The Three-Piece Suit and Modern Masculinity - David Kuchta 2002-05-21

In 1666 King Charles II introduced a fashion that developed into the three-piece suit. This text examines the inspiration behind this royal revolution in masculine attire.

Comparative Criticism: Volume 17, Walter Pater and the Culture of the Fin-de-Siècle - E. S. Shaffer 1995-11-16

Addresses literary theory and criticism, comparative studies in terms of theme, genre movement and influence, and interdisciplinary perspectives.

Queering the Pitch - Philip Brett 2013-02-01

When the first edition of *Queering the Pitch* was published in early 1994, it was immediately hailed as a landmark and defining work in the new field of Gay Musicology. In light of the explosion of Gay Musicology since 1994, a new edition of *Queering the Pitch* is timely and needed. In this new work, the editors are including a landmark essay by Philip Brett on Gay Musicology, its history and scope. The essay itself has become a cause celebre, and this will be its first full appearance in print. Along with this new historical essay, the editors are contributing a new introduction that outlines the changes that have occurred over the last decade as Gay Musicology has grown.

English Literature and the Disciplines of Knowledge, Early Modern to Eighteenth Century - 2017-11-06

This volume focuses on how the conceptual and performative aspects of science connect it in important ways with literary discourses. It addresses the reception of science by authors of literature, as well as how 'mimesis' intersects with scientific discourse.

Nervous Acts - G. Rousseau 2004-11-02

These essays demonstrate the sweeping influence of the human nervous system on the rise of literature and sensibility in early modern Europe. The brain and nerves have usually been treated as narrow topics within the history of science and medicine. Now George Rousseau, an international authority on the relations of literature and medicine, demonstrates why a broader context is necessary. The nervous system was a crucial factor in the rise of recent civilization. More than any other body part, it holds the key to understanding how far back the strains and stresses of modern life - fatigue, depression, mental illness - extend.

Christianity and Sexuality in the Early Modern World - Merry Wiesner-Hanks 2005-06-20

Christianity and Sexuality in the Early Modern World is the first global survey of such for the early modern period. Merry Wiesner-Hanks assesses the role of personal faith and the church itself in the control and expression of all aspects of sexuality. The book ranges over developments within Europe and beyond to the European colonies including Brazil, Mexico, South Africa and Goa, which were establishing themselves around the world. Christian missionaries and rituals and structures accompanied all of the imperial powers and the control of the sexuality of both indigenous peoples and colonists was an essential part of policy. The book is introduced with a clear, original and engaging account of the central concepts in the study of sexuality in Christianity, such as shame, sin, the body, marriage and gender. Drawing on diverse evidence including literary, medical and historical the following sections chart changes in Western Christianity in the Late Middle Ages, Protestantism and Catholicism in Europe, Orthodoxy in Eastern Europe and Russia, and finally the Spanish, Portuguese, English and Dutch Colonies. Merry Wiesner-Hanks exciting book covers both the ideas and effects in each period. *Christianity and Sexuality in the early Modern World* includes discursive bibliographies which discuss major books and articles at the end of each chapter.

Doctor's Orders - Robert Deam Tobin 2001

Doctor's Orders shows how the foundational novel of the German tradition, Johan Wolfgang von Goethe's *Wilhelm Meister's Apprenticeship*, documents the rise of medicine as an institution structuring the self and society. It sheds light on the Bildungsroman that this novel established, provides a groundbreaking overview of the role of medicine in eighteenth-century Germany, and addresses larger questions concerning the relationship between medicine and literature.

Good Looking - Barbara Maria Stafford 1996

Challenging the reflexive identification of images with vice.

Futures of Enlightenment Poetry - Dustin D. Stewart 2020-10-29

Explores the creative work of writers and theologians who used their poetic writings as a means to explore and envisage scenarios of embodiment and existence that extended to life after bodily death.

Perilous Enlightenment - George Sebastian Rousseau 1991

Framing and Imagining Disease in Cultural History - G. Rousseau 2003-07-03

Throughout human history illness has been socially interpreted before its range of meanings could be understood and disseminated. Writers of diverse types have been as active in constructing these meanings as doctors, yet it is only recently that literary traditions have been recognized as a rich archive for these interpretations. These essays focus on the methodological hurdles encountered in retrieving these interpretations, called 'framing' by the authors. *Framing and Imagining Disease in Cultural History* aims to explain what has been said about these interpretations and to compare their value.

