Homer Simpson Marches on Washington -

Timothy M. Dale 2010-03-19

The Simpsons questions what is culturally acceptable, showcasing controversial issues like homosexuality, animal rights, the war on terror, and religion. This subtle form of political analysis is effective in changing opinions and attitudes on a large scale. Homer Simpson Marches on Washington explores the transformative power that enables popular culture to influence political agendas, frame the consciousness of audiences, and create profound shifts in values and ideals. To investigate the full spectrum of popular culture in a democratic society, editors Timothy M. Dale and Joseph J. Foy gather a top-notch team of scholars who use television shows such as Star Trek, The X-Files, All in the Family, The View, The Daily Show with Jon Stewart, and The Colbert Report, as well as movies and popular music, to investigate contemporary issues in American popular culture.

No Aging in India - Lawrence Cohen

1998-07-30

From the opening sequence, in which mid-nineteenth-century Indian fishermen hear the possibility of redemption in an old woman's madness, No Aging in India captures the reader with its interplay of story and analysis. Drawing on more than a decade of ethnographic work, Lawrence Cohen links a detailed investigation of mind and body in old age in four neighborhoods of the Indian city of Varanasi (Banaras) with events and processes around India and around the world. This compelling exploration of senility—encompassing not only the aging body but also larger cultural anxieties—combines insights from medical anthropology, psychoanalysis, and postcolonial studies. Bridging literary genres as well as geographic spaces, Cohen responds to what he sees as the impoverishment of both North American and Indian gerontologies—the one mired in ambivalence toward demented old bodies, the other insistent on a dubious morality tale of

modern families breaking up and abandoning their elderly. He shifts our attention irresistibly toward how old age comes to matter in the constitution of societies and their narratives of identity and history.

Words That Work - Dr. Frank Luntz 2007-01-02

The nation's premier communications expert shares his wisdom on how the words we choose can change the course of business, of politics, and of life in this country. In Words That Work, Luntz offers a behind-the-scenes look at how the tactical use of words and phrases affects what we buy, who we vote for, and even what we believe in. With chapters like "The Ten Rules of Successful Communication" and "The 21 Words and Phrases for the 21st Century," he examines how choosing the right words is essential. Nobody is in a better position to explain than Frank Luntz: He has used his knowledge of words to help more than two dozen Fortune 500 companies grow. Hell tell us why Rupert

Murdoch's six-billion-dollar decision to buy DirectTV was smart because satellite was more cutting edge than "digital cable," and why pharmaceutical companies transitioned their message from "treatment" to "prevention" and "wellness." If you ever wanted to learn how to talk your way out of a traffic ticket or talk your way into a raise, this book's for you.

Polyglot: How I Learn Languages - Kat—Lomb 2008-01-01

KAT LOMB (1909-2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. *Polyglot: How I Learn Languages*, first published in 1970, is a collection of anecdotes and reflections on language learning. Because Dr. Lomb learned her languages as an adult, after getting a PhD in chemistry, the methods she used will be of particular interest to adult learners who want to master a foreign language.

The Play of Animals - Karl Groos 1898

"In this volume Professor Groos makes a contribution to three distinct but cognate departments of inquiry: philosophical biology, animal psychology, and the genetic study of art. The world of play, to which art belongs, stands in most important and interesting contrast with the stern realities of life; yet there are few scientific works in the field of human play, and none at all in that of animal play--a fact to be accounted for, probably, by the inherent difficulties of the subject, both objective and subjective. The animal psychologist must harbour in his breast not only two souls, but more; he must unite with a thorough training in physiology, psychology, and biology the experience of a traveller, the practical knowledge of the director of a zoological garden, and the outdoor lore of a forester. And even then he could not round up his labours satisfactorily unless he were familiar with the trend of modern aesthetics. Groos holds play to be an instinct developed by natural selection, and to be on a level with the other instincts which are developed for their utility. Its utility is, in the main, twofold: First, it enables the young animal to exercise himself beforehand in the strenuous

and necessary functions of its life and so to be ready for their onset; and, second, it enables the animal by a general instinct to do many things in a playful way, and so to learn for itself much that would otherwise have to be inherited in the form of special instincts; this puts a premium on intelligence, which thus comes to replace instinct"--Preface. Barack Obama's America - John White
2009-09-08

"White's Barack Obama's America eloquently captures both the important nuances of the current political scene and its long-term consequences." ---Richard Wirthlin, former pollster for Ronald Reagan "This delightfully written and accessible book is the best available account of the changes in culture, society, and politics that have given us Barack Obama's America." ---Stan Greenberg, pollster for Bill Clinton and Chairman and CEO of Greenberg Quinlan Rosner Research "From one of the nation's foremost experts on how values shape our politics, a clear and compelling account of the dramatic shifts in social attitudes that are transforming American political culture. White's masterful blend of narrative and data illuminates the arc of electoral history from Reagan to Obama, making a powerful case for why we are entering a new progressive political era." ---Matthew R. Kerbel, Professor of Political Science, Villanova University, and author of Netroots "John Kenneth White is bold. He asks the big questions . . . Who are we? What do we claim to believe? How do we actually live? What are our politics? John Kenneth White writes compellingly about religion and the role it played in making Barack Obama president. White's keen insight into America's many faiths clarifies why Barack Obama succeeded against all odds. It is a fascinating description of religion and politics in twenty-first-century America---a must-read." ---Kathleen Kennedy Townsend, former Lieutenant Governor of Maryland and author of Failing America's Faithful "In Barack Obama's America, John Kenneth White has written the political equivalent of Baedeker or Michelin, the definitive guide to and through the new, uncharted political landscape of our world. White captures and explains what America means---and what it means to be an American---

