**Mirror, Mirror** - Elaine Hatfield 1986-01-01  
Mirror, Mirror... examines the hidden truth about good looks. Through extensive research of scholarly studies and popular culture, the authors provide a lively and comprehensive view of what behavioral scientists have learned about the effects of personal appearance. A wealth of illustrations and photographs give visual support to the evidence presented. The book explores the view that people believe good-looking individuals possess almost all the virtues known to humankind; consequently, they treat the good-looking and ugly very differently. Mirror, Mirror reviews the stereotypes held about

people with specific characteristics and it explains the impact of height, weight, and attributes such as hair color, eye color and facial hair on the course of social encounters. The authors show that through time these reaction patterns have their effect and that good-looking and unattractive persons come to be different types of people. To show the relative nature of concepts of beauty, the authors also present examples of what other cultures consider attractive.

The New Psychology of Love - Robert J. Sternberg 2018-11-08

This is a much-needed development from the

first edition that provides an update on the theory and research on love by world-renowned scientific experts. It explores love from a diverse range of standpoints: social-psychological, evolutionary, neuropsychological, clinical, cultural, and even political. It considers questions such as: how men and women differ in their love, what makes us susceptible to jealousy and envy in relationships, how love differs across various cultures? As the neuropsychological basis of love is examined, this study showcases what attracts people to one another, why love has developed the way it has over time, and what evolutionary purpose it serves. It also analyses why and when love relationships both succeed and fail, which means readers will be rewarded with a better understanding of their own relationships and those of others, as well as what can be done to build a lasting, loving relationship.

This encyclopedia provides a structure to understand the essential rudiments of human behaviour and interpersonal relationships  
*Compatible and Incompatible Relationships* - W.

Ickes 2012-12-06

Several years ago, two of my colleagues and I had the opportunity to interview Fritz Heider- perhaps the most influential theorist in the field of social psychology (Harvey, Ickes, & Kidd, 1976). During our interview, Heider affirmed a belief that had guided his career since the 1920s, the belief that the study of human relationships is the most important task in which social scientists can engage. Although many social scientists would profess to share this belief, it is nonetheless true that the study of human relationships has been one of the most neglected tasks in the history of the social sciences-including psychology. What Heider found in the 1920s-that most psychologists acknowledged the importance of studying human relationships but at the same time tended to focus their own research on more "tractable" topics such as memory and cognition-is still very much evident in the 1980s. Even within the more specific domain of social psychology, a majority

of researchers still choose to address those hybrid topics ("social cognition," "social categorization and stereotyping," "person memory," etc. ) that relate most directly to traditional areas of psychological research. Still other researchers, while choosing to study such important interpersonal phenomena as altruism, aggression, conflict, and interpersonal attraction, tend to focus so exclusively on these isolated and abstracted phenomena that they fail to provide a more inclusive view of the relationships in which these phenomena occur.

**The Handbook of Sexuality in Close**

**Relationships** - John H. Harvey 2004-04-26

Although sexuality is an integral part of close romantic relationships, research linking these two constructs is to some extent under developed. The editors' goal is to integrate this research into one volume with the hope that the book will serve as a forum for enhancement of dialogue about the centrality of sexual issues in close relationships.

*Modern China* - Susan Sprecher 2013-01-22

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

**The American Paradox** - David G. Myers  
2001-01-01

In this compelling book, a well-known social psychologist asks why, in an era of great material wealth, America suffers from such a disturbing array of social problems that reflect a deep spiritual poverty. Illustrations.

*Handbook of Relationship Initiation* - Susan  
Sprecher 2018-09-05

The Handbook of Relationship Initiation is the first volume to focus specifically on the very beginning stage of relationships – their origin. In this Handbook, leading scholars on relationships review the literature on various processes related to the initiation of relationships: how people meet, communicate for the first time, and begin to define themselves as being in a relationship. Topics include attraction, mate selection, influence of social networks on

relationship initiation, initiation over the internet, hook-ups among young adults, and flirting and opening gambits. In addition, the dark side of relationship initiation is considered, including unwanted relationship pursuit and barriers to relationship initiation including social anxiety. This volume provides an overdue synthesis of the literature on this topic. It is especially timely in view of the growing prevalence on relationship initiation online, through matchmaking and other social networking sites, which has increased awareness that science can be used to understand, create, and facilitate compatible matching. This Handbook provides an essential resource for an interdisciplinary range of researchers and students who study relationships, including social psychologists, communication scientists and scholars of marriage and the family.

The Science of Compassionate Love - Beverley Fehr 2009-01-26

The Science of Compassionate Love is an interdisciplinary volume that presents cutting-edge scholarship on the topics of altruism and compassionate love. The book adopts a social science approach to understanding compassionate love. Emphasizes positive features of social interaction. Encourages the appropriate expression of compassionate love both to those in intimate relationships and to strangers. Includes articles by distinguished contributors from the fields of Psychology, Sociology, Communication Studies, Family Studies, Epidemiology, Medicine and Nursing. Is ideal for workshops on compassionate love, Positive Psychology, and creating constructive interactions between health professionals and patients.

