Suicide by Proxy in Early Modern Germany Kathy Stuart 2023-07-24 Suicide by Proxy became a major societal problem after 1650. Suicidal people committed capital crimes with the explicit goal of “earning” their executions, as a short-cut to their salvation. Desiring to die repentantly at the hands of divinely-instituted government, perpetrators hoped to escape eternal damnation that befell direct suicides. Kathy Stuart shows how this crime emerged as an unintended consequence of aggressive social disciplining campaigns by confessional states. Paradoxically, suicide by proxy exposed the limits of early modern state power, as governments struggled unsuccessfully to suppress the tactic. Some perpetrators committed arson or blasphemy, or confessed to long-past crimes, usually infanticide, or bestiality. Most frequently, however, they murdered young children, believing that their innocent victims would also enter paradise. The crime had cross-confessional appeal, as illustrated in case studies of Lutheran Hamburg and Catholic Vienna.

Contagion of Violence National Research Council 2013-03-06 The past 25 years have seen a major paradigm shift in the field of violence prevention, from the assumption that violence is inevitable to the recognition that violence is preventable. Part of this shift has occurred in thinking about why violence occurs, and where intervention points might lie. In exploring the occurrence of violence, researchers have recognized the tendency for violent acts to cluster, to spread from place to place, and to mutate from one type to another. Furthermore, violent acts are often preceded or followed by other violent acts. In the field of public health, such a process has also been seen in the infectious disease model, in which an agent or vector initiates a specific biological pathway leading to symptoms of disease and infectivity. The agent transmits from individual to individual, and levels of the disease in the population above the baseline constitute an epidemic. Although violence does not have a readily observable biological agent as an initiator, it can follow similar epidemiological pathways. On April 30-May 1, 2012, the Institute of Medicine (IOM) Forum on Global Violence Prevention convened a workshop to explore the contagious nature of violence. Part of the Forum's mandate is to engage in multisectoral, multidirectional dialogue that explores crosscutting, evidence-based approaches to violence prevention, and the Forum has convened four workshops to this point exploring various elements of violence prevention. The workshops are designed to examine such approaches from multiple perspectives and at multiple levels of society. In particular, the workshop on the contagion of violence focused on exploring the epidemiology of the contagion, describing possible processes and mechanisms by which violence is transmitted, examining how contextual factors mitigate or exacerbate the issue. Contagion of Violence: Workshop Summary covers the major topics that arose during the 2-day workshop. It is organized by important elements of the infectious disease model so as to present the contagion of violence in a larger context and in a more compelling and comprehensive way.

Mastering Expert Testimony William T. Tsushima 1996-09 The past two decades have seen a rapidly growing involvement of psychologists and psychiatrists in legal proceedings for criminal cases, divorces, and traffic and industrial accidents. Mental health professionals are traditionally not trained to cope with the legal responsibilities that arise from their routine clinical work and are eager to learn the professional skills that are needed in forensic settings. There is presently no book which focuses entirely on the strategies and verbal tactics employed by attorneys who critically examine and challenge the testimony of mental health professionals. If psychologists and psychiatrists can familiarize themselves with the kind of questions and verbal exchanges that take place in the courtroom, they would be better prepared to provide their expertise in an effective manner. This book fills that need. Designed as a practical handbook to assist practitioners from all mental health disciplines, it focuses on typical courtroom dialogue between attorneys and mental health professionals who testify regarding their psychotherapy clients and also those who are hired by attorneys specifically to provide expert opinions. The authors, who have extensive experience in the courtroom, offer well-thought-out, effective responses as contrasted with impulsive and weak answers to attorneys' queries. Actual cases are employed to illustrate typical challenges in various legal areas, including criminal law, child custody hearings, and personal injury cases. Certain forensic issues such as the scientific bases of expert opinions, the accuracy of psychological vs. medical tests, and malingering, are emphasized throughout the chapters. The book is based on the belief that exposure to courtroom dialogue enhances the awareness of appropriate professional responses to an attorney's cross-examination and greatly alleviates fear toward a situation well-known to provoke intense levels of anxiety. Although it is written alluding to the forensic psychologist or psychiatrist, the strategies for the witness are readily applicable in most instances to all mental health professionals. Issues such as therapist bias, unconfirmed observations, and cultural and ethnic factors are clearly relevant to all who provide mental health services.

