Sexing the Body - Anne Fausto-Sterling 2020-06-30

Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which

scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences

to fit a flawed societal definition of normality.

The Social Construction of Sexuality - Steven Seidman 2010

An affordable primer to sexuality from a sociological perspective.

The Social Construction of the Person - K.J. Gergen
2012-12-06

This volume grew out of a discussion between the editors at the Society for Experimental Social Psychology meeting in Nashville in 1981. For many years the Society has played a leading role in encouraging rigorous and sophisticated research. Yet, our discussion that day was occupied with what seemed a major problem with this finely honed tradition; namely, it was preoccupied with "accurate renderings of reality," while generally insensitive to the process by which such renderings are achieved. This tradition presumed that there were "brute facts" to be discovered about human interaction, with little consideration of the social processes through which

"factuality" is established. To what degree are accounts of persons constrained by the social process of rendering as opposed to the features of those under scrutiny? This concern with the social process by which persons are constructed was hardly ours alone. In fact, within recent years such concerns have been voiced with steadily increasing clarity across a variety of disciplines. Ethno methodologists were among the first in the social sciences to puncture the taken-for-granted realities of life. Many sociologists of science have also turned their attention to the way social organizations of scientists create the facts necessary to sustain these organizations. Historians of science have entered a similar enterprise in elucidating the social, economic and ideological conditions enabling certain formulations to flourish in the sciences while others are suppressed. Many social anthropologists have also been intrigued by cross-cultural variations in the concept of the

human being.

The Cultural Construction of Sexuality - Pat Caplan

2013-11-05

First Published in 1987.

Routledge is an imprint of Taylor & Francis, an informa company.

Social Constructionism - Vivien Burr 2015-04-21

Now in its third edition, this successful book introduces students to the area of social science theory and research known as social constructionism. Using a variety of examples from everyday experience and from existing research in areas such as personality, sexuality and health, it clearly explains the basic theoretical assumptions of social constructionism. Key debates, such as the nature and status of knowledge, truth, reality and the self are given in-depth analysis in an accessible style. Drawing on a range of empirical studies, the book clearly defines the various different approaches to social constructionist research and explores the theoretical and practical issues involved. While

the text is broadly sympathetic to social constructionism, it also adopts a critical perspective to the material, addressing its weaknesses and, in the final chapter, subjecting the theory itself to a more extensive critique. New to this edition: Extended coverage of the relationship between 'mainstream' psychology and social constructionism and how the two fields can engage with each other. An exploration of the rise and popularity of neuroscience and the challenge it poses to social constructionism. New material on the field of psychosocial studies. Updated coverage of existing key issues such as age and sexuality, and inclusion of more recently emerging issues (e.g. status and role of affect). Updated discussion of key social constructionist contributors, with revised references. Updated chapter on research methods, including more on narrative and critical narrative analysis, and personal construct methods. The third edition of *Social Constructionism* extends and

updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students across the social and behavioural sciences.

Sexual Scripts - Judith Long
Laws 1981

The Future of Gender - Jude
Browne 2007-08-30

"Gender" is used to classify humans and to explain their behaviour in predominantly social rather than biological terms. But how useful is the concept of gender in social analysis? To what degree does gender relate to sex? How does gender feature in shifts in familial structures and demography? How should gender be conceived in terms of contemporary inequality and injustice, and what is gender's function in the design and pursuit of political objectives? In this volume a collection of international experts from the fields of political philosophy, political theory, sociology, economics, law, psychoanalysis and evolutionary psychology

scrutinize the conceptual effectiveness of gender both as a mode of analysis and as a basis for envisioning the transformation of society. Each contributor considers how gender might be conceived in contemporary terms, offering a variety of (often conflicting) interpretations of the concept's usefulness for the future.

The Social Construction of Sexuality - Steven Seidman
2015

The Cultural Construction of Sexuality - Patricia Caplan
1987

Illustrates the argument that sexuality is not a 'thing in itself' but a concept that can only be understood with reference to economic, political and social factors.

