**Gender, Education and Employment** - Hans-Peter Blossfeld 2015-10-30

For much of the twentieth century, women lagged considerably behind men in their educational attainment. However, in recent decades, young women have become an important source of human capital for labor markets in modern societies, as well as potential competitors to the male workforce. This book asks whether or not women have been able to convert their educational success into gains on the labor market. The expert contributors address the topic on a comparative level with discussions centred on gendered school-to-work transitions and gendered labor market outcomes. Thereafter they analyze the country-specific implications of the gender redress from a wide range of countries including the USA, Russia and Australia. This enlightening book will appeal to graduates and postgraduates studying social policy, education, the labor market, inequality and gender. It will also be of interest to experts in the fields of sociology, education, political science and economics and those interested in educational research.

*Encyclopedia of Social Problems* - Vincent N. Parrillo 2008-05-22

From terrorism to social inequality and from health care to environmental issues, social problems affect us all. The Encyclopedia will offer an interdisciplinary perspective into these and many other social problems that are a continuing concern in our lives, whether we confront them on a personal, local, regional, national, or global level.

**The Boundaryless Career** - Michael B. Arthur 2001-07-26

Organizational restructuring and global, hypercompetition have revolutionized careers and destroyed the traditional blueprint for advancement and career success. This book details the new forms work takes in the new organizational era where worker mobility has

become critical to the well-being and learning of both people and firms. The Boundaryless Career approaches the new principle of the boundaryless career in five directions. The first section helps the reader explore the nature of boundaryless careers by highlighting some of their essential elements. The second section turns to competitive advantage and the role of workers' knowledge. The third section concentrates on the role of the social structure in the organizing of work. The fourth section turns to focus on how boundaryless careers affect personal development and growth. The fifth section addresses the demands boundaryless careers create for schools, communities, and other social institutions. Introductory and concluding chapters by the editors offer frameworks for conceptualizing careers now and in the future. The Boundaryless Career provides a conceptual map of new career and employment forms to the prospective benefit of people making career choices, companies re-crafting human resource practices, schools and universities re-considering their roles, and policy-makers concerned with regional or national competitiveness. It will be essential reading for scholars in a range of social science disciplines spanning themes of economics, management, education, organizational behavior, and the psychology and sociology of work. It will also appeal broadly to free thinkers interested in the changing nature of careers and employment as both people and firms tackle the realities of increasingly open markets and global competition.

*Key Issues in Women's Work* - Catherine Hakim 2016-09-17

Women's employment is one of the most widely-discussed and often-misunderstood issues of modern society. Are women today oppressed, or do they have the best of both worlds? Do women have to go out to work to gain equality with men, or do they already do more than their share of

domestic work, caring work and voluntary work as well as work in the informal economy? Do women seek careers on the same terms as men, or are they content to be dependent wives or secondary earners taking jobs on a short-term basis? How important is job segregation in explaining the 20% pay gap between men and women? Have equal opportunities laws had any real impact? Are women in Europe lagging behind, or are they at the forefront of developments in modern societies? This new updated edition of Catherine Hakim's classic text addresses all the key issues currently debated in relation to women's work - in the domestic sphere, as well as paid employment. Dr Hakim tests the power of patriarchy theory and preference theory against economic theories. Sex discrimination, work-life balance, part-time work, flexible hours, homeworking, career patterns across the life cycle, labour mobility, labour turnover, the returns to education, occupational segregation, the pay gap, the glass ceiling, and the impact of European Union policies are all considered. Analysis of historical developments over the twentieth century, based on censuses, is complemented by case studies of people working in occupations undergoing dramatic change. Throughout the book, comparisons are drawn between the USA, Britain, other European countries, Canada, Australia, and also China, Japan and other Far Eastern societies. The analysis draws on sociology, economics, psychology, labour law, history and social anthropology to conclude that the diversity of women's life goals and lifestyle preferences is increasing. This explains the growing polarisation of women's employment and many contradictory recent research results.

**The Boundaryless Career** - Michael Bernard Arthur 2001

This book explores the ways in which people's work careers are changing as the organizations in which they work change. The old concept of the firm as a self-contained entity interacting with its customers has been replaced by the reality of firms whose boundaries have given way to new alliances with suppliers and other outside organizations.

*Women in Scientific Careers Unleashing the Potential* - OECD 2006-11-13

This publication presents the proceedings of a

recent international workshop to assess the causes behind the low participation of women in scientific careers, and to identify good practice policies to attract, recruit and retain women in science.

**Women and Work** - Sonia Carreon 2013-11-26  
First Published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

**Psychology of Gender Identity** - Janice W. Lee 2005

Gender encompasses biological sex but extends beyond it to the socially prescribed roles deemed appropriate for each sex by the culture in which we live. The gender roles we each carry out are highly individualistic, built on our biological and physical traits, appearance and personality, life experiences such as childhood, career and education, and history of sexual and romantic interactions. Each element influences perceptions and expectations. Gender-related experiences influence and shape the ways we think about others and ourselves including self-image, behaviour, mood, social advancement and coping strategies. This new book brings together leading international research devoted to this subject.

**Education, Competence Development and Career Trajectories** - Sabine Weinert

2023-04-13

This Open Access book presents the results of an interdisciplinary research program to utilize data from the multicohort German National Educational Panel Study (NEPS), which included over 100.000 participants in six nationally representative panel studies. Renowned researchers from the fields of sociology, psychology, educational science, economics, and survey methodology have used the (longitudinal) data for their substantive and/or methodological questions and present important results of their research projects. This edited volume contains contributions from the following four topics: (1) Competence Development: Individual Characteristics, Learning Environments, and other Contextual Factors, (2) Educational Transitions and Pathways: Influencing Factors and Outcomes, (3) Vocational Training and Labour Market, and (4) Individuals with Migration Background. It provides essential insights for researchers, postdocs, PhD students, and university students of different scientific

disciplines interested in educational sciences as well as for policy makers who have to deal with educational problems in modern societies.

