Why We Love - Helen Fisher

A groundbreaking exploration  
of our most complex and

mysterious emotion Elation, mood swings, sleeplessness, and obsession—these are the tell-tale signs of someone in the throes of romantic passion. In this revealing new book, renowned anthropologist Helen Fisher explains why this experience—which cuts across time, geography, and gender—is a force as powerful as the need for food or sleep. *Why We Love* begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love. She proves, at last, what researchers had only suspected: when you fall in love, primordial areas of the brain "light up" with increased blood flow, creating romantic passion. Fisher uses this new research to show exactly what you experience when you fall in love, why you choose one person rather than another, and how romantic love affects your sex drive and your feelings of attachment to a partner. She argues that all animals feel romantic attraction, that love at first

sight comes out of nature, and that human romance evolved for crucial reasons of survival. Lastly, she offers concrete suggestions on how to control this ancient passion, and she optimistically explores the future of romantic love in our chaotic modern world.

Provocative, enlightening, and persuasive, *Why We Love* offers radical new answers to the age-old question of what love is and thus provides invaluable new insights into keeping love alive.

*Why We Love Dogs* - Kim Levin  
1998-09

This endearing gift book celebrates the unique connection between dogs and their human companions. There are reasons dogs are our best friends: They are loyal, affectionate, and totally committed to us. Or as photographer/writer Kim Levin puts it: "Because they look us in the eye." "Because they have wrinkles, too." "Because they are family." In this charming book, Levin artfully combines photographs with simple, insightful prose; the result is an ode that celebrates the wonders of dogs. Soulful beagle eyes. A grinning hound luxuriating in the sun. In these poignant photos, Levin

captures each dog's essence and illuminates the myriad reasons why we love dogs. In America alone, 40 million people own more than 50 million dogs. Of those dedicated dog owners, about 13 million Americans say they're as attached to their dogs as they are to their best friends; some six million people rank their dogs right up there with their children. That's why everyone who has ever cherished a beloved dog—whether large or small, pure-bred or mutt—will delight in this book filled with heartwarming words and pictures to commemorate their special closeness.

*The Human Magnet Syndrome*

- Ross A. Rosenberg

2013-04-01

"Born in the cauldron of personal experience of suffering and healing and honed through years of professional experience, this book will help anyone understand the attractors of love and consequent suffering. I recommend it to couples who are mystified by the depth and repetition of their pain and joy and to therapists whose destiny is to help them." ~ Harville Hendrix, Ph.D., co-author with Helen LaKelly Hunt of *Making Marriage Simple: Transform the Relationship you Have Into the Relationship you Want* Since the dawn of civilization, men and women have been magnetically and irresistibly

drawn together into romantic relationships, not so much by what they see, feel and think, but more by invisible forces. When individuals with healthy emotional backgrounds meet, the irresistible "love force" creates a sustainable, reciprocal and stable relationship. Codependents and emotional manipulators are similarly enveloped in a seductive dreamlike state; however, it will later unfold into a painful "seesaw" of love, pain, hope and disappointment. The soul mate of the codependent's dreams will become the emotional manipulator of their nightmares. Readers of the *Human Magnet Syndrome* will better understand why they, despite their dreams for true love, find themselves hopelessly and painfully in love with partners who hurt them. This book will guide and inspire both the layman and the professional.

**Why We Love the Church** -

Kevin L. DeYoung 2009-06-24  
This book presents the case for loving the local church. It paints a picture of the local

church in all its biblical and real life guts, gaffes, and glory in an effort to edify local congregations and entice the disaffected back to the fold. It also provides a solid biblical mandate to love and be part of the body of Christ and counteract the "leave church" books that trumpet rebellion and individual felt needs. Why We Love the Church is written for four kinds of people - the Committed, the Disgruntled, the Waffling & the Disconnected.

*Why We Love Serial Killers* -  
Scott Bonn 2014-10-28

For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer has transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal “The Cannibal” Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a gruesome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or it is

something more? In *Why We Love Serial Killers*, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while also providing new and unique insights into the world of the serial killer, including those he has gained from his correspondence with two of the world’s most notorious examples, David Berkowitz (“Son of Sam”) and Dennis Rader (“Bind, Torture, Kill”). In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath—that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, *Why We Love Serial Killers* is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the “monsters” in our midst.

**Love Actually** - Laura Mucha  
2019-01-24

As featured on Sunday Brunch and Woman's Hour 'Laura Mucha has found the proof that love actually is all around.'

Richard Curtis Poets, philosophers and artists have been trying to explain romantic love for centuries, but it remains one of the most complex and intimidating terrains to navigate. Most people are afraid to be open and honest about their relationships - until now. For Love Actually, Laura Mucha has interviewed hundreds of strangers, from the ages of 8 to 95 in more than 40 countries, asking them to share their most personal stories, feelings and insights about love. These intimate and illuminating conversations raised important questions, such as: - How does your upbringing influence your relationships? - Does love at first sight exist? Should you 'just know'? - What should you look for in a partner? - Is monogamy natural? - Why do people cheat? - How do you know when it's time to walk

away? Drawing on psychology, philosophy, anthropology and statistics, Love Actually combines evidence, theory and everyday experience and is the perfect read for anyone who is curious about how we think, feel and behave when it comes to love.

edition offers updated references to recent research, new chapter exercises, and "case examples" of romantic stories to begin each chapter. [Why We Love Pirates](#) - Rebecca Simon 2020-11-24

A historian presents "an excellent guide to how pirates became the outlaw celebrities of the high seas" (Greg Jenner, host of the You're Dead to Me podcast). During his life and even after his death, Captain William Kidd's name was well known in England and the American colonies. He was infamous for the very crime for which he was hanged, piracy. In this book, historian Rebecca Simon dives into the details of the two-year manhunt for Captain Kidd and the events that ensued. Captain Kidd was hanged in 1701, followed by a massive British-led hunt for all pirates during a period known as the Golden Age of Piracy. Ironically, public executions only increased the popularity of pirates. And, because the American colonies relied on pirates for smuggled goods such as spices, wines, and

silks, pirates tended to be protected from capture. This is the story of how pirates became popularly viewed as "Robin Hoods of the Sea"—and how these historical events were pivotal in creating the portrayal of pirates as we know them today. "Only someone who has lived in the shadows chasing faded pirates for an age, and is blessed with creativity, can pull off a book of this high caliber." —Wreck Watch Magazine

fulfillment. Why is it that we so often feel intense passion for objects? What does this tendency tell us about ourselves and our society? In *The Things We Love*, Dr. Aaron Ahuvia presents astonishing discoveries that prove we are far less “rational” than we think when it comes to our possessions and hobbies. In fact, we have passionate relationships with the things we love, and these relationships are driven by influences deep within our culture and our biology. Some of our passions are sudden, obsessive, and fleeting; others are devoted and lifelong affairs. Some turn dark: we

become hoarders, or would prefer to destroy certain objects rather than let anyone else own them. And as technology improves, becoming increasingly addictive, one wonders: might our lives become so dominated by our emotional ties to things that we lose interest in other people? Packed with fascinating case studies, scientific analysis, and takeaways for living in a modern and ever-so-material world, *The Things We Love* offers a truly original and insightful look into our love for inanimate objects — and how better understanding these relationships can enrich and improve our lives.
