Psychology and Law - Andreas Kapardis
2014-01-10

Now in its fourth edition, *Psychology and Law* is a comprehensive guide to the complex interactions between psychology and criminal law. Andreas Kapardis explores contemporary psycho-legal issues both in and out of the courtroom, from eyewitness testimony,

investigative interviewing, jury decision making, and sentencing as a human process, to restorative justice, terrorism, police prejudice and offender profiling. The book draws upon sources from Europe, North America and Australia to investigate the subjectivity and human fallibility inherent in our systems of justice. It suggests ways of minimising undesirable influences on judicial decision making, and discusses procedures for dealing with witnesses and suspects. Fully revised and with greater emphasis on relevant law,

Psychology and Law remains the leading text on legal psychology for students and practitioners in psychology, law, criminology, social work and law enforcement.

Sexual Murderers - Jean Proulx 2007-09-10
Little is known about Sexual Murderers - those who kill in a sexual context. Recent studies have compared their backgrounds and characteristics with that of rapists and/or violent (non-sexual) offenders. This translation of a French original by the renowned Jean Proulx challenges existing knowledge on sexual murders, offers new tools for profiling and interrogation, and helps to establish a new research base. Current theories of sexual murder, its prevalence, reasons including attachment theories, profiling and interrogation techniques are all addressed in Proulx's distinctive, thought-provoking style.

Criminal Profiling - Richard N. Kocsis
2007-11-03

Criminal Profiling: Principles and Practice provides a compendium of original scientific research on constructing a criminal profile for crimes that are not readily resolvable by conventional police investigative methods. Leading profiling expert Richard N. Kocsis, PhD, utilizes a distinct approach referred to as Crime Action Profiling (CAP), a technique that has its foundations in the disciplinary knowledge of forensic psychology. The initial four chapters examine the skills, accuracy, components, and processes surrounding the construction of a criminal profile. The next two chapters focus on CAP research, the methods developed for the profiling of violent crimes and describing a systematic method for the interpretation and use of the CAP models. The subsequent three chapters canvass the respective CAP studies undertaken for crimes of serial rape, serial/sexual murder, and serial arson. An

explanation for how each of the models is developed is also given. The final chapters of the book are devoted to the geographical analysis of crime patterns and to a discussion of the format conventions and procedural guidelines for developing a criminal profile. Offering a scientifically grounded method for the construction of a criminal profile, *Criminal Profiling: Principles and Practice* provides law enforcement personnel, forensic psychologists and psychiatrists, criminologists, and forensic investigators with a step-by-step, practical guide for understanding and applying CAP techniques for the construction of a criminal profile in a systematic and replicable manner.

The Psychology of Love and Hate in Intimate Relationships - Katherine Aumer
2016-06-23

Social psychology has made great advancements in understanding how our romantic relationships function and to some extent, dissolve. However, the social and behavioral sciences in much of western scholarship often focus exclusively on the more positive aspects of intimate relationships--and less so on more controversial or unconventional aspects. The goal of this volume is to explore and illuminate some of these underrepresented aspects: aspects such as non-monogamy, female orgasm, sadism, and hate, that often function alongside love in intimate relationships. Ultimately, by looking at intimate relationships in this way, the volume contributes to and advocates for a more holistic and comprehensive view of intimate relationships. Throughout the volume,

contributors from social, clinical, and evolutionary psychology cover love and hate from a variety of (sometimes opposing) perspectives. The first section, covers love and the changing landscape of intimate relationships. Its chapters review the current literature and research of understudied topics like non-monogamy, female orgasm, sexual fantasies, and the viewpoint of love as something other than positive. The second section explores hate and how hate can operate in intimate relationships--for example, the appearance of sadistic behavior and debates the nature of hate as either a motivation or emotion. The volume concludes, by looking at ways in which the appearance of hate in relationships can be dealt with and overcome successfully. Taken together, these two sections reflect the full variety of experiences within intimate relationships. With the aim of exploring how love and hate can-and frequently do-work together, *The Psychology of Love and Hate in Intimate Relationships* is a

fascinating psychological exploration of intimate relationships in modern times. It is an invaluable resource to academics and students specializing in psychology, gender, and sociology, including clinicians and therapists, and all those interested in increasing our knowledge of intimate relationships.

A Review of Sex Murder and Sex Aggression - NS. Kaye 1990

Revitch and Schlesinger have set out to cover a broad topic, as the title alone suggests. They begin in Chapter 1 by defining gynocide as anger directed toward the mother but displaced onto another female, resulting in sexual homicide in the continuum of sexual aggression. They then develop the classification of catathymic and compulsive gynocide, each in its own chapter. Chapter 4 is devoted to psychodynamics, psychopathology, and differential diagnosis, while Chapter 5 is entitled Prognostic Considerations.

Managing Sex Offender Risk - Hazel Kemshall
2004-09-15

Based on key research into assessment, treatment and recidivism, this book offers practical guidance on improving intervention techniques with sex offenders. The contributors

explore the monitoring and surveillance strategies and cognitive-behavioural techniques currently used both in prison and in the community, and give clear directions for future practice. Providing a detailed overview of the typologies and characteristics of offenders, they suggest strategies for managing different kinds of offender, including children and young people who are sexually aggressive. The Sex Offenders Act and the Crime and Disorder Act emphasise the need for effective community management of the predatory paedophile. Reviewing the recent growth in multi-agency approaches to this challenge, the book discusses how police, prisons and social work departments can share information and collaborate effectively, and will be essential reading for probation officers, prison staff, social workers and anyone involved in the assessment and management of sex offenders.
