Pedagogical Cases in Physical Education and Youth Sport -

Kathleen Armour 2014-01-21

Pedagogical Cases in Physical Education and Youth Sport is a completely new kind of resource for students and practitioners working in physical education or youth sport. The book consists of 20 richly described cases of individual young learners, each written by a team of authors with diverse expertise from across the sport, exercise and movement sciences. These cases bring together knowledge from single sub-disciplines into new interdisciplinary knowledge to inform best practice in physical education, teaching and coaching in youth sport settings. At the heart of

each case is an individual young person of a specified age and gender, with a range of physical, social and psychological characteristics.

Drawing on current research, theory and empirical data from their own specialist discipline, each chapter author identifies the key factors they feel should be taken into account when attempting to teach or coach the young person described. These strands are then drawn together at the end of each chapter and linked to current research from the sport pedagogy literature, to highlight the implications for planning and evaluating teaching or coaching sessions. No other book offers such a rich, vivid and thought-provoking set of pedagogical tools for understanding and working with children and young people in sport. This is an essential resource for any student on a physical education, coaching, kinesiology or sport science course, and for any teacher, coach or instructor working in physical education or youth sport.

Race, Monogamy, and Other Lies They Told You, Second Edition - Agustín Fuentes 2022-05-10

A compelling takedown of prevailing myths about human behavior, updated and expanded to meet the current moment. There are three major myths of human nature: humans are divided into biological races; humans are naturally aggressive; and men and women are wholly different in behavior, desires, and wiring. *Race, Monogamy, and Other Lies They Told You* counters these pervasive and pernicious myths about human behavior. Agustín Fuentes tackles misconceptions about what race, aggression, and sex really mean for humans, and incorporates an accessible understanding of culture, genetics, and evolution that requires us to dispose of notions of "nature or nurture." Presenting scientific evidence from diverse fields, including anthropology, biology, and psychology, Fuentes devises a myth-busting toolkit to dismantle persistent fallacies about the validity of biological races, the innateness of aggression and violence, and the nature of monogamy, sex, and gender. This revised and expanded edition provides up-to-date references, data, and analyses, and addresses new topics, including the popularity of home DNA testing kits and the lies behind "incel" culture; the resurgence of racist, nativist thinking and the internet's influence in promoting bad science; and a broader understanding of the diversity of sex and gender.

The Listening Cure - Chris Gilbert, MD 2017-09-26

This book is about new and effective ways to address disease that aren't commonly used by our physicians. Dr. Chris Gilbert demonstrates that our bodies speak to us all the time. Through symptoms such as fatigue, joint pain, abdominal pain, anxiety, depression, and other symptoms, our bodies let us know that we have a problem and that we need to solve it. Dr. Gilbert, assisted by Dr. Haseltine, shows that by using her "giving the body a voice" technique, sufferers can discover what the symptoms mean and how to fix the often hidden reasons for their health problems. Each chapter reveals a different way of identifying underlying issues. These original, simple, and fun techniques include role-playing, inner group therapy, dream interpretation, art interpretation, nature walks, and even conversations with death. The Listening Cure covers a range of common afflictions, from obesity to back pain, and devotes a full chapter to resolving sexual problems in relationships. By listening to what our bodies have to say, Dr. Gilbert shows how to achieve long term deep cures versus temporary superficial fixes. Her secrets will become your secrets.

The Homosexuality Debate in Malawi - Mawerenga, Jones Hamburu 2018-06-14

Homosexuality is a cross-cutting challenge to Malawian society with theological, socio-cultural, economic, legal, political, and human rights implications. This book argues that the solution to the homosexuality debate in Malawi does not lie in either the criminalization or decriminalization of homosexuality; neither does it lie in homophobia nor heterophobia. However, the solution to the homosexuality debate lies in achieving a harmonious co-existence of both heterosexuals and homosexuals by practicing mutual tolerance. The book concludes by suggesting various activities to be taken by: The Government of Malawi; Gay Rights Activists; Religious Leaders; Traditional Leaders; and Malawian Society to ensure the aforementioned tolerance and understanding is encouraged.
