Get your copy of this award-winning book now.

**Parenting Matters** - National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective

with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Baby It's You** - Annette Karmiloff-Smith 1995

Using the high production values and approach of a natural history series, this book captures the experience of a child as it transforms from a helpless newborn into a walking, talking, thinking human being. Using the latest scientific research, which challenges our understanding of how and when children acquire all the skills they need, and illustrated with colour photographs, the book is based on the Channel 4 series.

The First Relationship - Daniel N. Stern 1977

THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION.

Relationships and Development - W. W. Hartup 2013-05-13

Based on presentations made at a conference sponsored by the Social Science Research Council's Committee on Social and Affective Development During Childhood, held at Harwichport, Mass., in June 1982.

**A Guide to Language Development and Communication** - John Ronald Lally 1992

This training package is designed to help caregivers recognize the importance of letting infants and toddlers make their own learning choices and experience the world on their own terms. It also teaches caregivers how to provide proper emotional support and interest to foster language development.

**Time-limited Psychodynamic Psychotherapy with Children and Adolescents** - Ruth Schmidt Neven 2016-08-12

At a time when there is increasing concern about the escalation of child and adolescent mental health problems, Time-limited Psychodynamic Psychotherapy with Children and Adolescents provides an innovative contextual model that engages the child or young person and their parents. The core of the model is the recognition of the dynamic capacity for growth in the child and how this, in itself, creates opportunities for effective treatment over a relatively short period of time. Based on evidence that the most enduring therapeutic outcomes involve a shift in the parents' relational understanding of themselves, as well as a change in the child, the book uses case examples to show how this model can be applied in everyday therapeutic practice. Time-limited Psychodynamic Psychotherapy with Children and Adolescents is aimed at practitioners in the field of child, adolescent, parent and family psychotherapy. It will interest psychologists, child psychotherapists, doctors, psychiatrists, social workers and mental health workers.

**Fatherhood** - Ross D. Parke 1996

It has been said that fathers are a biological necessity but a social accident. Fifteen years ago, when Ross Parke first wrote about fathers for the Developing Child series, American culture seemed to adhere strongly to the stereotype of Dad the breadwinner, pacing outside the delivery room and peeking through the nursery window, and Mom the homemaker, warming bottles and changing diapers. Simple--in fact, a bit too simple. In the intervening years the conventional image of the

uninvolved father has given way to a new stereotype: the father who takes an active part in rearing his children. The dramatic technological, economic, and ideological changes in society over the past several decades have reconfigured the nuclear family and redefined the role of fathers. More women now work outside the home; fewer families can depend on an extended network of relatives for help with childcare; more divorced fathers assume or share custody of their children. Fathers have become partners in parenthood, wielding a more direct influence on their children's development. But, Parke asks, is the new ideal of fathers--participating in childbirth and sharing in the care and feeding of their children--any more accurate than the earlier uninvolved father stereotype? Social scientists have long ignored fathers, focusing on mothers as the significant figure in infant development. But research is showing that maternal caretaking is not biologically fixed, nor are fathers necessarily restricted to a secondary role in childcare. Turning away from well-worn theories in favor of direct observation, modern studies have revealed a substantial amount about how fathers behave with their children, how this behavior differs from maternal behavior, and how it affects children. In this new book, Parke considers the father-child relationship within the "family system" and the wider society. Using the "life course" view of fathers that has emerged in recent years, he demonstrates that men enact their fatherhood in a variety of ways in response to their particular social and cultural circumstances. And while it is becoming clear that fathers play an important role in their children's lives, it is also becoming clear that fathering is good for men.

**Handbook of Early Childhood Intervention** - Jack P. Shonkoff  
2000-05-22

Eighteen new chapters have been added to the 2000 edition of this valuable Handbook, which serves as a core text for students and experienced professionals who are interested in the health and well being of young children. It serves as a comprehensive reference for graduate students, advanced trainees, service providers, and policy makers in such diverse fields as child care, early childhood education, child health, and early intervention programs for children with developmental disabilities and children in high risk environments. This book will be of interest to a broad range of disciplines including psychology, child development, early childhood education, social work, pediatrics, nursing, child psychiatry, physical and occupational therapy, speech and language pathology, and social policy. A scholarly overview of the underlying knowledge base and practice of early childhood intervention, it is unique in its balance between breadth and depth and its integration of the multiple dimensions of the field.

*Becoming A Person* - Martin Woodhead 2013-10-28

First published in 1991. Routledge is an imprint of Taylor & Francis, an informa company.

**Child, Adolescent and Family Development** - Phillip T. Slee  
2012-08-30

A comprehensive study of human development from conception to adulthood, this book explores the foundations of modern developmental thought, incorporating international research set within a cultural and historical context.

Core Principles of Assessment and Therapeutic Communication with Children, Parents and Families - Ruth Schmidt Neven 2010-06-10

Presents an integrated approach to working with children, parents and families that can be applied by all professionals in a variety of settings. Child and Family Services Act, 1975 - United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Children and Youth 1976

**Infant Development** - Hiram E. Fitzgerald 2003-08-29

This collection of essays by leading scholars in the field of childhood development focus on the critical issues and questions that need to be addressed at the beginning of the twenty-first century. Topics covered include the ecology of fetal development, birth and the newborn period, family ecology and infant development, infant care settings, gender influences on caregiving, culture, violence, poverty, substance abuse, social support, maternal age, risk and protective factors, the impact of legal and public policy, and historical, and future ecologies of infant development

**Resources in Education** - 2001

**The Infant & Toddler Handbook** - Kathryn Castle, Ed.D. 1987-10

Developmentally sequenced by age group, this versatile book can be used as a materials guide in both formal and informal settings. Each activity is introduced by detailing the emerging ability and care giver role, while giving individual "invitations" to care for and instruct these special developmental stages. Tips are included on how to introduce toys, store materials, develop basic care routines, create activity centers, and avoid trouble spots.

**Public Health Reports** - 2006

Compendium of HHS Evaluations and Relevant Other Studies - HHS Policy Information Center (U.S.) 1990

*Health Services for Mothers and Children* - United States. Health Services Administration. Bureau of Community Health Services 1976
