Body language is a form of nonverbal communication and is one of the most important sources of information sharing in both humans and animals. Did you know that many animals have a similar method of communication? Think about a dog, when it is mad, its ears pinned back, it bares its teeth, the hair on their back stands up, their muscles tense. And this is all before it starts to growl, snarl, or bark! All of those changes to the body of the dog tells you that it is time to back off. While humans may not consciously give off that noticeable of a warning about being upset, there are cues that every person shares, both consciously and subconsciously. Think about the last time you went on a job interview or a first date. You did

Do you want to better understand people by learning to read body language? If yes, keep reading. Body language is a significant part of communication that only a few people study. Yet, it takes up most of how we communicate and

usually is more accurate than the meaning of words. You've heard that actions speak louder than words, and this couldn't be truer because there are some things you can communicate without saying a word. A shrug of the shoulders can tell somebody, "I don't know." A raise of the eyebrows can say, "Did I hear that right?." The way we use our bodies helps to reinforce the things we say. You can say, "I don't know," or you can also turn your palms face up in front of you, raise your eyebrows, frown a little, and stick out your bottom lip. At this point, you have also made somebody laugh and taken some pressure off yourself or anybody nervous. Body language should be interpreted as a whole. Gestures should be interpreted with facial expressions, posture, and voice to ensure correct profiling. In this guide, the author analyzes several scientifically published research articles as well as the underlying theories before discussing the topic in a readable manner. Among the main topics covered in the book: -

Body Language Secrets - Robert Lee

Have you ever considered the power of unspoken? Body language says everything mouth doesn't say. If you want to catch what people don't say, keep reading Body language is another term for nonverbal communication we have with our bodies every day. Eighty percent of our daily communication is considered nonverbal. The research on body language can be made manifest by studying a series of body gestures, enlarging the eyes and even changing the tone of our voice in a specific circumstance. The main impression we build in people's mind about us is the strongest and most lasting because it takes almost two to four minutes for most people to come to a choice of likability for an individual. Our use and reading of body language is mostly an unconscious process we carry out in our daily lives. Therefore, our ability to use body language positively and the ability to

read other people's mind through their body languages can help us develop a better overall personality. Reading the Hidden Communications

Around You - Dr. Anne E. Beall 2009-07-30

How well do you read the body language of the people around you? Researchers estimate that nonverbal communication comprises between 60 and 93 percent of all communication. How much are you missing? In *Reading Hidden Communications Around You*, author Anne Beall shares her approach to reading individuals in the workplace. Beall describes an easy, intuitive way to interpret body language called PERCEIVE, a technique Beall developed after an exhaustive review of relevant academic studies conducted in the fields of psychology, anthropology, and communication. PERCEIVE can be used to identify receptivity, like, dislike, discomfort, stress, deception and emotions. It can also be used for impression management to

increase perceptions of credibility, trustworthiness and likeability in the workplace. Beall provides insight into the major aspects of nonverbal communication, including facial expressions, physical contact, eyes, gestures and voice, as well as proximity and relative orientation, which are the foundation of body language. With real-life examples and photos, *Reading Hidden Communications Around You* helps you observe nonverbal behavior, use the PERCEIVE method to read peoples reactions and emotions, and present an appropriate response for each situation.
