*Foundations in Craniosacral Biodynamics, Volume One* - Franklyn Sills 2012-01-10

Biodynamic Craniosacral Therapy (BCST) is commonly seen as the spiritual approach to craniosacral therapy (CST); in fact, BCST as taught by Franklyn Sills, the pioneer in the field, is quite different from conventional CST. Biodynamic work is based on the development of perceptual skills where the practitioner learns to become sensitive to subtle respiratory motions called primary respiration and also to the power of spontaneous healing. Through the Breath of Life, which, Sills asserts, echoes the Holy Spirit in the Judeo-Christian tradition, bodhicitta in Buddhism, and the Tai Chi in Taoism, students of BCST learn to enter a state of presence oriented to the client's inherent ability to heal. In *Foundations in Craniosacral Biodynamics*, Sills offers students and practitioners an in-depth, step-by-step guide to the development of perceptual and clinical skills with specific clinical exercises and explorations to help students and practitioners learn the essentials of a biodynamic approach. Individual chapters cover such topics as holism and biodynamics; mid-tide, Long Tide, Dynamic Stillness and stillpoint process; the motility of tissues and the central nervous system; transference and the shadow; shamanistic resonances; and more. From the Trade Paperback edition.

**Grace in Horror** - Modestus Ngwu, O.P. 2022-11-03

Life is filled with questions for which we struggle to find answers. Most of them tend to arise when facing uncertainty, powerlessness, or hopelessness while lying on a hospital bed. It is not infrequent to hear family members, friends, and even the clergy offering comfort by almost compulsively using phrases like, "Everything happens for a reason," or "It is God's will." While well intended, these words tend to provide little solace to the afflicted. Propelled by the fear of judgment by those whom they hold in high regard, they push down the pain of feeling abandoned by God and adrift in their faith journey. In a quest to seek some comfort, it is easy to find books on grace that are plentiful in favor, joyfulness, and merry-making advice. However, what if there were more to grace? Unapologetic about his own internal struggle while witnessing unspeakable suffering, Fr. Modestus Ngwu produced an honest, insightful, and provocative piece that provides a transformative and compassionate approach to grace. Grounded on authentic pastoral care, he invites the reader to get acquainted with and draw strength from the beautifully crafted and detailed stories derived from his many experiences. The indestructibility of God's infinite grace, hope, and love during periods of suffering are the cornerstones of his book

Grace in Horror. Father Modestus Ngwu's book reveals how grace is truly present and active in what might appear to be utter horror. "Most Rev. Ronald W. Gainer, Bishop of Harrisburg This reflection is highly recommended for anyone in health care, for anyone who asks, why does a good God allow suffering and for anyone who seeks to delve deeper into the mysteries of Grace. It is a compelling read that offers much to reflect and meditate upon." Elizabeth E. Fraunhoffer, MD, OCDS

**Cell Wars** - John Tenhula 2022-05-04

*Cell Wars: An Oral History of Cancer Today* will challenge your assumptions about how a cancer diagnosis and treatment are made in the United States in the early twenty-first century. It takes an uncomfortable subject into the realm of public discussion in ways our parents' generation would never consider. Cancer affects all families, rich or poor. Through the collective voices of over 150 patients and medical professionals interviewed, we learn how we can reduce anxiety with this subject by modeling those who are coping well with this chronic illness. Treating cancer must be both a clinical and psychological protocol - body and head. Today more people live a quality life through advanced treatments and new discoveries. The voices in *Cell Wars* are both compelling and timely.

**Creating Healing Relationships** - Dorothea Hover-Kramer 2011

Healing work isn't just about what happens in the therapy room, but also about how practitioners communicate with integrity and act in their professional and personal relationships. While gifted healers are being trained in hundreds of modalities worldwide, few genuinely professional organizations exist and, in most cases, standards of relational ethics have yet to be codified. In the best of cases, well-meaning practitioners are thereby limited in their work to provide optimal service--and, in the worst cases, they are left vulnerable to potential legal repercussions and relational liabilities. *Creating Healing Relationships* is the first book to seriously address the need for professional standards in the rapidly growing field of energy healing and to demonstrate how the ethic of human caring can be translated into professional standards for safe and successful energy therapy practice.

*Pathways to Wholeness* - Renn Butler 2019-06-06

The exploration of the psyche in non-ordinary states of consciousness provides access to powerful transformative experiences that can lead us towards a more complete experience of being human (the realization of a deeper identity) while also yielding extraordinary insights into the ultimate nature of reality. In this book, Renn Butler explains how to use archetypal astrology as a guide to the transpersonal journey. Described by Stanislav Grof as "the Rosetta Stone of consciousness research," archetypal astrology is based on a correspondence between planetary alignments and archetypal patterns in human experience. Here, by drawing on the work of Grof and Richard Tarnas, Butler systematically describes the archetypal themes and qualities associated with each of the major planetary combinations studied in astrology and considers how these themes might manifest and be supported in deep psychological self-exploration. Based on thirty years of research, *Pathways to Wholeness* is an indispensable reference book for explorers of the inner worlds. *Pathways to Wholeness*:- Explores the intersection between Grofian transpersonal psychology and archetypal astrology - Describes the nature of the planetary archetypes in astrology - Explores the archetypal meaning of all the main planetary combinations as applied to everyday life, perinatal psychology, and transpersonal experience - Provides illuminating case studies and vignettes - Illustrated with mandala

drawings.