in the twenty-first century." ---Mark Shields, nationally syndicated columnist and political commentator for PBS NewsHour "John White has always caught important trends in American politics that others missed. With his shrewd analysis of why Barack Obama won, he's done it again." ---E. J. Dionne, Jr., Senior Fellow, Brookings Institution, and University Professor in the Foundations of Democracy and Culture at Georgetown University The election of Barack Obama to the presidency marks a conclusive end to the Reagan era, writes John Kenneth White in Barack Obama's America. Reagan symbolized a 1950s and 1960s America, largely white and suburban, with married couples and kids at home, who attended church more often than not. Obama's election marks a new era, the author writes. Whites will be a minority by 2042. Marriage is at an all-time low. Cohabitation has increased from a half-million couples in 1960 to more than 5 million in 2000 to even more this year. Gay marriages and civil unions are redefining what it means to be a family. And organized religions are suffering, even as Americans continue to think of themselves as a religious people. Obama's inauguration was a defining moment in the political destiny of this country, based largely on demographic shifts, as described in Barack Obama's America. John Kenneth White is Professor of Politics at the Catholic University of America in Washington, D.C. Cover image: "Out of many, we are one: Dare to Hope: Faces from 2008 Obama Rallies" by Anne C. Democracy's Edge - Frances Moore Lappe

2005-10-28

Three out of five Americans, both Republicans and Democrats, feel our country is headed in the wrong direction. America is at the edge, a critical place at which we can either renew and revitalize or give in and lose that most precious American ideal—democracy—and along with it the freedom, fairness, and opportunities it assures. *Democracy's Edge* is a rousing battle cry that we can—and must—act now. From Jefferson to Eisenhower, presidents from both parties have warned us of the danger of letting a closed, narrow group of business and

government officials concentrate power over our lives. Yet today, a small and unrepresentative group of people is making vital decisions for all of us. But this crisis is only a symptom, Lappé argues. It's a symptom of thin democracy, something done to us or for us, not by or with us. Such democracy is always at risk of being stolen by private interests or extremist groups, left and right. But there is a solution. The answer, says Lappé, is Living Democracy, a powerful yet often invisible citizens' revolution surging in communities across America. It's not random, disjointed activism but the emergence of a new historical stage of democracy in which Americans realize that democracy isn't something we have but something we do. Either we live it or lose it, says Lappé.

The Vanishing Vision - James Day 2021-01-08

This spirited history of public television offers an insider's account of its topsy-turvy forty-year odyssey. James Day, a founder of San Francisco's KQED and a past president of New York's WNET, provides a vivid and often amusing behind-the-scenes history. Day tells how a program producer, desperate to locate a family willing to live with television cameras for seven months, borrowed a dime—and a suggestion—from a blind date and telephoned the Louds of Santa Barbara. The result was the mesmerizing twelve-hour documentary *An American Family*. Day relates how Big Bird and his friends were created to spice up Sesame Street when test runs showed a flagging interest in the program's "live-action" segments. And he describes how Frieda Hennock, the first woman appointed to the FCC, overpowered the resistance of her male colleagues to lay the foundation for public television. Day identifies the particular forces that have shaped public television and produced a Byzantine bureaucracy kept on a leash by an untrusting Congress, with a fragmented leadership that lacks a clearly defined mission in today's multimedia environment. Day calls for a bold rethinking of public television's mission, advocating a system that is adequately funded, independent of government, and capable of countering commercial television's "lowest-common-denominator" approach with a full range of substantive programs, comedy as well as culture, entertainment as well as information.

Directorate S - Steve Coll 2018-02-06

Winner of the 2018 National Book Critics Circle Award for Nonfiction Longlisted for the 2018 National Book Award for Nonfiction From the Pulitzer Prize-winning author of *Ghost Wars*, the epic and enthralling story of America's intelligence, military, and diplomatic efforts to defeat Al Qaeda and the Taliban in Afghanistan and Pakistan since 9/11 Prior to 9/11, the United States had been carrying out small-scale covert operations in Afghanistan, ostensibly in cooperation, although often in direct opposition, with I.S.I., the Pakistani intelligence agency. While the US was trying to quell extremists, a highly secretive and compartmentalized wing of I.S.I., known as "Directorate S," was covertly training, arming, and seeking to legitimize the Taliban, in order to enlarge Pakistan's sphere of influence. After 9/11, when fifty-nine countries, led by the U. S., deployed troops or provided aid to Afghanistan in an effort to flush out the Taliban and Al Qaeda, the U.S. was set on an invisible slow-motion collision course with Pakistan. Today we know that the war in Afghanistan would falter badly because of military hubris at the highest levels of the Pentagon, the drain on resources and

provocation in the Muslim world caused by the U.S.-led invasion of Iraq, and corruption. But more than anything, as Coll makes painfully clear, the war in Afghanistan was doomed because of the failure of the United States to apprehend the motivations and intentions of I.S.I.'s "Directorate S". This was a swirling and shadowy struggle of historic proportions, which endured over a decade and across both the Bush and Obama administrations, involving multiple secret intelligence agencies, a litany of incongruous strategies and tactics, and dozens of players, including some of the most prominent military and political figures. A sprawling American tragedy, the war was an open clash of arms but also a covert melee of ideas, secrets, and subterranean violence. Coll excavates this grand battle, which took place away from the gaze of the American public. With unsurpassed expertise, original research, and attention to detail, he brings to life a narrative at once vast and intricate, local and global, propulsive and painstaking. This is the definitive explanation of how America came to be so badly ensnared in an elaborate, factional, and seemingly interminable conflict in South Asia. Nothing less than a forensic examination of the personal and political forces that shape world history, Directorate S is a complete masterpiece of both investigative and narrative journalism.
