The 2030 Spike - Colin Mason 2013-06-17

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all

people concerned with the future of humanity and planet earth.

Responses were received from 53 jurisdictions. It presents a snapshot as of Dec. 31, 2008. In addition, the FBI was the source for some of the information relating to criminal history records, including State participation in the Interstate Identification Index (III) system (the national criminal records exchange system) and the number of III records maintained by the FBI on behalf of the States; the number of records in the protection order file; and the number of sex offender records in the FBI National Crime Information Center files. Miracle Village - Sofia Valiente 2014

Miracle Village is located on the outskirts of a rural town in an impoverished area of Palm Beach County, Florida, which is home to over 100 sex offenders. Florida legislation requires offenders to live a minimum of 1,000 ft. from any school, bus stop or place where children congregate, yet many municipalities extend this law with local ordinances that increase the distance to 2,500 ft. In reality, this becomes extremely difficult to abide by, and many offenders struggle to find housing and re-establish their lives in society. The village, founded by a Christian ministry, seeks to help offenders that have no place to go. The range of crimes committed by the residents varies - from serious offenses to consensual teenage relationships that had an age gap. The men are

mixed in age, from various ethnic backgrounds, and they are all coming to terms with living with the permanence of this label. Over the period of one year, Sofia Valiente befriended, lived among and photographed the residents in Miracle Village. She has chosen 12 stories that show an intimate glance of what life is like for these individuals that are living distanced from society.

Wisdom in the Open Air - Peter Reed 1993

"Wisdom in the Open Air" traces the Norwegian roots of the strain of thinking called "deep ecology" - the search for the solutions to environmental problems by examining the fundamental tenets of our culture. Although Arne Naess coined the term in the 1970s, the insights of deep ecology actually reflect a whole tradition of thought that can be seen in the history of Norwegian culture, from ancient mountain myths to the radical ecoactivism of today. Beginning with an introduction to Norway's emphasis on nature and the wild, Reed and Rothenberg explore the birth of the environmental movement in the 1960s and 1970s. What follows is a collection of writings by prominent Norwegian thinkers on humanity and nature, most never before published in English. From Peter Wessel Zapffe, a twentieth-century Kierkegaardian figure, the list goes on to include Arne Naess, activist/critic/artist Sigmund Kvaloy, wilderness educator Nils Faarlund, novelist Finn Alnaes, sociologist Johan Galtung, and social reformer Erik Dammann. Their points of view

offer thoughts on the significance of modern life and what it means to be human in the face of deteriorating environmental global trends of the 20th century. "Wisdom in the Open Air" asks and answers a fundamental

question concerning the ecomovement: what is the role of deep, often abstract, thinking in the attempt to avert a very real ecological crisis?
