"Entirely original. . . . All future texts on modern Germany will have to take on board the findings of this major study."--Volker Berghahn, author of *Modern Germany*

The Western Case for Monogamy Over Polygamy - John Witte, Jr 2015-05-05

This volume documents the Western historical arguments for monogamy over polygamy, from antiquity to the present.

Appealing to Justice - Kitty Calavita 2015

Having gained unique access to California prisoners and corrections officials and to thousands of prisoners' written grievances and institutional responses, Kitty Calavita and Valerie Jenness take us inside one of the most significant, yet largely invisible, institutions in the United States. Drawing on sometimes startlingly candid interviews with prisoners and prison staff, as well as on official records, the authors walk us through the byzantine grievance process, which begins with prisoners filing claims and ends after four levels of review, with corrections officials usually denying requests for remedies. *Appealing to Justice* is both an unprecedented study of disputing in an extremely asymmetrical setting and a rare glimpse of daily life inside this most closed of institutions. Quoting extensively from their interviews with prisoners and officials, the authors give voice to those who are almost never heard from. These voices unsettle conventional wisdoms within the sociological literature—for example, about the reluctance of vulnerable and/or stigmatized populations to name injuries and file claims, and about the relentlessly adversarial subjectivities of prisoners and correctional officials—and they do so with striking poignancy. Ultimately, *Appealing to Justice* reveals a system fraught with impediments and dilemmas, which delivers neither justice, nor efficiency, nor constitutional conditions of confinement.

**Fairy Tale Films** - Pauline Greenhill 2010-08-06

In this, the first collection of essays to address the development of fairy tale film as a genre, Pauline Greenhill and Sidney Eve Matrix stress, "the mirror of fairy-tale film reflects not so much what its audience members actually are but how they see themselves and their potential to develop (or, likewise, to regress)." As Jack Zipes says further in the foreword, "Folk and fairy tales pervade our lives constantly through television soap operas and commercials, in comic books and cartoons, in school plays and storytelling performances, in our superstitions and prayers for miracles, and in our dreams and daydreams. The artistic re-creations of fairy-tale plots and characters in film—the parodies, the aesthetic experimentation, and the mixing of genres to engender new insights into art and life—mirror possibilities of estranging ourselves from designated roles, along with the conventional patterns of the classical tales." Here, scholars from film, folklore, and cultural studies move discussion beyond the well-known Disney movies to the many other filmic adaptations of fairy tales and to the widespread use of fairy tale tropes, themes, and motifs in cinema.

**In Search of Common Ground on Abortion** - Dr Justin Murray 2014-03-28

This book brings together academics, legal practitioners and activists with a wide range of pro-choice, pro-life and other views to explore the possibilities for cultural, philosophical, moral and political common ground on the subjects of abortion and reproductive justice more generally. It aims to rethink polarized positions on sexuality, morality, religion and law, in relation to abortion, as a way of laying the groundwork for productive and collaborative dialogue. Edited by a leading figure on gender issues and emerging voices in the quest for reproductive justice - a broad concept that encompasses the interests of men, women and children alike - the contributions both search for 'common ground' between opposing positions in our struggles around abortion, and seek to bring balance to these contentious debates. The book will be valuable to anyone interested in law and society, gender and religious studies and philosophy and theory of law.

Geology at ANU (1959 - 2009) - Mike Rickard 2010-12-01

This history was undertaken to celebrate the 50th anniversary of the Geology Department at ANU, and to honour its founding professor David

A. Brown. It includes contributions from some 100 former students outlining their career successes. This history was compiled by Dr Mike Rickard, a staff member of the Department of Geology from 1963 to 1997, who also served as Head of Department for seven years. He graduated BSc and PhD from Imperial College London in 1957 and has specialised in mapping the structure of mountain chains in Ireland, Canada, Norway, and southern South America. He also mapped volcanic rocks for the Geological Survey of Fiji. He taught Structural Geology and Tectonics and has supervised field work in south eastern and central Australia. After retirement he has taught USA courses in Earth Science.

