The Great Dinosaur Mystery Solved - Ken Ham 2000-03-01

A dinosaur book like you've never seen before! Not only is the "dinosaur mystery" solved, but you'll be taught the TRUE history of the earth and its inhabitants! Your thinking about this world will never be the same again! A wealth of information combined into one volume, this fascinating book is a perfect addition to your family library!

Unformed and Unfilled - Weston Fields 2005-01

Everyone's heard of it. Many believe it. Is there a 'gap in time' between the first two verses in Genesis? Does this alleged gap really represent a vast amount of time? Weston Fields' classic treatment of this subject is now being published by Master Books, and promoted by such important organisations as Answers in Genesis. In this book, Fields makes a detailed study of the gap theory, paying particular attention to the Hebrew of Genesis. His conclusion -- that this theory is not a reasonable compromise with modern evolutionary theory, but a dangerous diversion from biblical truth -- helps readers who struggle with the question of the time taken during the creation week. Was it really six days? Can Christians find a workable solution to the debate about creation and time? An important book. Features: A presentation of a variety of views espoused by Christians of all denominations; A professional, scholarly look that can be easily understood by laymen; A fascinating study of the original Hebrew text.

The Bible and Radiocarbon Dating - Thomas Levy 2014-12-05

Over the past several years, a number of Levantine archaeologists working on the Iron Age (ca. 1200 - 586 BCE) have begun to employ high precision radiocarbon dating to solve a wide range of chronological, historical and social issues. The incorporation of high precision radiocarbon dating methods and statistical modelling into the archaeological 'tool box' of the 'Biblical archaeologist' is revolutionizing

the field. In fact, Biblical archaeology is leading the field of world archaeology in how archaeologists must deal with history, historical texts, and material culture. A great deal of debate has been generated by this new research direction in southern Levantine (Israel, Jordan, Palestinian territories, southern Lebanon & Syria, the Sinai) archaeology. This book takes the pulse of how archaeology, science-based research methods and the Bible interface at the beginning of the 21st century and brings together a leading team of archaeologists, Egyptologists, Biblical scholars, radiocarbon dating specialists and other researchers who have embraced radiocarbon dating as a significant tool to test hypotheses concerning the historicity of aspects of the Old Testament or Hebrew Bible. As this book "raises the bar" in how archaeologists tackle historical issues as manifest in the interplay between the archaeological record and text, its interest will go well beyond the 'Holy Land.'

The Grand Canyon - Wayne Ranney 2016

-Could the Grand Canyon's rock layers have formed in a single year of Noah's flood?-Why are there no dinosaur, bird or mammal fossils in the canyon's layers?-How do we know that radiometric dating methods are reliable?-How can we tell what happened in the unobserved past?-How long did it take to carve out the canyon?-Is Young Earth Creationism really biblical? Learn the answers to these questions and more to understand how the Grand Canyon testifies to an old earth. Insights from top geologists, highlighted by stunning photographs, provide a memorable guide to these ancient wonders of creation.

Reading Genesis 1-2 - J Daryl Charles 2013-10-03

Today's evangelical community faces a multitude of questions about the creation of the cosmos and the beginning of human history and-quite naturally-we look to the Bible for answers about the origins and meaning of human history. But what are we to do with the stories in the first two

chapters of Genesis? Reading Genesis 1-2: An Evangelical Conversation brings together the voices of five prominent evangelical scholars who take on difficult interpretive questions that arise from reading the Bible's first two chapters. Richard Averbeck, Todd Beall, John Collins, Tremper Longman, and John Walton offer their perspectives in a point-counterpoint style. Drawing on a wealth of theological, linguistic, and historical expertise, this collection is characterized by a close attention to the biblical text and a mutual respect that often sorely lacks in the discussion of origins in the modern evangelical world. Contributors: Richard Averbeck Todd Beall C. John Collins Jud Davis Victor P. Hamilton Tremper Longman III Kenneth J. Turner John Walton

Bones of Contention - Marvin L. Lubenow 2004-10-01

Seeking to disprove the theory of human evolution, the author examines the fossils of the so-called "ape men."

Quaternary Dating Methods - Mike Walker 2005-09-27

This introductory textbook introduces the basics of dating, the range of techniques available and the strengths and limitations of each of the principal methods. Coverage includes: the concept of time in Quaternary Science and related fields the history of dating from lithostratigraphy and biostratigraphy the development and application of radiometric methods different methods in dating: radiometric dating, incremental dating, relative dating and age equivalence Presented in a clear and straightforward manner with the minimum of technical detail, this text is a great introduction for both students and practitioners in the Earth, Environmental and Archaeological Sciences. Praise from the reviews: "This book is a must for any Quaternary scientist." SOUTH AFRICAN GEOGRAPHICAL JOURNAL, September 2006 "...very well organized, clearly and straightforwardly written and provides a good overview on the wide field of Quaternary dating methods..." JOURNAL OF QUATERNARY SCIENCE, January 2007

Sacred Darkness - Holley Moyes 2012-09-01

Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman, deep caves were never used primarily as habitation sites for early humans. Rather, in both ancient and contemporary contexts, caves have served primarily as ritual spaces. In Sacred Darkness, contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice. Covering the ritual use of caves in Europe, Asia, Australia, Africa, Mesoamerica, and the US Southwest and Eastern woodlands, this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day. These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices. This state-of-the-art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion, sacred landscape, or cosmology and a must-read for any archaeologist interested in caves.

