an inclusive history of humanity's busy labor throughout the ages. Spanning China, India, Africa, the Americas, and Europe, Lucassen looks at the ways in which humanity organizes work: in the household, the tribe, the city, and the state. He examines how labor is split between men, women, and children; the watershed moment of the invention of money; the collective action of workers; and at the impact of migration, slavery, and the idea of leisure. From peasant farmers in the first agrarian societies to the precarious existence of today's gig workers, this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today.

Agency and Identity in the Ancient Near East Sharon R. Steadman 2016-04-01 Agency theory

examines the relationship between individuals or groups when one party is doing work on behalf of another. 'Agency and Identity in the Ancient Near East' offers a theoretical study of agency and identity in Near Eastern archaeology, an area which until now has been largely ignored by archaeologists. The book explores how agency theory can be employed in reconstructing the meaning of spaces and material culture, how agency and identity intersect, and how the availability of a textual corpus may impact on the agency approach. Ranging from the Neolithic to the Islamic period, 'Agency and Identity in the Ancient Near East' covers sites located in Turkey, Iraq, Syria, Jordan, Palestine, and Israel. The volume includes contributions from philology, art, history, computer simulation studies, materials science, and the archaeology of settlement and architecture.

Neolithic Susan McCarter 2012-11-12 This excellent introductory textbook describes and explains the origins of modern culture- the dawn of agriculture in the Neolithic area. Written in an easy-to-read style, this lively and engaging book familiarises the reader with essential archaeological and genetic terms and concepts, explores the latest evidence from scientific analyses as varied as deep sea coring, pollen identification, radiometric dating and DNA research, condensing them into an up-to-date academic account, specifically written to be clear even the novice reader. Focusing primarily on sites in southwest Asia, Neolithic addresses questions such as: Which plants and animals were the first to be domesticated, and how? How did life change when people began farming? What were the first villages like? What do we know about the social, political and religious life of these newly founded societies? What happened to human health as a result of the Neolithic Revolution? Lavishly illustrated with almost a hundred images, this enjoyable book is an ideal introduction both for students of archaeology and for general readers interested in our past.

This volume is the first text to focus specifically on the archaeology of domestic architecture. Covering major theoretical and methodological developments over recent decades in areas like social institutions, settlement types, gender, status, and power, this book addresses the developing understanding of where and how people in the past created and used domestic space. It will be a useful synthesis for scholars and an ideal text for advanced undergraduate and graduate courses in archaeology and architecture. The book covers the relationship of architectural decisions of ancient peoples with our understanding of social and cultural institutions; includes cases from every continent and all time periods-- from the Paleolithic of Europe to present-day African villages; is ideal for the growing number of courses on household archaeology, social archaeology, and historical and vernacular architecture.

Pilgrimage and Household in the Ancient Near East Joy McCorriston 2011-03-14 Examines the continuity of traditions over millennia in the Near East by focusing on the traditions of pilgrimage and household.

Gender and Chinese Archaeology Katheryn M. Linduff 2004 A collection of articles in which the contributors analyze and reconstruct the roles of women in various regions of China from the late Neolithic to the early Empire period. Topics include mortuary ritual, social status and structures of power, economic influences on cultural practice, textile production, and art in early Chinese societies.

The Body as Material Culture Joanna R. Sofaer 2006-02-16 Bodies intrigue us. They promise windows into the past that other archaeological finds cannot by bringing us literally face to face with history. Yet 'the body' is also highly contested. Archaeological bodies are studied through two contrasting perspectives that sit on different sides of a disciplinary divide. On one hand lie science-

based osteoarchaeological approaches. On the other lie understandings derived from recent developments in social theory that increasingly view the body as a social construction. Through a close examination of disciplinary practice, Joanna Sofaer highlights the tensions and possibilities offered by one particular kind of archaeological body, the human skeleton, with particular regard to the study of gender and age. Using a range of examples, she argues for reassessment of the role of the skeletal body in archaeological practice, and develops a theoretical framework for bioarchaeology based on the materiality and historicity of human remains.

