The Handbook of Sexuality in Close Relationships John H. Harvey 2004-04-26 Although sexuality is an integral part of close romantic relationships, research linking these two constructs has been less systematic than other areas pertaining to close relationships. To date, researchers in communication, sociology, family studies, psychology, and psychiatry, have made significant advances in both of these fields. The editors' goal is to integrate this research into one volume. They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality. The emphasis is on theoretical integration and stimulation, methodological rigor, and critical analysis. This volume explores: *early sexual experiences and their impact on late life sexuality; *how life's stresses impact sexuality and satisfaction with closeness; *the affect of postpartum depression on sexuality; and *the relationship between control, power, anger, as well as revenge and sexual processes in couples. The Handbook of Sexuality in Close Relationships is intended for students and researchers in the disciplines of social, clinical, developmental, and health psychology; family studies; counseling; and interpersonal, family, and health communication. An excellent reference in advanced courses in close relationships taught in psychology, communications, sociology, anthropology, and family studies, the material in Part V will also appeal to clinical psychologists, health professionals, and policymakers.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes all primary caregivers"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Routledge Handbook of Disability and Sexuality Russell Shuttleworth 2020-12-29 This handbook provides a much-needed holistic overview of disability and sexuality research and scholarship. With authors from a wide range of disciplines and representing a diversity of nationalities, it provides a multi-perspectival view that fully captures the diversity of issues and outlooks. Organised into six parts, the contributors explore long-standing issues such as the psychological, interpersonal, social, political and cultural barriers to sexual access that disabled people face and their struggle for sexual rights and participation. The volume also engages issues that have been on the periphery of the discourse, such as sexual accommodations and support aimed at facilitating disabled people's sexual well-being; the socio-sexual tensions confronting disabled people with intersecting stigmatised identities such as LGBTBI or asexual; and the sexual concerns of disabled people in the Global South. It interrogates disability and sexuality from diverse perspectives, from more traditional psychological and sociological models, to various subversive and post-theoretical perspectives and queer theory. This handbook examines the cutting-edge, and sometimes ethically contentious, concerns that have been repressed in the field. With current, international and comprehensive content, this book is essential reading for students, academics and researchers in the areas of disability, gender and sexuality, as well as applied disciplines such as healthcare practitioners, counsellors, psychology trainees and social workers.

Since 2005, Joan Price has penned *Better Than I Ever Expected: Straight Talk About Sex After Sixty* and emerged as the go-to sexpert for the over-50 population. Abortion Nada Logan Stotland 1998 Where do you turn when you are wrestling with a painful decision? You turn to your spouse, trusted friends and relatives, to professionals, to religious advisers. But sometimes you want accurate information and suggestions all in one place, in a form you can use on your own. The decision to have an abortion is not an easy one, and it is not the right decision for every pregnant woman, even in difficult circumstances. Every situation is different. Women considering abortion range in age from nine to fifty-five years. They are rich and poor; married and unmarried; white, black, brown, yellow, and red; members of every religious group and ethnic origin; heterosexual and homosexual. Some have no one to talk to and others have too many people talking to them. Some are in danger from physical, sexual, and emotional abuse. *Abortion: Facts and Feelings* is for women who are considering whether to have an abortion, women who have had an abortion and want to do more thinking about it, and relatives, mates, lovers, friends, and health professionals who want to help the women they care for make the best possible choices for themselves. Partners in relationships, families, and friends, and, of course, pregnant women themselves, deserve to have accurate information about this common, but controversial, procedure -- information they can use to make both personal and policy decisions. This book contains that information. It discusses * The practice of abortion in other times and places, and practical information about how it is practiced now* How to find out about abortion laws where you live, and laws in other places where you might go if necessary* The attitudes of major North American religious groups about abortion, and how to obtain more specific information about the approaches of your religion to your situation* The medical and psychological outcomes of abortion* Alternatives to abortion -- delivering the baby and either caring for it yourself or allowing someone else to provide the parenting* The needs and concerns of women in special circumstances, and of women's loved ones Most important, it will help you think through and carry out your own decision, whatever it is.