The Genesis Conflict - Walter J. Veith 2002

The Heresy of Ham - Joel Anderson 2016-08-01

From the author's Prologue: "Let's cut to the chase and state the obvious: the creation/evolution debate is controversial...really, really controversial. Therefore, writing an entire book on the controversy, and having it entitled 'The Heresy of Ham,' is bound to evoke intense reactions from people, depending on where they stand in the debate. If you've spent any time looking into the creation/evolution debate, you probably know what I'm talking about.

In Six Days - John Ashton 2001-01-01

Why would any educated scientist with a PhD advocate a literal interpretation of the six days of creation? Why, indeed, when only one in three Americans believes "the Bible is the actual word of God and is to be taken literally, word for word" according to a recent Gallup poll. Science can neither prove nor disprove evolution any more than it can creation. Certainly there are no human eyewitness accounts of either. However, certain factors are present today which are capable of swaying one's beliefs one way or the other. In this book are the testimonies of fifty men and women holding doctorates in a wide range of scientific fields who have been convicted by the evidence to believe in a literal six-day creation. For example, meet: The geneticist who concludes that there must have been 150 billion forerunners of "modern man" in order for the natural selection required by evolution to have taken place in the development of man. The evidence for such vast numbers of "prehistoric man" is in dire shortage. The orthodontist who discovered that European museum fossils of ancient man have been tampered with to adhere to

evolution theories. The geologist who studied under the late Stephen Jay Gould and literally cut the Bible to pieces before totally rejecting evolution. All fifty of these scientists, through faith and scientific fact, have come to the conclusion that God's Word is true and everything had its origin not so very long ago, in the beginning, In Six Days.

The World Is Not Six Thousand Years Old--So What? - Antoine Bret 2014-04-07

Why do so many think the Bible teaches that the universe is six thousand years old? There are many good biblical and historical reasons to read Genesis 1 nonliterally, and there are many good scientific reasons to think the universe is much older. Out of this misconception, some will lose faith, while others won't find it. This book was written for a large audience, gathering in a little more than one hundred pages the main biblical, historical, and astrophysical reasons to recognize that the universe is far more than six thousand years old. Contrary to some common views, scientists do not simply assume physical laws have been the same in the past. They observe it.

The New Answers Book 1 - Ken Ham 2007-01-15

Christians live in a culture with more questions than ever - questions that affect one's acceptance of the Bible as authoritative and trustworthy. Now, discover easy-to-understand answers that reach core truths of the Christian faith and apply the biblical worldview to a wide variety of subjects.

Isotopes - Gunter Faure 2009

How Do We Know the Bible is True Volume 2 - Ken Ham 2012-09-12

If you were asked how you know the Bible is true, do you have an answer? Over 29 issues addressed, including: Who made God; where did God come from? Has Noah's ark been found? Hasn't Bible text been changed over the years? Is Hell real? Did the ten plagues of Egypt really happen? We are an increasingly skeptical society — whether it comes to politics, science, or even faith. People see conflict everywhere, even about fundamental aspects of the Bible. When church leaders are at odds about biblical truth and scriptural authority, believers are left confused and uncertain, needing clear biblical truth. Addressing topics from popular culture like the Shroud of Turin, or "missing" books of the Bible, and even what makes God's Word unique among holy books, How Do We Know the Bible is True? Vol. 2 is a "must have" resource for churches, libraries, and home study.

Radiocarbon After Four Decades - Ervin Taylor 2013-03-09

Radiocarbon After Four Decades: An Interdisciplinary Perspective commemorates the 40th anniversary of radiocarbon dating. The volume presents discussions of every aspect of this dating technique, as well as chronicles of its development and views of future advancements and applications. All of the 64 authors played major roles in establishment, development or application of this revolutionary scientific tool. The 35 chapters provide a solid foundation in the essential topics of radiocarbon dating: Historical Perspectives; The Natural Carbon Cycle; Instrumentation and Sample Preparation; Hydrology; Old World Archaeology; New World Archaeology; Earth Sciences; and Biomedical Applications.

The Age of the Earth - G. Brent Dalrymple 1991

A synthesis of all that has been postulated and is known about the age of the Earth

Evolution Exposed - Roger Patterson 2008

A creationist's critique of the evolutionary ideas found in the three most popular earth science textbooks used in public schools: [1.] Earth science : geology, the environment and the universe / National Geographic Society ; [authors: Frances Scelsi Hess [and others]]. Teacher wraparound ed. (New York : Glencoe/McGraw-Hill, c2005) -- [2.] Prentice Hall earth science / Edward J. Tarbuck, Frederick K. Lutgens. Teacher's ed. (Needham, Mass. : Pearson Prentice Hall, c2006) -- [3.] Earth science / Mead A. Allison, Arthur T. DeGaetano, Jay M. Pasachoff. Annotated teacher's ed. (Orlando, Fla. : Holt, Rinehart and Winston, 2006).

Earth's Catastrophic Past - Andrew Snelling 2009

Now, the Institute for Creation Research presents the long-awaited update to this seminal work. --

Radioisotopes and the Age of the Earth - Larry Vardiman 2000

This book presents part two of the research results of an eight-year project titled Radioisotopes and the Age of the Earth (RATE). A previous volume presenting part one of the research was published in 2000, titled Radioisotopes and the age of the Earth : a young-earth creationist research initiative. RATE Project sponsors included Institute for Creation Research and Creation Research Society, with start-up support from Answers in Genesis Ministries. Researchers included seven scientists and

one biblical Hebrew scholar: Dr. Steven A. Austin, Dr. Andrew Snelling,

Dr. John Baumgardner, Dr. Eugene F. Chaffin, Dr. Donald B. DeYoung,
Dr. Russell Humphreys, Dr. Larry Vardiman and Dr. Steven W. Boyd.