Gender in Ancient Cyprus Diane Bolger 2003 Gender in Ancient Cyprus examines some of the fundamental facets of gender as they intersect with the dynamics of social, political, and economic change in Cyprus, beginning with the earliest traces of human habitation on the island to the final phases of the Bronze Age. The book closely analyzes gender as it relates to the domestic space, technology and labor, ritual and social identity, and the roles of children, as well as the practices of modern day Near Eastern archaeology and the roles of women in it. Assembling Archaeology Hannah Cobb 2020-02-27 Assembling Archaeology provides a radical rethinking of the relationships between teaching, researching, digging, and practicing as an archaeologist in the 21st century. The issues addressed here are global and applicable wherever archaeology is taught, practiced, and researched. At its heart this book addresses the undervaluation of teaching, demonstrating that this affects the fundamentals of contemporary

archaeological practice and is particularly connected to the lack of diversity in disciplinary demographics. It proposes a solution which is grounded in a theoretical rethinking of archaeological teaching, training, and practice by advocating a holistic 'assemblage' approach which challenges traditional power structures and the global marketization of the higher education system. Drawing on insights from archaeology's current material turn, this book approaches the discipline as a subject of investigation and offers a new perspective founded upon the notion of the learning assemblage, which resituates teaching and learning as a central focus and contributes to broader discourses on critical pedagogy and rhizomatic learning. It ultimately argues for a robust archaeological pedagogy that is rooted in and emergent from the material realities of the profession, and will be valuable to everyone from academia to Cultural Resource Management (CRM), heritage professional to undergraduate student.

The Oxford Encyclopedia of Women in World History Bonnie G. Smith 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive, 4-volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical, social, or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences, and illuminates how women

worldwide have influenced and been influenced by these historical, social, and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies; geography and history; comparative culture and society, including adoption, abortion, performing arts; organizations and movements, such as the Egyptian Uprising, and the Paris Commune; womens and gender studies; and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued, go-to resource for scholars, college and high school students, and general readers alike.

Women in Antiquity Sarah M. Nelson 2007 Archaeology is one of our most powerful sources of new information about the past, about the lives of our ancient and not-so-ancient ancestors. The contributors to *Women in Antiquity* consider the theoretical problems involved in discerning what the archaeological evidence tells us about gender roles in antiquity. The book includes chapters on the history of gender research, historical texts, mortuary analysis, household remains, hierarchy, and ethnoarchaeology, with each chapter teasing out the inherent difficulty in interpreting ancient evidence as well as the promise of new understanding. *Women in Antiquity* offers a fresh, accessible account of how we might grasp the ways in which sexual roles and identities shaped the past.

The Funeral Kit Jill L Baker 2016-06-03 Studies of mortuary archaeology tend to focus on difference—how the researcher can identify age, gender, status, and ethnicity from the contents of a burial. Jill L. Baker’s innovative approach begins from the opposite point: how can you recognize the commonalities of a culture from the “funeral kit” that occurs in all burials, irrespective of status differences? And what do those commonalities have to say about the world view and religious beliefs of that culture? Baker begins with the Middle and Late Bronze Age tombs in the southern Levant,

then expands her scope in ever widening circles to create a general model of the funeral kit of use to archaeologists in a wide variety of cultures and settings. The volume will be of equal value to specialists in Near Eastern archaeology and those who study mortuary remains in ancient cultures worldwide.

Gender in History Merry E. Wiesner-Hanks 2011-06-24 Updated with new material to reflect the latest developments in the field, *Gender in History: Global Perspectives*, 2nd Edition, provides a concise overview of the construction of gender in world cultures from the Paleolithic era to modern times. Includes examples drawn from the most recent scholarship relating to a diverse range of cultures, from Ancient Mesopotamia to post-Soviet Russia, and from the Igbo of Nigeria, to the

Iroquois of north eastern North America. Reflects new developments in the field with added coverage of primates, slavery, colonialism, masculinity, and transgender issues Features significant discussion of the Paleolithic and Neolithic periods, an important trend in the study of world history Lays out key theoretical and methodological issues in an introduction that is written in accessible language Supplementary material for instructors and students available at www.wiley.com/go/wiesnerhanks

Identity and Subsistence Sarah M. Nelson 2007 Throughout human history, gender has served as one of the ways in which human beings form their identities and then make their way in the world. But it is not the only way: We also discover ourselves through race, age, class, and other categories. Increasingly, archaeologists are recovering evidence of the ways in which gender has been important in identity-formation in the past, especially in its interaction with other social factors. In *Identity and Subsistence*, a number of scholars look at how the idea of gender has worked with respect to the formation of the self, masculinity and femininity, human evolution, and the development of early agrarian and pastoralist societies.

Sexual Revolutions Jane Peterson 2002-09-18 The change from a hunting-gathering lifestyle to one dependent upon farming constitutes a truly 'revolutionary' event in the human career. Most archaeologists agree that how ancient people organized their work and family groups was crucial to the success of early attempts at farming. Yet little serious attention has been paid to the social organization of labor in the prehistoric past. This book addresses that lacuna by investigating sexual divisions of labor. As a case study, Peterson chose the southern Levant of West Asia, where the world's first farming societies emerged some 10,000 years ago. Shattering long held assumptions about women's work that lead to generalizations about gender roles, Peterson shows that gender

studies can be both scientific and thoroughly grounded in feminist theory.

