

# Child Sexual Abuse And Mental Health In Adolescents And Adults British And Canadian Perspectives

*The Child Abusers* - Colin Pritchard 2004-05-16

\* How can we improve child protection? \* What can we learn from recent child abuse cases and research? \* Who are the child abusers? \* Who kills children? Child abuse horrifies the public, engenders fierce debate in the media, and creates anxiety in even the most experienced professionals. In this book, the author examines the available evidence base in order to challenge the myths and controversies. Readers are offered up-to-date research and case material, to assist in the assessment of risk and physical danger. Emphasis is placed on the importance of the child protection-psychiatry interface and while no absolute answers are offered, the debates around the subject are clearly outlined and suggestions for effective intervention are offered. The Child Abusers is essential reading for professionals and students in the field of child protection, including health and social workers, police, nurses, medics, teachers, psychologists and psychiatrists.

*Victimology* - Rejani Thudalikunnil Gopalan 2022-10-27

The term victim refers to a person harmed, injured, or killed as a result of a crime, accident, or other event or action. Victimology focuses on the victimization in terms of psychological effects, impact on criminal justice system and new policies and it is a major aspect in the area of forensic field. Victimization can occur due to abuse, assault, maltreatment, war, terrorism, crimes and it can happen in different settings like home, school, and public. In the past, more emphasis was given to perpetrators and various theories tried explain the behavior of perpetrator and their offences. Recently, researchers started focusing different aspects of victimology and explored risk factors for becoming victim, reasons for repeated victimization, and forensic, psychological and social dimensions of victims and consequences of victimization. But there is a need for new theories and researches to have more thorough understanding of victimization. The field of criminology dealt with crimes and various theories has developed to explain why crime occurs and more focused on perpetrators. A crime involves perpetrator and victim and not much attention has been given to the victim until recently. What happens to a victim, what are the psychological and social consequences of a harmful act to a victim, vulnerabilities to become a victim are getting serious attention now a days and started influencing the criminal justice system. The psychological and social impacts of victimization may be a short or long duration but the impacts cannot be ignored. The legal remedies and psychological healings are important aspects of victimization. While considering these factors, the book would be focusing on origin and scope of victimology, different types of victimization such as sexual abuse, domestic violence, maltreatment, cyber crimes, war and terrorism, natural calamities, victimization at school and work place, human trafficking, crime against persons, crime against property, white collar crime, elder abuse, victim with disabilities, secondary victim and re-victimization and its psychological impacts and related issues. The book would also focus on victimology and forensic factors and its influence on criminal justice system in addition to the psychological management of victimization.

*Encyclopedia of Canadian Social Work* - Francis J. Turner 2006-01-01

All of us, as Canadians, are touched throughout our lives by some aspect of social welfare, either as recipients, donors, or taxpayers. But despite the importance of the social network in our country, there has been no single source of information about this critical component of our society. Even professionals in the field of social work or social services have not had a comprehensive volume addressing the myriad features of this critical societal structure. The Encyclopedia of Canadian Social Work fills this need. Over five hundred topics important to Canadian social work are covered, written by a highly diverse group of social workers covering all aspects of the field and all areas of the country. Practitioners, policy makers, academics, social advocates, researchers, students, and administrators present a rich overview of the

complexity and diversity of social work and social welfare as it exists in Canada. The principal finding from this project underscores the long-held perception that there is a Canadian model of social work that is unique and stands as a useful model to other countries. The Encyclopedia of Canadian Social Work will be an important source of information, both to Canadians and to interested groups around the world. The Encyclopedia of Canadian Social Work is available in e-book version by subscription or from university and college libraries through the following vendors: Canadian Electronic Library, Ebrary, MyiLibrary, and Netlibrary.

*Psychiatric and Mental Health Nursing for Canadian Practice* - Wendy Austin 2010-01-01

Rev. ed. of: *Psychiatric nursing for Canadian practice* / Wendy Austin, Mary Ann Boyd.

**International Perspectives on Child and Adolescent Mental Health** - N. Singh 2000-06-01

There has been a major shift in the way we conceptualize and provide services to children and adolescents with mental health needs. We are moving away from the traditional disorder-oriented model of treatment to a child-centered, family-focused service delivery system that mandates mental health services in the context of the child's family and social ecology. This new system of care has spawned many variations of the model, including wraparound services, multisystemic treatment (MST), futures planning, and person-centred planning. As systems of care are different across countries and cultures, it is imperative that we share our knowledge and make explicit the lessons we have learned in our attempts to provide services to children and adolescents which focus on improving their quality of life rather than merely treating their psychiatric disorders and psychological problems. There is an urgent need to evaluate the various treatments being offered to children and adolescents with mental health needs. Empirical data on outcomes will determine the funding and delivery of services. As such, the latest research on treatment outcomes needs to be disseminated so that new and validated treatment methods can be implemented rapidly.

*Understanding and Preventing Child Sexual Abuse: Male victims, adolescents, adult outcomes, and offender treatment* - Christopher Bagley 1996

*Creative Therapies with Traumatised Children* - Anne Bannister 2003-10-15

As a probation officer and social worker, Anne Bannister has successfully used creative therapies with abused children for 25 years. Combining her practical experience and recent doctoral research she reflects on how and why these therapies actually work in the healing process. She shows how in 'the space between' children and their therapists, the child and adult can each use their creative skills to aid developmental processes, reverse negative brain patterns and affect positive behavioural changes to heal the damage caused by severe abuse in childhood. The author presents a practical model called the Regenerative Approach to use when assessing and working therapeutically with traumatised children. Her research has implications for those working in the field of children's development and learning, and provides an important new approach for social workers, creative therapists and all those who work with traumatised children.

