Forensic DNA Trace Evidence Interpretation - Duncan Taylor 2023-05-30

Forensic DNA Trace Evidence Interpretation: Activity Level Propositions and Likelihood Ratios provides all foundational information required for a reader to understand the practice of evaluating forensic biology evidence given activity level propositions and to implement the practice into active casework within a forensic institution. The book begins by explaining basic concepts and foundational theory, pulling together research and studies that have accumulated in forensic journal literature over the last 20 years. The book explains the laws of probability - showing how they can be used to derive, from first principles, the likelihood ratio - used throughout the book to express the strength of evidence for any evaluation. Concepts such as the hierarchy of propositions, the difference between experts working in an investigative or evaluative mode and the practice of case assessment and interpretation are explained to provide the reader with a broad grounding in the topics that are important to understanding evaluation of evidence. Activity level evaluations are discussed in relation to biological material transferred from one object to another, the ability for biological material to persist on an item for a period of time or through an event, the ability to recover the biological material from the object when sampled for forensic testing and the expectations of the prevalence of biological material on objects in our environment. These concepts of transfer, persistence, prevalence and recovery are discussed in detail in addition to the factors that affect each of them. The authors go on to explain the evaluation process: how to structure case information and formulate propositions. This includes how a likelihood ratio formula can be derived to evaluate the forensic findings, introducing Bayesian networks and explaining what they represent and how they can be used in evaluations and showing how evaluation can be tested for robustness. Using these tools, the authors also demonstrate the ways that the methods used in activity level evaluations are applied to questions about body fluids. There are also chapters dedicated to reporting of results and implementation of activity level evaluation in a working forensic laboratory. Throughout the book, four cases are used as examples to demonstrate how to relate the theory to practice and detail how laboratories can integrate and implement activity level evaluation into their active casework.

Countries and Territories of the World -

A Study of Age Reporting in Selected Arab Censuses of Population - 2013

"The purpose of this report is to do the following: (1) provide an overview of census taking in the Arab region; and (2) assess the accuracy of age-sex reporting and the patterns of digit preference in recent censuses of population in selected Arab countries at the national and subnational levels"--Page1.

International Handbook of Population Aging - Peter Uhlenberg 2009-04-29

The *International Handbook of Population Aging* examines research on a wide array of the profound implications of population aging. It demonstrates how the world is changing through population aging, and how demography is changing in response to it.

MERS-CoV - Fang Li 2019-12-12

Middle East respiratory syndrome coronavirus (MERS-CoV) is an emerging zoonotic coronavirus. First identified in 2012, MERS-CoV has caused over 2460 infections and a fatality rate of about 35% in humans. Similar to severe acute respiratory syndrome coronavirus (SARS-CoV), MERS-CoV likely originated from bats; however, different from SARS-CoV, which potentially utilized palm civets as its intermediate hosts, MERS-CoV likely transmits to humans through dromedary camels. Animal models, such as humanized mice and nonhuman primates, have been developed for studying MERS-CoV infection. Currently, there are no vaccines and therapeutics approved for the prevention and treatment of MERS-CoV infection, although a number of them have been developed preclinically or tested clinically. This book covers one editorial and 16 articles (including seven review articles and nine original research papers) written by researchers working

in the field of MERS-CoV. It describes the following three main aspects: (1) MERS-CoV epidemiology, transmission, and pathogenesis; (2) current progress on MERS-CoV animal models, vaccines, and therapeutics; and (3) challenges and future prospects for MERS-CoV research. Overall, this book will help researchers in the MERS-CoV field to further advance their work on the virus. It also has important implications for other coronaviruses as well as viruses outside the coronavirus family with pandemic potentials.

A Critical Evaluation of Vitamin D - Sivakumar Joghi Thatha Gowder 2017-04-26

Vitamin D, a fat-soluble vitamin, also called as "sunshine vitamin" is derived mostly from sun exposure and food, and for normal activation, it has to undergo two hydroxylation reactions. Vitamin D affects more than 2000 genes in the body. Serum level of 25(OH) D is an ideal indicator of vitamin D status in our body. Vitamin D deficiency leads to various diseases. On a therapeutic point of view, vitamin D helps to treat many diseases. The book "A Critical Evaluation of Vitamin D - Clinical Overview" targets the principles, mechanisms, and clinical significance of vitamin D. This book covers four sections: "Vitamin D in Cardiovascular and Renal Diseases", "Vitamin D in Age and Neurological Diseases", "Vitamin D and Cancer" and "Therapeutic Measurements of Vitamin D". Each of these sections is interwoven with the theoretical aspects and experimental techniques of basic and clinical sciences. This book will be a significant source to students, scientists, physicians, healthcare professionals and also other members of this society who are interested in exploring the role of vitamin D in human life. [Vitamin D can be considered as vitamin of "defense" since it cures several diseases. - Sivakumar Gowder]