The Social Archaeology of Funerary Remains Rebecca Gowland 2009-04-06 Human bones form the most direct link to understanding how people lived in the past, who they were and where they came from. The interpretative value of human skeletal remains (within their burial context) in terms of past social identity and organisation is awesome, but was, for many years, underexploited by archaeologists. The nineteen papers in this edited volume are an attempt to redress this by marrying the cultural aspects of burial with the anthropology of the deceased.

Feast Martin Jones 2008-04-10 Is sharing food such an everyday, unremarkable occurrence? In fact, the human tendency to sit together peacefully over food is actually rather an extraordinary phenomenon, and one which many species find impossible. It is also a phenomenon with far-reaching consequences for the global environment and human social evolution. So how did this strange and powerful behaviour come about? In *Feast*, Martin Jones uses the latest archaeological methods to illuminate how humans came to share food in the first place and how the human meal has developed since then. From the earliest evidence of human consumption around half a million years ago to the era of the TV dinner and the drive-through diner, this fascinating account unfolds the history of the human meal and its huge impact both on human society and the ecology of the planet.

“And in Length of Days Understanding” (Job 12:12) Erez Ben-Yosef 2023-09-02 This two-volume book presents cutting-edge archaeological research, primarily as practiced in the Eastern Mediterranean region. These volumes’ key foci are inspired by the work of Thomas E. Levy. Volume 1 provides an in-depth look at new archaeological research in the southern Levant (primarily in modern Israel and Jordan) inspired by Levy’s commitment to understanding social, political, and

economic processes in a long-term or “deep time” perspective. Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science. Volume 1 is organized around two major themes: 1) the later prehistory of the southern Levant, or the Neolithic, Chalcolithic, and Bronze Age, and 2) new research in biblical archaeology, or the historical archaeology of the Iron Age. Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions. Volume 2 is organized around five major themes: 1) the archaeology of the Faynan copper ore district of southern Jordan, a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade, 2) new research in archaeometallurgy beyond the Faynan region, 3) marine and maritime archaeology, focusing on issues of trade and environmental change, 4) cyber-archaeology, an important 21st century field Levy conceived as “the marriage of archaeology, engineering, computer science, and the natural sciences,” and 5) key issues in anthropological archaeological theory. In addition to presenting the reader with an up-to-date view of research in each of these areas, the volume also has chapters exploring the connections between these themes, e.g. the maritime trade of metals and cyber-/digital archaeological approaches to metallurgy. The work contains contributions from both up-and-coming early career researchers and key established figures in their fields. This book is an essential reference for archaeologists and scholars in related disciplines working in the southern Levant and the Eastern Mediterranean.

New Approaches to Old Stones Yorke M. Rowan 2016-04-08 Ground stone artefacts were widely used in food production in prehistory. However, the archaeological community has widely neglected the dataset of ground stone artefacts until now. 'New Approaches to Old Stones' offers a theoretical and methodological analysis of the archaeological data pertaining to ground stone tools. The essays

draw on a range of case studies - from the Levant, Egypt, Crete, Anatolia, Mexico and North America - to examine ground stone technologies. From medieval Islamic stone cooking vessels and late Minoan stone vases, to the use of stone in ritual and as a symbol of luxury, 'New Approaches to Old Stones' offers a radical reassessment of the impact of ground-stone artefacts on technological change, production and exchange.

The Goddess and the Bull Michael Balter 2016-06-16 Veteran science writer Michael Balter skillfully weaves together many threads in this fascinating book about one of archaeology's most legendary sites— Çatalhöyük. First excavated forty years ago, the site is justly revered by prehistorians, art historians, and New Age goddess worshippers alike for its spectacular finds dating almost 10,000 years ago. Archaeological maverick Ian Hodder, leader of the recent re-excavation at this Turkish mound, designated Balter as the project's biographer. The result is a skillful telling of many stories about both past and present: of the inhabitants of Neolithic Çatalhöyük and the development of human creativity and ingenuity, as revealed in the recent excavation; of James Mellaart, the original excavator, whose troubles off the mound eventually overshadowed his incisive work at the site; of Hodder and his intense, brilliant crew who marveled and squabbled over the meaning of finds in dusty trenches while attempting to reinterpret Mellaart's work; and of the recent history of the theory and methods of archaeology itself. Part story of the human past, part soap opera of modern scholarly life, part textbook on the practice of modern archaeology, this book should appeal to general readers and archaeological students alike.

