Cosmopolitan Modernisms - Kobena Mercer 2005-08-19

Moments of crisis and innovation in modernism's cross-cultural past, from the reception of modernist art in colonial India to the experience of African American artists in the New York art world of the 1950s. This first book in the Annotating Art's Histories series revisits the period in which modernist attitudes took shape, examining the ways in which a shared history of art and ideas was experienced in different nations and cultures. Original essays by leading art historians and curators trace the dynamic interplay of cultures across the story of modern art, looking at moments of crisis and innovation in modernism's cross-cultural past. An account of colonialism and nationalism in Indian art from the 1890s to the 1920s, for example, suggests that cultural identities are constantly modifying one another in the very moment of their encounter and points to primitivism as a counter-discourse to modernism. A collision between modernism and colonialism in the design of a Bauhaus model housing project reveals the volatile conditions of European modernism in the 1930s. Discussions of the abstract painting of Norman Lewis and the collages of Romare Bearden illustrate the conflicted experiences and multiple affiliations of African American artists in the New York art world of the 1940s and 1950s. The first English translation of an influential essay in the Brazilian neoconcrete movement of the 1950s takes up concerns similar to those of North American minimalism in the 1960s. These and the other journeys into modernism's past described in *Cosmopolitan Modernisms* return to our contemporary moment with questions about modern art and modernity that we are only beginning to ask. [Sex and Race in the Black Atlantic](#) - Daniel McNeil 2010-01-27

This is the first book to place the self-fashioning of mixed-race individuals in the context of a Black Atlantic. Drawing on a wide range of sources and a diverse cast of characters - from the diaries, letters, novels and plays of femme fatales in Congo and the United States to the advertisements, dissertations, oral histories and political speeches of Black Power activists in Canada and the United Kingdom - it gives particular attention to the construction of mixed-race femininity and masculinity during the twentieth century. Its broad scope and historical approach provides readers with a timely rejoinder to academics, artists, journalists and politicians who only use the mixed-race label to depict prophets or delinquents as "new" national icons for the twenty-first century.

Feminism and Folk Art - Eli Bartra 2019-06-04

It examines examples of women's creativity within male-dominated societies and offers an analysis of different art forms, including clay figures, baskets, lacquer work, and dolls.

[El desaliento del guerrero](#) - Jesús Martínez Oliva 2005

Se recogen y estudian los debates teóricos sobre el género a finales del siglo XX, que situaron a la masculinidad en el punto de mira, y se aborda la producción artística en la que la virilidad hegemónica queda desplazada por las hasta entonces consideradas masculinidades marginales o abyectas y por las visiones constructivas y performativas de la masculinidad, que insisten en su desnaturalización y la presentan como una mascarada y una puesta en escena.

Race, Sex and Gender in Contemporary Art - Edward Lucie-Smith 1994

One of the most significant developments in the art world of the 1970s, 1980s, and 1990s has been the rise to prominence of art made by minority cultures. *Race, Sex, and Gender* examines the controversial challenges these groups present to today's artists and critics. Works by African-Americans, feminists, homosexuals, and Latino-Hispanics - once considered marginal - have come to transform contemporary art. As this so-called minority art has moved into a more dominant position, museums - once official symbols of culture - have formed a more secure alliance with the avant-garde. The result is that "minority" art has become, in effect, our most major concern. In this provocative volume, art historian Edward Lucie-Smith seeks to determine how these different groups came to acclaim, and how they have revolutionized the kind of art shown in museums and galleries. Cindy Sherman, Robert Mapplethorpe, Jean-Michel Basquiat, Nancy Spero, Hannah Wilke, Larry Fuente, Cheri Samba, and Martin Puryear are among those artists whose work is pictured and discussed as Lucie-Smith probes issues of racial identity, sexual orientation, and gender politics. Statements from the artists as well as from theoreticians and critics are given, offering additional commentaries on these crucial new topics. Organized by profusely illustrated chapters devoted to specific minority groups, *Race, Sex, and Gender* is a timely introduction to the issues that are shaping contemporary art.

[Contemporary Social Theory](#) - Anthony Elliott 2014-02-10

In this comprehensive, stylish and accessible introduction to contemporary social theory, Anthony Elliott examines the major social theoretical traditions. The first edition set new standards for introductory textbooks, such was the far-reaching sweep of social theorists discussed - including Theodor Adorno, Herbert Marcuse, Michel Foucault, Jacques Lacan, Jacques Derrida, Anthony Giddens, Pierre Bourdieu, Julia Kristeva, Jurgen Habermas, Judith Butler, Slavoj Zizek, Manuel Castells, Ulrich Beck, Zygmunt Bauman, Giorgio Agamben and Manuel De Landa. From the Frankfurt School to globalization, from feminism to the network society, this new edition has been fully revised and updated, taking into account the most recent developments in social theory. The second edition also contains a completely new chapter on classical social theory, allowing students to contextualise the modern debates. Like its predecessor, the

This new edition will prove a superb textbook with which to navigate the twists and turns of contemporary social theory as taught in the disciplines of sociology, politics, history, cultural studies and many more.

Encyclopedia of Violence, Peace, and Conflict - 2008-09-05

The 2nd edition of Encyclopedia of Violence, Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly-regarded 1st edition (1999), and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over, the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies, and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism and Political Assassinations, the Encyclopedia comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles. In his Preface to the 1st edition, Editor-in-Chief Lester Kurtz wrote: "The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace, and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena." Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set Many brand-new articles alongside revised and updated content from the First Edition Article outline and glossary of key terms at the beginning of each article Entries arranged alphabetically for easy access Articles written by more than 200 eminent contributors from around the world

Manuale del curatore - Domenico Scudero 2016-03-20T00:00:00+01:00

L'arte contemporanea oggi prevede che della sua gestione se ne occupi un professionista altamente specializzato: il Curator. Questa figura di raccordo fra lo storico e l'artista gestisce le grandi mostre internazionali, i grandi musei sino alla figura del curatore indipendente. Nei casi dei più noti curatori d'arte

contemporanea questo profilo professionale ha raggiunto la consistenza di vere e proprie imprese connesse con l'informazione e la cultura di riferimento di singoli stati e collettività di stati. Manuale del curatore. Teoria e pratica della cura critica di Domenico Scudero è il testo che consente di accedere con facilità ad una serie di dati relativi alla storia recente della cura critica, dagli anni dell'Impressionismo sino ai nostri giorni, per comprendere difficoltà ed astuzie di un mestiere, quello del Curator, complicato dal suo aspetto culturale e manageriale. Il Manuale raccoglie in due sezioni testi storici e testi critici suddivisi per aree d'appartenenza: nel primo caso la storia dell'arte da un punto di vista curatoriale, nella seconda parte la teoria della cura critica più recente. In entrambe le sezioni sono presenti connessioni ad aree d'argomento di ricerca metodologica. Completa il testo un Indice che permette di accedere con immediatezza ai temi ed agli argomenti.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
