Daughters Need Fathers, Too Tina M. Kelly Ph. D. 2017-12-22 Fathers are important role models for their daughters. They are the first men that their daughters relate to, and the relationships with their fathers set the tone for any relationships their daughters have in the future. There is no doubt that fathers-daughter relationships impact daughters both positively and negatively. There are similarities between the father-daughter relationships, the daughters' perception of themselves, and how other men perceive them to be. Daughters drastically need their fathers support, acceptance, and love. Daughters who have positive relationships with their fathers are left with strong values, confidence, and high self-esteem. The daughters who have experience failed relationships with their fathers are in need for compassionate relationships with other men and other people who are vulnerable to their plan. Daughters who suffer from negative relationships should learn to place high values on themselves, acknowledge that they are somebody, and that they hold the key to their own happiness. Many people do not identify the impact fathers have on their daughters' lives. As a result, these daughters can go through endlessly with no expectations of healing from the damage caused by lack of positive relationships with their fathers. If one is to comprehend the impact of father-daughter relationships, one must be open to comprehend the effect of that relationships. Fathers' impacts their relationship with their daughters, especially the role fathers play after divorce. After parents' divorce, daughters have various feelings of support, love, comfort, discomfort, honor, and disappointment. When fathers are part of their daughters lives, they grow up feeling safe, secured, and protected, because their fathers were always around. Daughters needs their fathers to be the standard against which they will judge all men.

Do Fathers Matter? Paul Raeburn 2014-06-03 For too long, we've thought of fathers as little more than sources of authority and economic stability in the lives of their children. Yet cutting-edge studies drawing unexpected links between fathers and children are forcing us to reconsider our assumptions and ask new questions: What changes occur in men when they are "expecting"? Do fathers affect their children's language development? What are the risks and rewards of being an older-than-average father at the time the child is born? What happens to a father's hormone levels at every stage of his child's development, and can a child influence the father's health? Just how much do fathers matter? In *Do Fathers Matter?* the award-winning journalist and father of five Paul Raeburn overturns the many myths and stereotypes of fatherhood as he examines the latest scientific findings on the parent we've often overlooked. Drawing on research from neuroscientists, animal behaviorists, geneticists, and developmental psychologists, among others, Raeburn takes us through the various stages of fatherhood, revealing the profound physiological connections between children and fathers, from conception through adolescence and into adulthood—and the importance of the relationship between mothers and fathers. In the process, he challenges the legacy of Freud and mainstream views of parental attachment, and also explains how we can become better parents ourselves. Ultimately, Raeburn shows how the role of the father is distinctly different from that of the mother, and that embracing fathers' significance in the lives of young people is something we can all benefit from. An engrossing, eye-opening, and deeply personal book that makes a case for a new perspective on the importance of fathers in our lives no matter what our family structure, *Do Fathers Matter?* will change the way we view fatherhood today.

The Wounded Woman Linda Schierse Leonard 1982-01-01 This book is an invaluable key to self-understanding. Using examples from her own life and the lives of her clients, as well as from dreams, fairy tales, myths, films, and literature, Linda Schierse Leonard, a Jungian analyst, exposes the wound of the spirit that both men and women of our culture bear—a wound that is grounded in a poor relationship between masculine and feminine principles. Leonard speculates that when a father is wounded in his own psychological development, he is not able to give his daughter the care and guidance she needs. Inheriting this wound, she may find that her ability to express herself professionally, intellectually, sexually, and socially is impaired. On a broader scale, Leonard discusses how women compensate for cultural devaluation, resorting to passive submission (“the Eternal Girl”), or a defensive imitation of the masculine (“the Armored Amazon”). *The Wounded Woman* shows that by understanding the father-daughter wound and working to transform it psychologically, it is possible to achieve a fruitful, caring relationship between men and women, between fathers and daughters, a relationship that honors both the mutuality and the uniqueness of the sexes.

Daddy: Reflections of Father-Daughter Relationships K E Garland 2018-05-25 A father's presence is important in a daughter's life. He is the first man a little girl sees and knows. He demonstrates how men relate to women. But what happens when the father-daughter relationship is dysfunctional? Daddy answers that question. Included are fourteen memoirs that describe the impact a failed father-daughter relationship can have. These women share essays and narratives that detail various stages of breakdown. Whether an event occurred in childhood, adolescence, or adulthood, each story explains how their father's physical, emotional, or psychological abandonment has affected them. The book is separated into two parts. Part I shows the proverbial truth in the phrase, hurt people hurt people. While some stories confirm why or how men mistreat their daughters, others show how daughters sometimes internalize neglect and continue the cycle either with the relationship they have with themselves, or others. Part II illustrates how compassion can lead towards a path of inner peace and happiness, no matter the state of the relationship.