**The Grand Domestic Revolution** - Dolores Hayden 1982-06-17

"This is a book that is full of things I have never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, *The New York Times Book Review* Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent women, who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history of a little-known intellectual tradition challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

**Polygamy's Rights and Wrongs** - Gillian Calder 2013-12-01

Assumptions about the harmful nature of polygamy have left little room for debate, with monogamy coming to represent a hallmark of advanced societies, and polygamy the immoral alternative. Yet in this volume, eleven scholars ask whether this condemnation is justified by examining, among other perspectives, the lived experiences of polygamous families. In essays that fearlessly face difficult questions of choice, dignity, and love, the authors seek to complicate a conversation that is more often simplified. Thoughtful and persuasive, *Polygamy's Rights and Wrongs* is both a close consideration of polygamy and a challenging reflection on the ways in which we value family and intimacy.

Mapping the Legal Boundaries of Belonging - René Provost 2014

Provost argues that the intersection between religion, nationalism, and other vectors of difference in both Canada and Israel offers a revealing laboratory in which to examine multiculturalism in particular and the governance of diversity in general. For several decades, 'culture' played

a central role in challenging the liberal tradition. More recently, religion seems to have re-emerged as the new central challenge facing Western liberal societies' conception of multiculturalism.

**Beside You in Time** - Elizabeth Freeman 2019-09-06

In *Beside You in Time* Elizabeth Freeman expands biopolitical and queer theory by outlining a temporal view of the long nineteenth century. Drawing on Foucauldian notions of discipline as a regime that yoked the human body to time, Freeman shows how time became a social and sensory means by which people assembled into groups in ways that resisted disciplinary forces. She tracks temporalized bodies across many entangled regimes—religion, secularity, race, historiography, health, and sexuality—and examines how those bodies act in relation to those regimes. In analyses of the use of rhythmic dance by the Shakers; African American slave narratives; literature by Mark Twain, Pauline Hopkins, Herman Melville, and others; and how Catholic sacraments conjoined people across historical boundaries, Freeman makes the case for the body as an instrument of what she calls queer hypersociality. As a mode of being in which bodies are connected to others and their histories across and throughout time, queer hypersociality, Freeman contends, provides the means for subjugated bodies to escape disciplinary regimes of time and to create new social worlds.

**The New Criminal Justice Thinking** - Sharon Dolovich 2017-03-28

A vital collection for reforming criminal justice After five decades of punitive expansion, the entire U.S. criminal justice system— mass incarceration, the War on Drugs, police practices, the treatment of juveniles and the mentally ill, glaring racial disparity, the death penalty and more — faces challenging questions. What exactly is criminal justice? How much of it is a system of law and how much is a collection of situational social practices? What roles do the Constitution and the Supreme Court play? How do race and gender shape outcomes? How does change happen, and what changes or adaptations should be pursued? *The New Criminal Justice Thinking* addresses the challenges of this historic moment by asking essential theoretical and practical questions about how the criminal system operates. In this thorough and thoughtful volume, scholars from across the disciplines of legal theory, sociology, criminology, Critical Race Theory, and organizational theory offer crucial insights into how the criminal system works in both theory and practice. By engaging both classic issues and new understandings, this volume offers a comprehensive framework for thinking about the modern justice system. For those interested in criminal law and justice, *The New Criminal Justice Thinking* offers a profound discussion of the complexities of our deeply flawed criminal justice system, complexities that neither legal theory nor social science can answer alone.

**Law, Culture and Society** - Roger Cotterrell 2017-10-03

This book presents a distinctive approach to the study of law in society, focusing on the sociological interpretation of legal ideas. It surveys the development of connections between legal studies and social theory and locates its approach in relation to sociolegal studies on the one hand and legal philosophy on the other. It is suggested that the concept of law must be re-considered. Law has to be seen today not just as the law of the nation state, or international law that links nation states, but also as transnational law in many forms. A legal pluralist approach is not just a matter of redefining law in legal theory; it also recognizes that law's authority comes from a plurality of diverse, sometimes conflicting, social sources. The book suggests that the social environment in which law operates must also be rethought, with many implications for comparative legal studies. The nature and boundaries of culture become important problems, while the concept of multiculturalism points to the cultural diversity of populations and to problems of fragmentation, or perhaps to new kinds of unity of the social. Theories of globalization raise a host of issues about the integrity of societies and about the need to understand social networks and forces that extend beyond the political societies of nation states. Through a range of specific studies, closely interrelated and building on each other, the book seeks to integrate the sociology of law with other kinds of legal analysis and engages directly with current juristic debates in legal theory and comparative law.

**Surrogacy in Canada** - Vanessa Gruben 2018-11-28

This book brings together a range of perspectives on the governance of surrogacy in Canada. It offers insight into how to address the challenges of regulating, and how to (re)think the governance of surrogacy in ways that address the health, well-being, and autonomy of surrogates. It also provides long-awaited data about how surrogacy is occurring.