**Comparative Quantification of Health Risks: Sexual and reproductive health** - Majid Ezzati 2004  
Accompanying CD-ROM contains annex tables detailing population attributable fractions, mortality, and disease burden for selected major risk factors.

**Sexueller Missbrauch** - Bertram Scheufele 2005-11-15

Sexueller Missbrauch ist ein emotional und ideologisch aufgeladenes Thema, das spätestens seit dem Fall Dutroux zum Medienthema avancierte. Die Publikation untersucht anhand dieses Themas massenmediale Problemkonstruktionen und deren Wirkungen auf die Vorstellungen, die Einstellungen und die

Handlungsbereitschaft der Rezipienten. In theoretischer Hinsicht werden nicht nur die faktischen (negativen) Wirkungen der tatsächlichen Berichterstattung, sondern auch die möglichen (positiven) Wirkungen einer alternativen Problemkonstruktion untersucht. In methodischer Hinsicht leistet die Arbeit mit ihrer Kombination aus Inhaltsanalyse, Bevölkerungsbefragung und (Quasi-)Experiment einen Beitrag zu Mehrmethodendesigns.

*Suicidal Behaviour in Adolescents and Adults* - Christopher Bagley 1997

The chapters in this study reflect 15 years of research in the Canadian province of Alberta, a region which has the highest suicide rate in young males in Canada. The book attempts to answer questions such as: what meanings and values do contrasted groups attach to the concept of suicide?; is the greater prevalence of suicidal behaviour in the young reflected in the meanings they attach to suicidal actions?; are young people experiencing more stress than the older generation?; do some forms of child abuse, particularly sexual abuse, have a sequel in suicidal behaviours and related mental health problems in young adult women, and in adolescent males and females; are the struggles for homosexual identity associated with suicidal behaviours in young males; and the role of poor self-esteem.

**Approaches to Teaching Health Care in Social Work** - 1999

**Memory** - Alison Winter 2012-01-16

Picture your 21st birthday. Did you have a party? If so, do you remember who was there? How clear are these memories? Should we trust them? Such questions have fascinated scientists for hundreds of years, and, as Alison Winter shows in this book, the answers have changed dramatically in just the past century.

Child Sexual Abuse and Mental Health in Adolescents and Adults - Christopher Bagley 1995

This text integrates past research in review chapters which pose important questions for researchers and therapists in the field of child sexual abuse. In addition, seven major research studies are reported; five undertaken in Canada, one in Britain, and one comparing sexually abused adolescents in both countries. The groups studied include adults in the general population recalling abuse in childhood; mothers of abuse victims; adolescents in residential care; and adolescent prostitutes. These studies indicate that child sexual abuse frequently has a major, negative and long term impact in terms of impaired mental health. This remains true when a range of other factors (physical and emotional abuse, and family disruption) are taken into account.

*Modern Scientific Evidence* - 2005

**The Irish Journal of Psychology** - 1998

**Child Abusers** - Christopher Bagley 2003-09

This book is about men and women who neglect and abuse children, physically, emotionally and sexually. A number of key themes emerge: Emotional abuse causes the most long-term harm to children, although

combinations of emotional with physical and/or sexual abuse cause the most harm to long-term mental health. Because of the long-term burden which abuse imposes on its victims, it is crucial to intervene effectively with abusers (potential and actual) to prevent them from either beginning abuse, committing further abuse, or entering the victim-to-abuser cycle. Abusers have often experienced physical, emotional or sexual abuse or neglect in their own childhoods. The role of disordered attachments to adult figures in the victim-to-abuser cycle is considered in detail, including ways of effective intervention. Men and women who kill children can be characterized in various ways, and various programmes of intervention can be designed. The cycle of poverty is also considered in detail, a process by which economically poor families beget children who enter a cycle of both economic and psychological poverty, in which risks of all kinds of child abuse and neglect are elevated.

Today's Youth and Mental Health - Soheila Pashang 2018-03-01

This book focuses on the social and intersectional determinants of mental health among youth. The innovative and cutting edge text arises out of multidisciplinary fields of academic, researchers, policy makers, practitioners, artists, and youth. Contributions from Canada, Germany, Portugal, South Korea, Burkina Faso, Afghanistan, and Jamaica addresses the complexities and the opportunities for youth across contexts. Each chapter entails an introduction to the topic, literature review and research findings, discussion, and implications in regard to research, policy, and practice. A unique aspect of the book is the inclusion of a critical response to each chapter's content from diverse stakeholders (such as policy makers, front line workers, practitioners, community activists, artists and youth). The book is a critical and current contribution to exploring youth mental health and, specifically, the ways in which youth learn, live, and resist in a world around them. Topics examined include youth social engagement, civic integration, and political participation at multiple local, regional, and transnational levels.

**Child Maltreatment** - Michael Rothery 2013-01-11

Recognizing child maltreatment as a complex phenomenon requiring multifaceted responses, this volume provides a current and comprehensive assessment of the problem, and argues for an expanded conception of helping on the part of those who work with maltreated children, their families, and their communities. Contributions follow a general outline that addresses current theory and models of practice, and empirical knowledge regarding the problem, intervention, and outcomes. Presenting an up-to-date and encompassing view of how to combat child abuse and neglect, this book discusses the concerns of service providers as well as academics. All the prevalent ways of responding to child maltreatment are addressed, and each is discussed in terms of theory, implementation and evidence for its effectiveness. For use as an undergraduate or graduate level text for courses in child welfare, sociology, family studies, and community psychology. This text would also be insightful for professionals, academics, and policymakers concerned with child welfare.