Placing the Enlightenment - Charles W. J. Withers 2008-09-15

The Enlightenment was the age in which the world became modern, challenging tradition in favor of reason, freedom, and critical inquiry. While many aspects of the Enlightenment have been rigorously scrutinized—its origins and motivations, its principal characters and defining features, its legacy and modern relevance—the geographical dimensions of the era have until now largely been ignored. *Placing the Enlightenment* contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions to its content and concerns. Investigating the role space and location played in the creation and reception of Enlightenment ideas, Charles W. J. Withers draws from the fields of art, science, history, geography, politics, and religion to explore the legacies of Enlightenment national identity, navigation, discovery, and knowledge. Ultimately, geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition. Lavishly illustrated and engagingly written, *Placing the Enlightenment* will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world.

Reader's Guide to the History of Science - Arne Hessenbruch 2013-12-16

The *Reader's Guide to the History of Science* looks at the literature of science in some 550 entries on individuals (Einstein), institutions and disciplines (Mathematics), general themes (Romantic Science) and central concepts (Paradigm and Fact). The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn.

Histories of French Sexuality - Andrew Israel Ross 2023-05

Histories of French Sexuality contends that the history of sexuality is at a crossroads. Decades of scholarship have shown that sexuality is implicated in a wide range of topics, such as studies of reproduction, the body, sexual knowledge, gender identity, marriage, and sexual citizenship. These studies have broadened historical narratives and interpretations of areas such as urbanization, the family, work, class, empire, the military and war, and the nation. Yet while the field has evolved, not everyone has caught on, especially scholars of French history. Covering the early eighteenth century through the present, the essays in *Histories of French Sexuality* show how attention to the history of sexuality deepens, changes, challenges, supports, or otherwise complicates the major narratives of French history. This volume makes a set of historical arguments about the nature of the past and a larger historiographical claim about the value and place of the field of the history of sexuality within the broader discipline of history. The topics include early empire-building, religion, the Enlightenment, feminism, socialism, formation of the modern self, medicine, urbanization, decolonization, the social world of postwar France, and the rise of modern and social media.

Liberating Medicine, 1720-1835 - Steve Clark 2015-10-06

During the 18th century medicine became an autonomous discipline and practice. Surgeons justified themselves as skilled practitioners and set themselves apart from the unspecialized, hack barber-surgeons of early modernity. This title presents 17 essays on the relationship between medicine and literature during the Enlightenment.

Perilous Enlightenment - George Sebastian Rousseau 1991

Geography and Enlightenment - David N. Livingstone 1999-12-15

Exploring both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment, 14 papers from a July 1996 conference in Edinburgh survey the many ways in which the world of the long 18th century was shaped through map, text, exploration, and argument and within and across spatial and intellectual borders. Absent Mothers and Orphaned Fathers - Susan E. Gustafson 1995

Gustafson provides a comprehensive overview of Lessing's comments on the structure and purpose of the domestic tragedy within the context of his Laokoon essay, demonstrating that the fundamental psychic-deep structures informing his aesthetic and dramatic production are male narcissism and the abjection of the woman/the mother. As opposed to earlier studies of gender/generic questions in Lessing's dramas, this analysis explicates the theoretical basis for the rigid codification of gender which informs Lessing's fictional symbolic order.

Exciting the Industry of Mankind George Berkeley's Philosophy of Money - C.G. Caffentzis

2013-04-17

Exciting the Industry of Mankind is the first comprehensive book about George Berkeley's revolutionary views on money and banking. Berkeley broke the conceptual link between money and metallic substance in *The Querist*, a work published between 1735 and 1737 in Dublin, consisting entirely of questions. Exciting the Industry of Mankind explains what economic and social forces caused Berkeley to write *The Querist* in response to a major economic crisis in Ireland. Exciting the Industry of Mankind falsifies the view that Berkeley has nothing to tell us about our present and future social and economic life. For the 'idealism' Berkeley found in the money form is now becoming a fact of global economic life, when 'xenomoney' and 'virtual money' exchanges begin to dwarf commodity transactions, and the future becomes the dominant temporal dimension of economic activity. Philosophers, historians, cultural theorists, economists and lovers of Irish history will be interested in this volume.

[The Cambridge History of Science: Volume 4, Eighteenth-Century Science](#) - Former Professor of the Social History of Medicine Wellcome Trust Centre for the History of Medicine Roy Porter 2003-03-17
The fullest and most complete survey of the development of science in the eighteenth century.