Faith, Identity and Homicide Shona Robinson-Edwards 2021-10-09 This book explores the role that religion plays in the lives of imprisoned homicide offenders. Drawing on interviews in an English prison, the author examines how they narrate their life stories and how religion intersects with other categories to rebuild their personal identities after committing a crime and being labelled as murderers or killers. This book seeks to bridge the gap between macro and micro phenomena, examining religion as both a social institution and a personal experience. It also explores the mediating role of institutions with regards to the nature and extent of their influence upon individual choices and actions, and provides insights into the nature of the therapeutic prison. It seeks to create some clarity of understanding the complex nature of religiosity, narrative, identity, desistance and rehabilitation whilst critically examining elements of social identity that may restrict or enhance this process. It provides a series of recommendations for organisations working with convicted homicide offenders/offenders and speaks to academics and practitioners in the fields of criminology, sociology, psychology and religious/theological studies.

endeavor, which took almost 3 years to complete, I thought I would take a break before assuming the (satisfying) challenge of writing another book. But after a plenary talk on online offending I gave at the 2009 Association for the Treatment of Sexual Abusers (ATSA) conference in Dallas, Texas, a colleague, Jean Proulx, asked me why I was not writing a book about this topic, given the demand for knowledge about this emerging problem. That was a good question. It was clear that there was a great deal of demand because of the increasing number of cases seen by law enforcement and by clinicians; it was also clear that there was a lack of research.

The book is based on Mapping Stereotypes, Yanko Tsvetkov's critically acclaimed project that became a viral Internet sensation in 2009. A reliable weapon against bigots of all kinds, it serves as an inexhaustible source of much needed argumentation and-occasionally-as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. Encyclopedia of Criminal Activities and the Deep Web Khosrow-Pour D.B.A., Mehdi 2020-02-01 As society continues to rely heavily on technological tools for facilitating business, e-commerce, banking, and communication, among other applications, there has been a significant rise in criminals seeking to exploit these tools for their nefarious gain. Countries all over the world are seeing substantial increases in identity theft and cyberattacks, as well as illicit transactions, including drug trafficking and human trafficking, being made through the dark web internet. Sex offenders and murderers explore unconventional methods of finding and contacting their victims through Facebook, Instagram, popular dating sites, etc., while pedophiles rely on these channels to obtain information and photographs of children, which are shared on hidden community sites. As criminals continue to harness technological advancements that are outpacing legal and ethical standards, law enforcement and government officials are faced with the challenge of devising new and alternative strategies to identify and apprehend criminals to preserve the safety of society. The Encyclopedia of Criminal Activities and the Deep Web is a three-volume set that includes comprehensive articles covering multidisciplinary research and expert insights provided by hundreds of leading researchers from 30 countries including the United States, the United Kingdom, Australia, New Zealand, Germany, Finland, South Korea, Malaysia, and more. This comprehensive encyclopedia provides the most diverse findings and new methodologies for monitoring and regulating the use of online tools as well as hidden areas of the internet, including the deep and dark web. Highlighting a wide range of topics such as cyberbullying, online hate speech, and hacktivism, this book will offer strategies for the prediction and prevention of online criminal activity and examine methods for safeguarding internet users and their data from being tracked or stalked. Due to the techniques and extensive knowledge discussed in this publication it is an invaluable addition for academic and corporate libraries as well as a critical resource for policy makers, law enforcement officials, forensic scientists, criminologists, sociologists, victim advocates, cybersecurity analysts, lawmakers, government officials, industry professionals, academicians, researchers, and students within this field of study.

Right to Be Hostile Erica R. Meiners 2010-11-01 In Right to be Hostile, scholar and activist Erica Meiners offers concrete examples and new insights into the "school to prison" pipeline phenomenon, showing how disciplinary regulations, pedagogy, pop culture and more not only implicitly advance, but actually normalize an expectation of incarceration for urban youth. Analyzed through a framework of an expanding incarceration nation, Meiners demonstrates how educational practices that disproportionately target youth of color become linked directly to practices of racial profiling that are endemic in state structures. As early as preschool, such educational policies and practices disqualify increasing numbers of students of color as they are funneled through schools as under-educated, unemployable, 'dangerous,' and in need of surveillance and containment. By linking schools to prisons, Meiners asks researchers, activists, and educators to consider not just how our schools' physical structures resemble prisons— metal detectors or school uniforms— but the tentacles in policies, practices and informal knowledge that support, naturalize, and extend, relationships between incarceration and schools. Understanding how and why prison expansion is possible necessitates connecting schools to prisons and the criminal justice system, and redefining "what counts" as educational policy.
