Unmasking Sexual Con Games Kathleen M. McGee 2003 Ten lesson plans for a teen relationship curriculum that discusses emotional grooming, sexual harassment, dating violence, and the role of the media, drugs and alcohol, as well as how to develop

healthy physical, emotional, and sexual boundaries. Coercing or conning a teen into sexual activity, it's called emotional grooming and it happens far too often to boys as well as girls. Using tactics like flattery, jealousy, and intimidation, the emotional groomer manipulates his or her target into a sexual relationship that can have devastating physical and emotional consequences for the victim. Parents, teachers, and adults who work with and care for youth can help adolescents recognize the signs of emotional grooming and learn to protect themselves from being used or abused. Ten lesson plans give step-by-step instructions to help teens learn how to: recognize emotional grooming and nine distinct emotional grooming tactics; identify distorted thinking and language cons; understand the 12 steps of physical closeness; practice good friendship and dating skills; combat sexual harassment; and avoid intimidation and dating violence. The Leader's Guide also discusses the role of the media, alcohol, and drugs in emotional grooming. Reproducible worksheets are included.

Strengthening Forensic Science in the United States

National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials,

enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The AI Does Not Hate You Tom Chivers 2019 A deep-dive into the weird and wonderful world of Artificial Intelligence. 'The AI does not hate you, nor does it love you, but you are made of atoms which it can use for something else'. This is a book about AI and AI risk. But it's also more importantly about a community of people who are trying to think rationally about intelligence, and the places that these thoughts are taking them, and what insight they can and can't give us about the future of the human race over the next few years. It explains why these people are worried, why they might be right, and why they might be wrong. It is a book about the cutting edge of our thinking on intelligence and rationality right now by the people who stay up all night worrying about it. Along the way, we discover why we probably don't need to worry about a future AI resurrecting a perfect copy of our minds and torturing us for not inventing it sooner, but we perhaps should be concerned about paperclips destroying life as we know it; how Mickey Mouse can teach us an important lesson about how to program AI; and how a more rational approach to life could be what saves us all. --

Unmasking the Masculine Alan R. Petersen 1998-07-08

Postmodernism and poststructuralism have undermined the assumptions upon which established identities have been constructed, such as the concept of stable bodies and stable selves. Sex, gender, sexuality and race are no longer viewed as merely descriptive aspects of experience but also as constructions of identity. Drawing on current debates in postmodern feminism, feminist philosophy of science, anti-racist/postcolonial studies and queer theory, this book considers the way in which discourse fabricates the ideal' male body, sexual identity and sexual politics. Alan Petersen explores the possibilities of developing new models of identity not so closely linked to the sex/gender system and examines the prospects of creating a new or reconceptualized identity politics.