*Gender and STEM: Understanding Segregation in Science, Technology, Engineering and Mathematics* - Maria Charles 2018-12-06

This book is a printed edition of the Special Issue "Gender and STEM: Understanding Segregation in Science, Technology, Engineering and Mathematics" that was published in Social Sciences

**Women and Men in Management** - Gary N. Powell 2003

Table of contents.

*Revolving Doors* - Jerry A. Jacobs 1990

*Economics of Gender Inequality* - Michael Grimm 2020-03-06

Stephan Klasen is considered one of the most distinguished scholars on gender economics in the 21st century. Over the past 25 years, he has tirelessly worked to understand the complex phenomena of gender inequality: From counting the number of missing women in the world and shedding light on why women go missing, to showing that leaving girls out of school not only deprives them, but also robs society of the opportunity to thrive on the talents of its entire population; from understanding why equal rights and rising incomes everywhere have not resulted in women participating more at work, to measuring gender inequality in its various dimensions. This volume, a collection of some of Stephan Klasen's most important writings on the topic of gender inequality, honours his academic life and gives the reader an in-depth insight into both what we know and don't (yet) know about the economics of gender inequality.

*The Future of Market Transition* - Kevin T Leicht 2002-11-26

The collapse of the state-controlled economies of the former Eastern Bloc will certainly change the way the global economy operates. Bringing together scholars from a wide variety of theoretical perspectives, different nations and different empirical research traditions, this title examines the ongoing transition and the implications of market transitions for individual life chances, state economic policy and social stratification systems. The volume includes scholarship that focuses on both single nation

and cross-national research, plus research contributions that compare state socialist/former state socialist political economies with conditions elsewhere in the world.

**Spatial and Social Disparities** - John Stillwell 2010-06-14

Inequality is one of the major problems of the contemporary world. Significant geographical disparities exist within nations of the developed world, as well as between these countries and those referred to as the 'South' in the Bruntland Report. Issues of equity and deprivation must be addressed in view of sustainable development. However, before policymakers can remove the obstacles to a fairer world, it is essential to understand the nature of inequality, both in terms of its spatial and socio-demographic characteristics. This second volume in the series contains population studies that examine the disparities evident across geographical space in the UK and between different individuals or groups. Topics include demographic and social change, deprivation, happiness, cultural consumption, ethnicity, gender, employment, health, religion, education and social values. These topics and the relationships between them are explored using secondary data from censuses, surveys or administrative records. In volume 1 the findings of research on fertility, living arrangements, care and mobility are examined. Volume 3 will focus on ethnicity and integration.

**The Contextual Challenges of Occupational Sex Segregation** - Stephanie Steinmetz 2011-12-15

This study untangles the complex interplay of individual and contextual factors shaping cross-national differences in horizontal and vertical occupational sex segregation. It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society. Following this approach, Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross-national differences in occupational sex segregation. She offers insights into the positioning of 21 EU Members States, particularly of former CCE countries. Based on advanced multi-level models, the study shows that institutional factors, such as the organization of educational systems, post-

industrial developments, social policies, and the national 'gender culture', play a crucial role in shaping sex segregation processes apart from individual factors. The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions: some reduce horizontal segregation while at the same time aggravating the vertical aspect. Finally, the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market.

*Feminism Confronts Homo Economicus* - Martha Fineman 2005

Drawing on the latest thinking in the fields of feminist legal theory, critical legal studies, and feminist economics, the essays critique the notion that legal and policy decision should be made solely through the lens of economics.

*Gender Segregation in Vocational Education* - 2015-11-20

This book investigates the contexts of gender segregation in vocational education (VET) from a cross-national, comparative perspective. It tackles questions about occupational expectations, gendered pathways to applied fields of study, feminization of occupations and the relationship between educational choice and opportunity structures.

*The Changing Adolescent Experience* - Jeylan T. Mortimer 2002-09-05

The path adolescents take from childhood to adulthood is a product of social, economic, political, and technological forces. These forces

may facilitate youth's preparation to become healthy adults, or they may leave youth unprepared for adulthood. Knowledgeable projections are vital in shaping the agenda for research; for alerting educators, policy makers, and practitioners to new issues; and for formulating thoughtful responses to emerging dilemmas. This book focuses upon the future of adolescence in postindustrial societies. The authors identify some ominous societal changes that will affect youth: unstable job markets, competition for public resources due to an aging population, and widening income gaps between 'information workers' and low-skill workers. But they also observe opportunities created by information technology, innovations in health service delivery and criminal-justice rehabilitation, and the resourcefulness of a new generation. This volume examines these and other macro-structural changes that will impact adolescents' lives and their futures as adults.

*Doing "Women's Work"* - Christine L. Williams 1993-08-19

This book summarizes the state of our knowledge on the effects of men in women's professions - effects on the men, on their views of masculinity, on the occupations and on the women they work with. Do men get preferential treatment in these positions? Do they receive higher salaries? Or are they treated the same as their women colleagues? Through a series of statistical and demographic analyses, as well as case studies of men in professions such as teaching, secretarial work, care-giving and stripping, the contributors give a glimpse of the role of these men in bolstering or undermining the gendered assumptions of occupational sex segregation in the workplace.
