Languages are a very complex but incomplete part of our human relationships. If we want to understand the communication systems of other species, we will need to have a very clear idea of what we are looking for. Are we pretending to find in nonhuman animals a narrative-driven, teaching language that among human beings is

used to deceive, manipulate, regret, and dream, a language that promotes the neglect of other communication clues? We need to carefully reflect on what our human languages are and wonder if such language characteristics will make sense in other environments in order to solve life problems different from the humans.

50 ways to make him love you more - Celine Claire 2022-02-26

This ebook gives you helpful tips on how to make him love you more. Tip number one. Don't attempt to change your man. As tempting as it can be, don't attempt to change your man to suit your ways, especially if he's happy the way he is. If your man feels like you accept him for who he is, he will cherish and love you more. There is a lot of power behind a woman who inspires her man to be the best version of himself without making him feel imperfect. Tip number two. Don't force your man to like the same things as you do. Understand that your man is a separate human being from you, and he had a life before meeting you. If you find that your likes are conflicting with his, don't make him feel guilty for not enjoying the same stuff as you do. Your man will feel more peaceful and will love you more for not pushing him around like a child to

do the same things as you do. Translator: Celine Claire PUBLISHER: TEKTIME

BODY LANGUAGE & BEHAVIOR CUSTOMS East & West - Arnaud van der Veere 2021-03-12

Most communication is non-verbal. The way we walk, move and look is an expression of who we

are and what we think. Our body is constantly signing the world who we are and what we want. It is a constant interaction with our environment. We are constantly reading other people and unconsciously try to understand their signs. When confronted with another culture we face the “translation” problem. We are not able to grasp the right meaning in the context of the moment. There is no possibility to mirror the movements as they are different of our own. There is a communication gap which can create problems. When cultures are vastly different the gap is even larger. How can we bridge this to create understanding and come to results? This book is focused on informing the reader about

the Chinese / Western gaps, the differences, and similarities. The reason why we focus on this population in Asia is that their influence stretches over thousands of years and through emigration they did influence many other countries in Asia. In total worldwide it is considered there are over 2.3 billion Chinese at the moment and still growing. Hereby we look at different generations. Sometimes we show the past, the current time and what is expected to happen in the future. Through different levels of communications, the world is slowly moving in a common public direction. But the situation changes in a more private setting for business meetings, personal contacts and in a relationship.