Thousands of copies of this book have been sold to schools and practitioners. As a textbook or personal resource, *The Ethics of Caring* clarifies the counter-transference and transference issues in seven life areas including love, truth, insight, and oneness as well as the more well-known areas of ethical issues: money, sex, and power."--Pub. website.

*Energy Healing* - Mary Szczepanski 2016-07-25

Energy healing rebalances the human energy field and helps bring about relaxation and often relief of pain or other symptoms. Working with the vibrations of the energy field and energy centers affects body, mind, and spirit. In *Energy Healing*, author Mary Szczepanski describes simple techniques that can produce profound results when used with intention and focus. In this guide, she: ? provides working definitions of holistic approaches and energy healing; ? offers examples of different types of energy work; ? compares Western and holistic approaches; ? describes the energy field and basic techniques; ? gives preparation suggestions for doing energy work; ? shares examples of client responses and principles of ethical behavior when working with clients; ? addresses self-care and meditation for energy workers; ? discusses special situations such as life transitions, trauma, and distance healing; and ? summarizes information showing how energy healing came to be relevant in current times. *Energy Healing* helps you discover the tools to open yourself to new possibilities and re-pattern health care in the future. It demonstrates how giving or receiving treatments, or practicing self-care, meditation, or holistic work is transformational.

**The Authority of Experience** - John Pickering 2013-12-02

This collection of writings presents contemporary views on the integration of Buddhism in the West. Over the past few decades Buddhism has deepened its presence in the West and as a result teachings and practices are becoming integrated with those of Western psychology in a more productive way. The decline of mechanism and positivism offers new opportunities to bring together Western Buddhist views of the mind and its relationship to its surroundings. Written by psychologists and scholars, the essays discuss many of the difficult questions raised by Buddhism's increased presence. In particular the issue of the balance between authenticity and accessibility is examined. Buddhist traditions are often perceived as inaccessible and too firmly fixed to a cultural framework with some people, especially women, left feeling alienated and undervalued. However, by responding to this by attempting to synthesise Buddhism with the values of contemporary culture can lead to doubts about authenticity and dilution. Examining these issues and many more, the contributors seek to bring Buddhism into a realistic and informed relationship with contemporary Western thought.

*Advancing Relationship-Based Cultures* - Mary Koloroutis 2017-05-19

*Advancing Relationship-Based Cultures* explains and expands a fundamental and often overlooked truth in health care: It is the confluence of relational and clinical competence that advances relationship-based healing cultures. A relationship-based culture is one in which a critical mass of people provides care and service with relational competence. In these cultures, the skills that foster relational competence are actively developed, nurtured, practiced, reinforced, and evaluated. While countless thought leaders have championed the importance of improving relationships, this book provides a practical how-to for the creation and nurturance of healthy relationships in health care. Readers of this book will understand that a strategy that includes improving all relationships will improve all other measures as well. When you empower people, giving them the tools to take excellent care of themselves, one another, and the patients and families in their care, organizations thrive.

*The Psychotherapeutic Framing of Psychedelic Drug Administration* - Dea Siggaard Stenbæk 2023-03-02

**APOCALYPTIC GRACE** - STEPHEN POWELL, MA, MA, LMHC 2011-05-20

Here is a unique exploration of the five eras or Worlds of cultural (socioeconomic, psychological, spiritual) evolution. Stephen Powell, a seasoned anthropologist and psychotherapist, illuminates the hunter/gatherer, horticultural, agrarian, and industrial/technological epochs in unexpectedly fresh and timely ways. Foremost, the diversity of these Worlds is still within us all. World One, reaching back to 50,000 BCE, was a time of widely accepted shamanic assumptions. World Two (10,000 to 3500 BCE) developed small-scale horticulture and tribal cohesion, but also unprecedented social conformity. World Three (from about 3500 BCE) experienced the global rise of caste-structured hierarchies with the World Religions as cultural compensation. Beginning in the 1600s, World Four developed a mechanistic, secularized worldview, accentuated by individualism, popular culture and a capitalist agenda. Finally, Powell describes the beginnings of a new, fifth set of world assumptions — a world without borders. Here we may start to integrate humanitarian aspects of the preceding Worlds, embracing multiculturalism without losing cultural integrity. Moreover, the wisdom traditions from each time appear to hold seed truths of the profound changes that mark the end-time and the beginning of each World. *Apocalyptic Grace* leads the reader on a stunning survey of this remarkable journey.
