**The Man's Guide to Women** - John Gottman 2016-02-02

A great "philosopher" once said, "Trying to understand women is like

trying to smell the color 9." But the fact is, men can understand women to their great benefit. All they need is the right teacher. And arguably there is no better teacher than John Gottman, PhD, a world-renowned relationships researcher and author of the bestselling 7 principles of Making Marriage Work. His new book, written with wife Julie Gottman, a clinical psychologist, and Doug Abrams and Rachel Carlton Abrams, MD, is based on 40 years of scientific study, much of it gleaned from the Gottman's popular couple's workshops and the "love lab" at the University of Washington. It's written primarily for men because new research suggests that it is the man in a relationship who wields the most influence to make it great or screw it up beyond repair. The Man's Guide to Women offers the science-based answers to the question: What do women really want in a man? The book explains the hallmarks of manhood that most women find attractive, and helps men hone those skills to be the man she desires.

How to Get a Girlfriend Dating Online - Robert Belland 2011-02-01

The goal of this book is simple: to guide ANY guy through the process of picking out the BEST women to chat with, exactly what to say to them, and how to inspire these women to feel enough attraction and comfort to meet in person. What can YOU do slightly differently than the last 50 guys who tried emailing her that same day? Be different (in a fun way) without seeming desperate, needy, or creepy. This book explains and explores the common mistakes men are making dating online AND explains, step-by-step, EXACTLY what to say in order to stand out and get dates. This book outlines the FOUR FOUNDATIONS of successful (online) dating: Attraction, Rapport, Leading, and Escalation.-

ATTRACTION is about tension and her emotional response to you.-

RAPPORT is about intimacy and her emotional connection with you.- LEADING is about challenging your fears and taking action while communicating sincerity through your actions.- ESCALATION is about consistently increasing the intensity of your relationship via attraction and rapport so that it goes where ever you want it to go.WHAT YOU'LL DISCOVER IN THIS BOOK: - Exactly to say in your first email so that she's MOST likely to respond to you.- 8 tragic but typical mistakes you should NEVER make when first chatting with her online.- 5 ways she's indicating she's "ready" to meet you (but you might be missing.)- 10 things you SHOULD be doing to make or break your online profile.- 10 detailed examples of men's profiles, and what's good and bad about them.- Learn which types of photos make women click your profile, and which make her run for the hills!- MANY examples of the types of emails other men will be sending her so that YOU can learn how to avoid sounding like "just another creep."- How to be DIRECT in such a way that will invite her to desire you more.- 7 amazing openers that you can use anytime that I've tested and used to meet many amazing women online, and why they work so well.- Etc, etc, etc...Getting the girl online isn't rocket science. It's not black magic. It's not surprising or wierd. BUT it's almost universally misunderstood.What makes a girl reject the last 99 guys but respond to you?It's simple. Being different, being playful, and being attractive. The core teachings of my books.As a matter of fact it's EASIER to be different than the last 99 guys simply because the last 99 guys are all saying the exact same things and all making the exact same mistakes.I wrote this book to help the average guy, like you and me, stand out from the online dating crowd in order to catch the girl we REALLY want, and ultimately deserve.She WANTS you to find her and attract her... now read this book and learn the fastest path to your first date!

**Fascination of Science** - Herlinde Koelbl 2023-08-01

An intimate collection of portraits of internationally renowned scientists and Nobel Prize winners, paired with interviews and personal stories. What makes a brilliant scientist? Who are the people behind the greatest discoveries of our time? Connecting art and science, photographer Herlinde Koelbl seeks the answers in this English translation of the German book Fascination of Science, an indelible collection of portraits of and interviews with sixty pioneering scientists of the twenty-first century. Koelbl's approach is intimate and accessible, and her highly personal interviews with her subjects reveal the forces (as well as the personal quirks) that motivate the scientists' work; for example, one wakes up at 3 am because her mind is calm then, another says his best ideas come to him in the shower. These glimpses into the scientists' lives and thinking add untold texture in this up-to-the-minute survey of the activities and progress that are currently taking place in the broad field of the natural sciences. Koelbl's interview subjects include Nobel Prize winners Dan Shechtman, Frances Arnold, Carolyn Bertozzi, and cover scientific fields from astronomy, biochemistry, and quantum physics to stem-cell research and AI. Beautifully bringing together art, science, and the written word, Fascination of Science is an inspiring read that shows how creativity, obsession, persistence, and passion drive the pioneering researchers of our time.

**Learner-centered Science Education** - 2019-02-11

This book arises from the author's experience of the South African science curriculum development and teaching since 1994, exploring definitions of science and approaches to science education appropriate to a newly liberated developing country. Each of the 50 chapters is borne out of Cliff Malcolm's close relationships with communities in SA where he obtained deep insights into their attitudes to science teaching and learning, providing him with an empirical basis to challenge tertiary institutions to transform their curriculum offerings to embrace the culture and world views of African students.
