You may wonder, "Why a birth control guide?" Birth control can be fabulous when couples are well-

informed and using a method that is right for them. But most methods are not easy to use and many doctors fail to warn patients about the potential side effects and health risks of common contraceptives. This book contains all the facts that your sex ed teacher didn't know and doctor won't tell you.

**Sexuality and Birth Control in Community Work** - Elphis Christopher 1987

*Fertility Control in a Risk Society* - Zakir Husain 2016-11-04

This book analyses the reasons for relying on behavioural contraception methods among urban 'elites' in India and examines their efficacy in controlling fertility. It also traces variations in contraception choice over the reproductive cycle of women. Although researchers and policy makers generally equate reliance on behavioural contraceptive methods with low levels of education and awareness and lack of desire to control fertility, this perception has been questioned in recent years. The authors' analysis of the first three rounds of the National Family Health Survey (NFHS) data in India reveals that behavioural contraceptive methods are popular in eastern India. Moreover, it is urban educated women who rely on behavioural methods, and are apparently able to regulate fertility quite effectively with such methods. NFHS data, however, has some limitations and this motivates the authors to explore birth control methods through primary surveys of currently married graduate women in Kolkata. The use of behavioural contraception methods is a little researched area globally and this is the first book focusing on the topic in India.

**Birth Control, Sex, and Marriage in Britain 1918-1960** - Kate Fisher 2006-07-13

The first half of the twentieth century witnessed a revolution in contraceptive behaviour as the large Victorian family disappeared. This book offers a new perspective on the gender relations, sexual attitudes, and contraceptive practices that accompanied the emergence of the smaller family in modern Britain. Kate Fisher draws on a range of first-hand evidence, including over 190 oral history interviews, in which individuals born between 1900 and 1930 described their marriages and sexual relationships. By using individual testimony she challenges many of the key conditions that have long been envisaged by demographic and historical scholars as necessary for any significant reduction in average family size to take place. Dr Fisher demonstrates that a massive expansion in birth control took place in a society in which sexual ignorance was widespread; that effective family limitation was achieved without the mass adoption of new contraceptive technologies; that traditional methods, such as withdrawal, abstinence, and abortion were often seen as preferable to modern appliances, such as condoms and caps; that communication between spouses was not key to the systematic adoption of contraception; and, above all, that women were not necessarily the driving force behind the attempt to avoid pregnancy. Women frequently avoided involvement in family planning decisions and practices, whereas the vast majority of men in Britain from the interwar period onward viewed the regular use of birth control as a masculine duty and obligation. By allowing this generation to speak for themselves, Kate Fisher produces a richer understanding of the often startling social attitudes and complex conjugal dynamics that lay behind the vast changes in contraceptive behaviour and family size in the twentieth century.

*The Long Sexual Revolution* - Hera Cook 1999

[The Billings Method](#) - Evelyn Billings 1993

[Sex, Fertility, and Birth Control](#) - Isadore Rossman 1967

**Choice and Circumstance** - Kristen A. Moore 2021-12-24

First published in 1986. Forty five percent of black women have at least one child by the time they are twenty compared to 19 percent of white women. Eight-six percent of the births to black teens occurred to unmarried mothers compared to 30 percent among whites. Research shows that teenage childbearing has negative medical, social, and economic consequences and that women who first gave birth as teenagers are more likely to raise their families in poverty. In *Choice and Circumstance* the authors explore three factors underlying the racial differences in the incidence of early childbearing; information about sex, pregnancy and contraception; need for family planning and abortion services; and motivation for postponing parenthood, including aspirations for schooling, employment plans and desire for children within marriage. They consider which teens postpone sex and pregnancy and why, and whether the kinds of motivation necessary to prevent early pregnancy vary by race in the United States, perhaps explaining the race differences in early childbearing.