Father-Daughter Relationships Linda Nielsen 2012-05-04 The first research-based text that focuses on the impact of the father-daughter relationship, this provocative book examines the factors that can strengthen or weaken these relationships and the impact that these relationships have on society. The research is brought to life with compelling personal stories from fathers and daughters, including well-known celebrities and politicians. Controversial questions engage the reader and film lists and website resources demonstrate the relevance of the research. Boxed quizzes and questionnaires show students how the research can be applied to their own lives while others highlight the relationships between actual fathers and daughters. Bold faced terms, a conclusion, and review questions keep readers focused on the key concepts. How these relationships are often ignored or denigrated in the media and in some mental health and legal systems is examined. The hope is that readers will apply the research to their own families and/or work. The book addresses: What is "good" fathering? How do daughters influence their fathers' well-being? How do fathers affect their daughters' social, academic, athletic, and psychological development? How are problems such as depression, eating disorders, and teenage pregnancy related to the quality of these relationships? How are father-daughter relationships in ethnic and racial groups unique? How do incarceration, abuse, gay or lesbian relationships, military service, immigration, and poverty affect father-daughter relationships? The book opens with the importance of the father's role on daughters and the changing patterns of these roles. Chapter 2 examines the myths and misconceptions of father-daughter relationships including how they are portrayed in the media and the differences between parenting styles. Chapter 3 explores the behaviors that constitute "good" fathering. Scales used to measure "good" fathering are included. How fathers affect their daughters' social, academic, intellectual, athletic, and psychological development is then considered. Factors that can weaken father-daughter relationships, such as divorce, including various theoretical perspectives, are explored in chapters 5 and 6. Father-daughter relationships of racial or ethnic minorities and an array of potentially destructive situations that affect these relationships are the focus of chapters 7 and 8. The impact of fathers who are incarcerated, abusive, alcoholics, gay, or sperm donors are considered. The book concludes with suggestions on where we go from here. Intended as a supplemental text for upper-level undergraduate or graduate courses on father-daughter relationships and/or parenting taught in human development, family studies, psychology, sociology, counseling, social work, and women's studies, this practical book also appeals to mental health practitioners, social workers, legal professionals, and school counselors interested in these relationships.

The Language of Love and Guilt Ruth Wodak 1986-01-01 Although mother and daughter are two central female roles, they have rarely been investigated. The relationship is specific, certainly different than the mother-son or father-daughter relationships. And this difference manifests itself in sex-specific language behavior. Despite 'eternal' features of the mother-daughter relationship, its quality is affected by individual psychological and by sociocultural variables. Thus, investigations took place in two big cities with very different structures and traditions: Vienna and Los Angeles. This is the first cross-cultural study which reflects and combines multiple linguistic, socio-psycholinguistic and text linguistic categories, approaches and methods to be able to investigate such an important topic as family relationships and the 'place' of women nowadays in our societies.

Surviving and Thriving in Stepfamily Relationships Patricia L. Papernow 2013-06-07 Surviving and Thriving in Stepfamily Relationships draws on current research, a wide variety of clinical modalities, and thirty years of clinical work with stepfamily members to describe the special challenges stepfamilies face. The book presents the concept of "stepfamily architecture" and the five challenges it creates, and delineates three different levels of strategies—psychoeducation, building interpersonal skills, and intrapsychic work—for meeting those challenges in dozens of different settings. The model is designed to be useful both to stepfamily members themselves and to a wide variety of practitioners, from a highly trained clinician who needs to know how and when to work on all three levels, to a school counselor or clergy person who may work on the first two levels but refer out for level three. It will also be useful to educators, judges, mediators, lawyers and medical personnel who will practice on the first level, but need to understand the other two to guide their work.

In-law Relationships Geoffrey L. Greif 2020-11-06 Marriage is a major step in a relationship, and each member of that newly joined pair brings with them their own existing family and the corresponding complexity and richness of in-law relationships. These are multi-generational, multi-layered, and, like a kaleidoscope, a shifting amalgam of emotional colors. Exceptionally important, in-law relationships can be joyous and comforting. They can also be complicated, contentious, and disappointing. These ties serve as a model for how to stay connected across generations for the well-being of grandparents, parents, and grandchildren, and as a bellwether for what to avoid. Drawing on interviews and survey data with more than 1,500 mothers-in-law, fathers-in-law, daughters-in-law, and sons-in-law, the book describes how these complicated and highly significant relationships develop over time. Geoffrey L. Greif and Michael E. Woolley focus on the relationships between mothers-in-law and daughters-in-law as well as fathers-in-law with sons-in-law. They describe the struggles as well as the triumphs that people encounter with these relationships from the perspectives of both generations and suggest ways to improve the relationships. To improve in-law relationships, Greif and Woolley present action-oriented family therapy theories based on the insight, communication, boundary building, and narratives that family members wish to create. They also explore how these relationships change with the normal transitions of marrying into the family, having children/grandchildren, and aging. In-law Relationships describes highly successful and nurturing connections as well as those that are troubled and distant. The resulting book offers a variety of clinical lenses to help readers of all backgrounds focus on and, if needed, repair in-law relationships.
