Boys, Girls and Achievement - Becky Francis 2002-01-04

Girls are now out-performing boys at GCSE level, giving rise to a debate in the media on boys' underachievement. However, often such work has been a 'knee-jerk' response, led by

media, not based on solid research. *Boys, Girls and Achievement* - Addressing the Classroom Issues fills that gap and: *provides a critical overview of the current debate on achievement; *Focuses on interviews with young people and classroom observations to examine how boys and girls see themselves as learners; *analyses the strategies teachers can use to improve the educational achievements of both boys and girls. Becky Francis provides teachers with a thorough analysis of the various ways in which secondary school pupils construct their gender identities in the classroom. The book also discusses methods teachers might use challenge these gender constructions in the classroom and thereby address the 'gender-gap' in achievement.

Reading, Writing and Resistance - Robert B. Everhart 2022-12-29

A story of everyday life in an American junior high school, originally published in 1983, this book demonstrates the ways in which the school culture of early adolescence both supports and denies the cultural and economic requirements of the parent society that surrounds it. It explores this school culture in relation to the local and national in political economy, to class, race and gender, and to the needs of the state. The author approaches the work of students in school as a labor process in the context of an advanced capitalist society. He describes such typical junior high activities as 'goofing off' and 'bugging the teacher' by examining the meaning of these activities to the students engaged in them, and brings acute observation and sensitivity to bear on the forms of resistance that arise among the students, showing that this resistance is a form of power which students exercise in the face of their estranged status.

The nature and consequences of this resistance are examined in detail, especially as they relate to the context of a society in which estranged labor, in one form or another, is the dominant characteristic for most members. Throughout the book, the subtle pressures, the cliques, the vitality, the boredom and the ever-present humor of school life are explored. By integrating the insights of Habermas with the theories of Marx, the author is able to examine the tension between the 'reified knowledge' of the school and the 'regenerative knowledge' of the students in a sensitive ethnography which captures the student world in ways which have been missed in the past.

Language and Woman's Place - Robin Tolmach Lakoff 2004-07-22

The 1975 publication of Robin Tolmach Lakoff's *Language and Woman's Place*, is widely recognized as having inaugurated feminist research on the relationship between language and gender, touching off a remarkable response

among language scholars, feminists, and general readers. For the past thirty years, scholars of language and gender have been debating and developing Lakoff's initial observations. Arguing that language is fundamental to gender inequality, Lakoff pointed to two areas in which inequalities can be found: Language used about women, such as the asymmetries between seemingly parallel terms like master and mistress, and language used by women, which places women in a double bind between being appropriately feminine and being fully human. Lakoff's central argument that "women's language" expresses powerlessness triggered a controversy that continues to this day. The revised and expanded edition presents the full text of the original first edition, along with an introduction and annotations by Lakoff in which she reflects on the text a quarter century later and expands on some of the most widely discussed issues it raises. The volume also brings together commentaries from twenty-six

leading scholars of language, gender, and sexuality, within linguistics, anthropology, modern languages, education, information sciences, and other disciplines. The commentaries discuss the book's contribution to feminist research on language and explore its ongoing relevance for scholarship in the field. This new edition of *Language and Woman's Place* not only makes available once again the pioneering text of feminist linguistics; just as important, it places the text in the context of contemporary feminist and gender theory for a new generation of readers.

Gender Trouble Makers - Jennifer Rothchild
2007-05-07

International development efforts aimed at improving girls' lives and education have been well-intended, somewhat effective, but ultimately short-sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term 'gender' and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular, the analysis in *Gender Trouble Makers* focuses on the social

constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal, promoting access to and participation in existing formal education programme is clearly necessary, but it is not, in itself, sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process, then all stakeholders involved - researchers, governmental officials, and community members - can begin to understand and devise more effective ways to increase both girl and boy students' enrollment, participation, and success in school.

children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and

other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

researcher and middle school teacher—intertwines investigations of multiple literacies, technologies, race, class, gender, sexuality, and gender expression to provide a provocative look at what helps and what hurts adolescent girls in school. Through engaging case studies, we see how traditional schooling fails to make room for crucial life topics, such as grappling with sexual or racial identity, understanding gang culture, or coming of age in urban America. Each chapter concludes with concrete strategies for improving both in- and out-of-school practices to better serve young girls, especially marginalized students.

Talking to the Girls - Edvige Giunta
2022-03-22

"Candid and intimate accounts of the factory-worker tragedy that shaped American labor rights. On March 25, 1911, a fire broke out on the eighth floor of the Asch Building in Greenwich Village, New York. The top three floors housed the Triangle Waist Company, a factory where approximately 500 workers, mostly young immigrant women and girls, labored to produce fashionable cotton blouses, known as "waists." The fire killed 146 workers in a mere 15 minutes but pierced the perpetual conscience of citizens everywhere. The tragedy of the fire, and the resulting movements for change, were pivotal in shaping workers' rights and unions. This book is a collection of stories from writers, artists, activists, scholars, and family members of the Triangle workers. Nineteen contributors offer a collective

testimony: a written memorial to the Triangle victims"--

Talking Young Femininities - Pia Pichler 2009

Talking Young Femininities explores the spontaneous talk of adolescent British girls from different socio-cultural backgrounds, including girls from a prestigious private school, the British Bangladeshi community and the East End in London. The book examines different discursive practices and identities which the young women negotiate in their talk and examines the interactive processes of these negotiations. What do young British women talk about with their friends? How do gender and (adolescent) identity interact with social class and ethnicity? How do adolescent girls position themselves in relation to sexual experiences, practices and identities? What is the relationship between the girls' local positions and larger-scale socio-cultural norms or identity categories? In what way can linguistic discourse analysis build on and contribute to cross-disciplinary

Young, Female and Black - Heidi Safia Mirza
2005-07-12

Young black women bear all the hallmarks of a fundamentally unequal society. They do well at school, contribute to society, are good efficient workers yet, as a group they consistently fail to secure the economic status and occupational prestige they deserve. This book presents a serious challenge to the widely held myth that young black women consistently underachieve both at school and in the labour market. In a comparative study of research and writing from America, Britain and the Caribbean *Young, Female and Black* re-examines our present understanding of what is meant by educational underachievement, the black family and, in particular, black womanhood in Britain.