*Sex, Contraception, and Motherhood in Jamaica* - Eugene B. Brody 1981

*Human Sexuality* - Anne Bolin 2009-09-10

*Human Sexuality: Biological, Psychological, and Cultural Perspectives* is a unique textbook that provides a complete analysis of this crucial aspect of life around the world. Utilizing viewpoints across cultural and national boundaries, and deftly weaving evolutionary and psychological perspectives, Bolin and Whelehan go beyond the traditional evolution and primatology to address cross-cultural and contemporary issues, as well as anthropological contributions and psycho-social perspectives. Taking into account the evolution of human anatomy, sexual behavior, attitudes, and beliefs, this far-reaching text goes beyond what is found in traditional books to present a wide diversity of beliefs, attitudes, and behaviors found globally. In addition to providing a rich array of photographs, illustrations, tables, and a glossary of terms, this extraordinary textbook explores: pregnancy and childbirth as a bio-cultural experience life-course issues related to gender identity, sexual orientations, behaviors, and lifestyles socioeconomic, political, historical, and ecological influences on sexual behavior early childhood sexuality, puberty and adolescence birth control, fertility, conception, and sexual differentiation HIV infection, AIDS, AIDS globalization and sex work Fusing biological, socio-psychological, and cultural influences to offer new perspectives on understanding human sexuality, its development over millions of years of evolution, and how sexuality is embedded in specific socio-cultural contexts, this is the text for educators and students who wish to understand human sexuality in all of its richness and complexity.

**Sex and Destiny** - Germaine Greer 1984

The author examines customs and attitudes toward fertility, chastity, promiscuity, abortion, contraception, and infanticide.

**Sex and the Population Crisis** - John Alexander Loraine 1970

**The Long Sexual Revolution** - Hera Cook 2004-02-05

In this book Hera Cook traces the path of sexuality in England, and shows how its route was determined by the gradual exertion of control over fertility. Most sexual activity had major economic and social costs, the most fundamental of which was the physical cost of children upon women's bodies. Around 1800 birth rates reached historical heights. Using a combination of demographic and qualitative sources, Dr Cook examines the connection between the struggle to lower fertility and the increasing repression of sexuality throughout the nineteenth century. Contraception became a viable option in the early twentieth century. The book charts the resulting slow relaxation of attitudes to sexuality and the remaking of heterosexual physical behaviour, culminating in the sexual revolution of the 1960s.

[Nationalizing Sex](#) - Richard Togman 2019-02-13

Government sponsored breeding programs, medals of motherhood, forced abortions, and surgical sterilization on park benches--all of these policies have come out of government efforts to nationalize sex and harness procreation as a tool of the state. Over 170 countries (or 85% of governments) worldwide have active policies designed to manipulate the fertility of their citizenry with the aim of influencing the rate of growth of their populations. While over 90% of least developed states are trying to combat population growth with policies designed to reduce fertility, over two-thirds of all developed countries are actively crafting legislation to increase their populations. Despite over a hundred years of relative failure and innumerable studies questioning the viability and utility of government attempts to manipulate the fertility rate of the population as a whole, the majority of governments worldwide continue to uphold and develop such policies. What drives government to try to control how many children people will have? *Nationalizing Sex* traces why population emerged as an object of governance and how natalist policy has changed over time and place, using case studies from France, Germany, Russia, India, and China. It analyzes the origins, growth, and development of fertility as a national and international political issue, the rise and fall of the narratives used to ascribe meaning to natality, and the global proliferation of oddly similar policies adopted by widely dissimilar states. As importantly, it explains why, after hundreds of years, countries continue to pursue natalist policy even though it has been such a widespread failure.

*Women's medicine* - Caroline Rusterholz 2020-12-01

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. *Women's medicine* highlights British female doctors' key contribution to the production and

circulation of scientific knowledge around contraception, family planning and sexual disorders between 1920-70. It argues that women doctors were pivotal in developing a holistic approach to family planning and transmitting it across borders, playing a more prominent role in shaping scientific and medical knowledge than previously acknowledged. Illuminating women doctors' agency in the male-dominated field of medicine, this book reveals their practical engagement with birth control and later family planning clinics in Britain, their participation in the development of the international movement and their influence on French doctors. Drawing on a wide range of archived and published medical materials, Rusterholz sheds light on the strategies British female doctors used and the alliances they made to put forward their medical agenda and position themselves as experts and leaders.

Into a New World - 1998

**Fertility, Family Planning, and Women's Health** - Joyce C. Abma 1997

The report shows data on a wide range of topics, including pregnancy and birth, marriage, divorce,

cohabitation, sexual intercourse, contraception, infertility, use of family planning and other medical services, and health conditions and behavior. The data are based on in-person interviews with a national sample of 10,847 women 15-44 years of age. Among the results: the proportion of teenagers who have ever had sexual intercourse decreased slightly between 1990 and 1995; and about 8 percent of women reported that their first intercourse was not voluntary. *Managing Reproductive Life* - Soraya Tremayne 2001

In 1999, the Institute of Social and Cultural Anthropology at the University of Oxford held a workshop on the social dynamics of human reproduction. This volume contains 12 papers from scholars in Britain and the U.S. that were originally presented at that workshop. Topics include, for example, motherhood among young prostitutes in Thailand, the meaning of children in Hong Kong, and the reproductive health of refugees.