*Taking Sexy Back* - Alexandra H. Solomon

revolution. It's time to take sexy back. As women, we're expected to be sexy, but not sexual. We're bombarded with conflicting, shame-inducing, and disempowering messages about sex, instead of being encouraged to connect with our true sexual selves. Sexy gets reduced to a performance, leaving us with little to no space to reckon with the complexities of sexuality. In a culture intent on telling you who and how to be, standing in your truth is revolutionary. From relationship expert Alexandra Solomon—author of *Loving Bravely—Taking Sexy Back* is a groundbreaking guide to deepening your connection to yourself, honoring your desires, and cultivating authentic intimate connections. On these pages, you'll discover how to deepen your sexual self-awareness, and use that awareness to create experiences that not only pleasure, but elevate, expand, and heal you. You'll learn to understand your boundaries, communicate what feels good, and bring mindfulness and self-compassion to

sex. Most importantly, you'll embrace your sexuality as an evolving, essential, and beautiful part of your life. Sex is about more than what your partner enjoys or finds sexy. It's about more than having an orgasm or finding the "right" positions. It's about you. It's time to take your sexy back! the Handbook, 218 scales, complete with full descriptions and psychometric data, are made available, with additional information provided at the companion website for this volume.

**The Sex Diaries** - Bettina Arndt 2009

'From the time I started working as a sex therapist back in the early 1970s, people have been talking to me about their sex lives. What I hear about most is the business of negotiating the sex supply. How do couples deal with the strain of the man wishing and hoping while all she longs for is the bliss of uninterrupted sleep?' In *The Sex Diaries* Australia's leading sex therapist, Bettina Arndt, uncovers the night-time drama being played out in bedrooms everywhere the creeping hand and feigning of sleep, the staying up late in the hope that he will doze off. It is one of the great inconvenient truths of relationships that after the first blissful years together, most men want more sex than their female partners. Bettina Arndt recruited ninety-eight couples to keep diaries, revealing their

intimate negotiations over sex. Who feels like having sex? Who doesn't? And how do couples cope if one person wants it more than the other? She draws on her thirty-five years of experience as a sex therapist and psychologist to provide a provocative analysis that challenges our basic assumptions about sex. With her characteristic humour and insight, Bettina Arndt proposes a new approach to how couples can enjoy regular sex and sustain loving relationships.

New Directions in Helping - Jeffery Fisher

1983-01-28

*New Directions in Helping: Recipient Reactions to Aid, Volume 1*, reviews the state of knowledge in the reactions of recipients in helping interactions. It provides an overview of the entire field, in-depth coverage in major areas, and a preview of important future research directions. The book is organized into five parts. Part I discusses the types of recipient reactions; some consistent relationships between the conditions associated recipient reactions; and

approaches that have been used to conceptualize the effects of aid on those who receive it. Part II focuses on theoretical perspectives for conceptualizing reactions to help. Part III examines individual differences in responses to aid. Part IV takes up various determinants of reactions to help. Part V presents some final thoughts about research on reactions to help. This book will be of interest to social psychologists as well as to members of a number of other disciplines, e.g., clinical psychologists, social workers, counseling psychologists, educational psychologists, political scientists, and sociologists.

**Butterflies, Turbulence, Growth** - Donna Safatli 2008

**Close Relationship Loss** - Terri L. Orbuch 2012-12-06

Social scientists from various disciplines have been increasingly concerned with the nature, structure, and function of close relationships.

Although most of the early work on the topic of close relationships drew attention to the development of close relationships, since the mid-1970s researchers have begun to investigate the many different aspects connected to the loss of close relationships. Despite the change to a more comprehensive conceptual framework, close relationship research is often criticized for being atheoretical; the research is criticized for being purely descriptive in nature and thus lacking a more theoretical framework. Contrary to this belief, I wish to argue that researchers in the area of close relationship loss employ several critical and prominent theoretical perspectives to describe, explain, and understand the endings of relationships-thus, the fruition of this book. The major aim of this edited book is to present and illuminate, within one volume, some of these major theoretical perspectives. The volume as a whole has several unique qualities. First, within each chapter, the authors provide a general overview of the

theoretical perspective or approach within which they examine close relationship loss.

**Sexuality in Close Relationships** - Kathleen McKinney 2014-05-22

This is one of the first volumes to examine the interface between research undertaken in sexuality and that in close relationships from a social psychological perspective. Experts from several different disciplines offer chapters that contain theory, extant literature, and their own original research on such topics as jealousy, extradyadic sexuality, communication, love, and sexual coercion. Aimed at a fairly wide audience, this book will be of interest to students, faculty, and other professionals in social psychology, sociology, communication, and family and women's studies. It is also a valuable source of information for teachers, researchers, and clinicians working in the areas of human sexuality and/or close relationships.