Gender, Identity and Violence - Rainuka Dagar 2015-07-17

The missing girls in India are not a new phenomenon. The British passed an Act to check female infanticide more than 100 years ago. Since 1960, India's birth sex ratios have progressively declined from 994 to 910, implicating life-affecting gender violence. Backed by extensive field research, data and interviews, this book explores girl child deselection through cultural neglect, female infanticide and foeticide, and the role of caste and religion. The book spans critical socio-historical contexts and examines the practice of selective right to life. It views the effects of militancy and khaap panchayats, and studies women's rights discourses and protective legal reforms. The gender imbalance is mapped globally and analysed in the specific conditions of the Indian states of Punjab and Haryana. The book examines the inter-linkages of gender hierarchies with male child preference and warns that theoretical analyses limited to female foeticide alone cannot address gender inequalities or change the cycle of violence. This will be valuable to scholars and researchers of gender and women studies, sociology, politics, and population and demographic studies. It will also be indispensable for women's rights activists, NGOs, policy makers, government bodies, and those studying health and family planning.

WHO report on global health worker mobility - World Health Organization 2023-07-12

The report presents two key indicators of estimating health worker mobility as reported by destination countries - the share of the foreign-trained and/or foreign-born health workers. The results presented in this report formulate new thinking around the interlinkages of monitoring Sustainable Development Goal (SDG) Indicator 3.c.1 on health worker density and distribution and health worker mobility and migration. This report provides the most comprehensive compendium of data on health workforce migration ever published, with data from 134 countries, areas and territories, covering all six WHO regions. This report stipulates [highlights/emphasizes?] the importance of accurately measuring and monitoring health worker mobility - as a lever of influence - in designing, implementing and assessing remedial policies aimed at addressing skills imbalances and future health systems performance development.

Islamic Law - Hunt Janin 2015-01-09

The sharia is a set of traditional laws that define a Muslim's obligations to God and his fellow human beings. Westerners often misunderstand the nature of the sharia, born as it is of a complicated legal and academic tradition that may not always seem relevant to today's world. Written for those unfamiliar with Islam, this volume provides an accurate and objective assessment of the sharia's achievements, shortcomings and future prospects. It explores the fundamentals of Islam and traditional sharia laws. In addition, the sharia is discussed with respect to Ottoman law, puritanism and jihad. The sharia's relevance to today's world events is also explored. Among items provided in appendices are a commentary on a Western translation of the concept of jihad and an analysis of the sharia in 29 selected countries.

[NTA CUET UG 2022 Section 2 Domain Humanities](#) - Arihant Experts 2022-04-25

The National Testing Agency (NTA) conducts the Common University Entrance Test (CUET) in three sections for admission into Under Graduate programs for all Central Universities like DU, JNU, JMI, AMU, etc. Set your preparation in motion with the newly launched "NTA CUET (UG) Section II Domain (Humanities)", designed to help the students aspiring for admission into the Central Universities. Serving as a study guide, the book constitutes all the theories according to the syllabus directed by the University Grants Commission (UGC). Apart from this, it also focuses on the practice part with a good number of questions. Prepared strictly in line with the prescribed format, this book ensures success in the exam. This book possesses: 1. Complete coverage of syllabus 2. Designed as per the latest prescribed format 3. Divided into 4 sections 4. 2 practice sets in each section for thorough revision Table of Contents History, Geography, Political science, Sociology, Psychology, Home Science, Practice Sets

Changing Qatar - Geoff Harkness 2020-07-28

A cultural study of modern Qatar and how it navigates change and tradition Qatar, an ambitious country in the Arabian Gulf, grabbed headlines as the first Middle Eastern nation selected to host the FIFA World Cup. As the wealthiest country in the world—and one of the fastest-growing—it is known for its capital, Doha,

which boasts a striking, futuristic skyline. In *Changing Qatar*, Geoff Harkness takes us beyond the headlines, providing a fresh perspective on modern-day life in the increasingly visible Gulf. Drawing on three years of immersive fieldwork and more than a hundred interviews, he describes a country in transition, one struggling to negotiate the fluid boundaries of culture, tradition, and modernity. Harkness shows how Qataris reaffirm—and challenge—traditions in many areas of everyday life, from dating and marriage, to clothing and humor, to gender and sports. A cultural study of citizenship in modern Qatar, this book offers an illuminating portrait that cannot be found elsewhere.

Gender Representation in Learning Materials - Abolaji S. Mustapha 2015-08-11

Representations of gender in learning materials convey an implicit message to students about attitudes towards culturally appropriate gender roles for women and men. This collection takes a linguistic approach to exploring theories about gender representation within the sphere of education and textbooks, and their effects on readers and students within an international context. In the opening section, contributors discuss theories of representation and effect, challenging the conventional Althusserian model of interpellation, and acknowledging the challenges of applying Western feminist models within an international context.

Following chapters provide detailed analyses focusing on a number of different countries: Australia, Japan, Brazil, Finland, Russia, Hong Kong, Nigeria, Germany, Qatar, Tanzania, and Poland. Through linguistic analysis of vocabulary associated with women and men, content analysis of what women and men say in textbooks, and discourse analysis of the types of linguistic moves associated with women and men, contributors evaluate the extent to which gendered representations in textbooks perpetuate stereotypical gender roles, what the impact may be on learners, and the ways that both teachers and learners interact and engage with these texts.