**Communication and Bioethics at the End of Life** - Lori A. Roscoe 2017-12-07

This casebook provides a set of cases that reveal the current complexity

of medical decision-making, ethical reasoning, and communication at the end of life for hospitalized patients and those who care for and about them. End-of-life issues are a controversial part of medical practice and of everyday life. Working through these cases illuminates both the practical and philosophical challenges presented by the moral problems that surface in contemporary end-of-life care. Each case involved real people, with varying goals and constraints, who tried to make the best decisions possible under demanding conditions. Though there were no easy solutions, nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end-of-life care can continue to improve. This advanced casebook is a must-read for medical and nursing students, students in the allied health professions, health communication scholars, bioethicists, those studying hospital and public administration, as well as for practicing physicians and educators. *Government Response to the Report from the House of Commons Science and Technology Committee* - Great Britain: Department of Health 2005-08-16

Sets out the Government's response to the 104 recommendations made in the Commons Science and Technology Select Committee report of their year long inquiry into options for the future regulation of human reproductive technologies in the UK.

**Vulnerability** - Dr Anna Grear 2014-01-28

This book draws together major British and American scholars who present different perspectives on the concept of vulnerability and Fineman's 'vulnerability thesis'. The collection demonstrates the broad and intellectually exciting potential of vulnerability as a theoretical foundation for legal and political engagements with a range of urgent contemporary challenges. Exploring ways in which vulnerability might provide a new ethical foundation for law and politics, it is of interest to the general reader, as well as academics and students in fields such as jurisprudence, philosophy, legal theory, political theory, feminist theory, and ethics.

**Autobiography of a Sex Worker** - Nalini Jameela 2007

Sex workers are free in four respects: we don't have to cook for a husband; we don't have to wash his dirty clothes; we don't have to ask for his permission to raise our kids as we deem fit; we don't have to run after a husband claiming rights to his property.? Fiery, outspoken and often wickedly funny, this candid account of one woman's life as a sex worker in Kerala became a bestseller when it was first published in Malayalam. Nalini Jameela, who takes her name from both Hindu and Muslim traditions, worked as a child in the clay mines. She has been a wife, mother, successful business woman and social activist ? as well as a sex worker ? at different stages of her life. This is Nalini Jameela's story, told in her inimitably honest and down- to-earth style, of her search for dignity, empowerment and freedom on her own terms.

**Sister Wives, Surrogates and Sex Workers** - Angela Campbell 2016-04-01

Did she choose that?' Or, more normatively, 'Why would she choose that?' This book critiques and offers an alternative to these questions, which have traditionally framed law and policy discussions circulating around controversial genderized practices. It examines the simplicity and incompleteness of choice-based rhetoric and of presumptions that women's conduct is shaped, in an absolute way, either by choice or by coercion. This book develops an analytical framework that aims to discern the meaning and value that women may ascribe to morally ambiguous practices. An analysis of law's approach to polygamy, surrogacy and sex work, particularly in Canada, the United Kingdom and Australia, provides a basis for evaluating the choice-coercion binary and for contemplating alternate modes for assessing, from a law and policy standpoint, the palatability of social practices that appear pernicious to women. Weaving together interdisciplinary research, an innovative analytical framework for assessing choices ostensibly harmful to women, and a critique of the legal rules governing such choices, this book bears relevance for students, scholars, practicing jurists and policymakers seeking a richer understanding of conduct that moves women to the margins of law and society.

**Clinical Ethics in Pediatrics** - Douglas S. Diekema 2011-09-08

This volume provides a practical overview of the ethical issues arising in pediatric practice. The case-based approach grounds the bioethical concepts in real-life situations, covering a broad range of important and controversial topics, including informed consent, confidentiality, truthfulness and fidelity, ethical issues relating to perinatology and neonatology, end-of-life issues, new technologies, and problems of justice and public health in pediatrics. A dedicated section also addresses the topics of professionalism, including boundary issues, conflicts of interests

and relationships with industry, ethical issues arising during training, and dealing with the impaired or unethical colleague. Each chapter contains a summary of the key issues covered and recommendations for approaching similar situations in other contexts. *Clinical Ethics in Pediatrics: A Case-Based Textbook* is an essential resource for all physicians who care for children, as well as medical educators, residents and scholars in clinical bioethics.