Archaeology and Women Sue Hamilton 2016-09-16 Archaeology and Women draws together from a variety of angles work currently being done within a contemporary framework on women in archaeology. One section of this collection of original articles addresses the historical and

contemporary roles of women in the discipline. Another attempts to link contemporary archaeological theory and practice to work on women and gender in other fields. Finally, this volume presents a wide diversity of theoretical approaches and methods of study of women in the ancient world, representing a cross section of work being carried out today under the broad banner of gender archaeology. The geographical and chronological range of the contributions is also wide, from Southeast Asia and South America to Western Asia, Egypt and Europe, from Great Britain to Greece, and from 10,000 years ago to the recent past. An ideal sampler for courses dealing with women and archaeology.

The Archaeology of Iran from the Palaeolithic to the Achaemenid Empire Roger Matthews

2022-06-30 The Archaeology of Iran from the Palaeolithic to the Achaemenid Empire is the first modern academic study to provide a synthetic, diachronic analysis of the archaeology and early history of all of Iran from the Palaeolithic period to the end of the Achaemenid Empire at 330 BC. Drawing on the authors' deep experience and engagement in the world of Iranian archaeology, and in particular on Iran-based academic networks and collaborations, this book situates the archaeological evidence from Iran within a framework of issues and debates of relevance today. Such topics include human-environment interactions, climate change and societal fragility, the challenges of urban living, individual and social identity, gender roles and status, the development of technology and craft specialisation and the significance of early bureaucratic practices such as counting, writing and sealing within the context of evolving societal formations. Richly adorned with more than 500 illustrations, many of them in colour, and accompanied by a bibliography with more than 3000 entries, this book will be appreciated as a major research resource for anyone concerned to learn more about the role of ancient Iran in shaping the modern world.

Women's Lives in Biblical Times Jennie R. Ebeling 2010-04-07 This volume describes the lifecycle events and daily life activities experienced by girls and women in ancient Israel examining recent biblical scholarship and other textual evidence from the ancient Near East and Egypt including archaeological, iconographic and ethnographic data. From this Ebeling creates a detailed, accessible description of the lives of women living in the central highland villages of Iron Age I (ca. 1200-1000 BCE) Israel. The book opens with an introduction that provides a brief historical survey of Iron Age (ca. 1200-586 BCE) Israel, a discussion of the problems involved in using the Hebrew Bible as a source, a rationale for the project and a brief narrative of one woman's life in ancient Israel to put the events described in the book into context. It continues with seven thematic chapters that chronicle her life, focusing on the specific events, customs, crafts, technologies and other activities in which an Israelite female would have participated on a daily basis.

Gender and Hide Production Lisa Frink 2006 Hide production is one of the oldest crafts known to humans. Yet this is the first volume to critically explore the gendered nature of this universal activity amongst hunters-gatherers for its meaning in craft production, status, identity and cultural change. Using ethnoarchaeological and archaeological examples from North America and Africa, the authors provide new insights of the gendered nature of human behavior.

Sexual Revolutions Jane Peterson 2002 Description, based upon research evidence from the Near East and elsewhere, of the change in the gendered division of labor during the Neolithic agricultural revolution.

Bioarchaeology and Behavior Megan A. Perry 2018-02-19 While mortuary ruins have long fascinated archaeologists and art historians interested in the cultures of the Near East and eastern Mediterranean, the human skeletal remains contained in the tombs of this region have garnered less

attention. In *Bioarchaeology and Behavior*, Megan Perry presents a collection of essays that aim a spotlight on the investigation of the ancient inhabitants of the circum-Mediterranean area. Composed of eight diverse papers, this volume synthesizes recent research on human skeletal remains and their archaeological and historical contexts in this region. Utilizing an environmental, social, and political framework, the contributors present scholarly case studies on such topics as the region's mortuary archaeology, genetic investigations of migration patterns, and the ancient populations' health, disease, and diet. Other key anthropological issues addressed in this volume include the effects of the domestication of plants and animals, the rise of state-level formations, and the role of religion in society. Ultimately, this collection will provide anthropologists, archaeologists, and bioarchaeologists with an important foundation for future research in the Near East and eastern Mediterranean.

Understanding Sexual Revolutions Gender And Labor At The Dawn Of Agriculture

Before you embark on your journey to find Sexual Revolutions Gender And Labor At The Dawn Of Agriculture online, it's essential to grasp the concept of Sexual Revolutions Gender And Labor At The Dawn Of Agriculture eBook formats. Sexual Revolutions Gender And Labor At The Dawn Of Agriculture come in various formats, each with its own unique features and compatibility. Understanding these formats will help you choose the right one for your device and preferences.

Different Sexual Revolutions Gender And Labor At The Dawn Of Agriculture eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have

limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Sexual Revolutions Gender And Labor At The Dawn Of Agriculture eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable

for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.

Understanding Sexual Revolutions Gender And Labor At The Dawn Of Agriculture eBook formats and their compatibility will help you make informed decisions when choosing where