The Social Construction of Sexuality - Steven Seidman
2003

Written in an accessible, conversational style, this text examines the ways in which society privileges certain sexual practices and identities (deeming them "normal") while stigmatizing others. Topics

include, for example, sexual identity politics, Marxist and feminist theories of sexuality, and the controversies surrounding pornography and gay ma

On the Social Construction of Female Sexuality - Stevi Jackson 1978

The Social Construction of Sexuality and Perversion - Andrea Beckmann 2009

This book deconstructs the pathologizing category of 'somasochism' in order to account for the 'lived realities' of consensual 'SM' play, emphasizing the connection between the corporeal and the political in contemporary consumer cultures. It discusses the homogenization of desire and ownership and use of 'body' and 'sexual ethics'.

The Social Construction of Sexuality - Steven Seidman 2015

An affordable primer to sexuality written from a sociological perspective.
Sexual Cultures in East Asia - Evelyne Micollier 2004-06-01
Using case-studies from East

and Southeast Asia, this book examines sexuality and AIDS-related sexual risk in the context of Asian cultures. It offers a complementary perspective, documented with sociological and anthropological data, to historical studies and looks at commercial sex work, kinship systems, matrimonial strategies, gender, power relations, and the relevance of cultural constructs such as Confucianism and Taoism for the analysis of sexual cultures in Asia.

The Social Construction of Difference and Inequality: Race, Class, Gender and Sexuality - Tracy E. Ore 2006

This anthology examines the social construction of race, class, gender, and sexuality and the institutional bases for these relations. While other texts discuss various forms of stratification and the impact of these on members of marginalized groups, Ore provides a thorough discussion of how such systems of stratification are formed and perpetuated and how forms of

stratification are interconnected. The anthology supplies sufficient pedagogical tools to aid the student in understanding how the material relates to her/his own life and how her/his own attitudes, actions, and perspectives may serve to perpetuate a stratified system.

Handbook of the New Sexuality Studies - Steven Seidman 2007-03-12

As the field of sexuality studies has become a growth area in academia and classes on sexuality studies are incorporated into various disciplines, the expanding book market has been filled with specialist oriented texts which are often theoretically focused and contain too many summaries for an undergraduate audience.

Addressing this imbalance, this key new volume presents the field of sexuality in an accessible and engaging way for undergraduates. Breaking new ground, both substantively and stylistically, this book offers students, academics and researchers an accessible,

engaging introduction and overview of this emerging field. Its central premise is to explore the social character of sexuality, the role of social differences such as race or nationality in creating sexual variation, and the ways sex is entangled in relations of power and inequality. Through this novel approach, the field of sexuality is considered, for the first time, in multicultural, global, and comparative terms and from a truly social perspective. This important volume consists of over fifty short and original essays on the key topics and themes in sexuality studies, and interviews with twelve leading scholars in the field which convey some of the most innovative work being done. Each contribution clearly conveys the latest research with examples. Ideal for students of gender and sexuality studies, this topical and timely volume will be an invaluable resource to all those with an interest in sexuality studies.

The Social Construction of

Lesbianism - Celia Kitzinger
1987

The old model of lesbianism as a pathological affliction has largely given way to a liberal social scientific one which presents it as an alternative lifestyle, a way of loving, a sexual preference, or a source of personal fulfilment. This book argues that the shift from "pathological" to "gay affirmative" research merely substitutes one depoliticized construction of the lesbian for another. The author contends that the liberal "social construction," instead of furthering the liberation of women, represents a new development in the oppression of women in general and lesbians in particular. Gay affirmative constructions are fundamentally incompatible with radical feminist theory in which lesbianism is a political statement representing the bonding of women against male supremacy. Kitzinger urges researchers to reject the traditional model of science as an objective search for truths or facts, but instead to examine

their own rhetoric and evaluate their political commitments.--

From publisher's description.

The Sexual Self - Michael S.

Kimmel 2007

Abstract.

The Invention of

Heterosexuality - Jonathan Ned
Katz 2014-12-10

"Heterosexuality," assumed to denote a universal sexual and cultural norm, has been largely exempt from critical scrutiny.

In this boldly original work, Jonathan Ned Katz challenges the common notion that the distinction between heterosexuality and homosexuality has been a timeless one. Building on the history of medical terminology, he reveals that as late as 1923, the term "heterosexuality" referred to a "morbid sexual passion," and that its current usage emerged to legitimate men and women having sex for pleasure. Drawing on the works of Sigmund Freud, James Baldwin, Betty Friedan, and Michel Foucault, *The Invention of Heterosexuality* considers the effects of heterosexuality's recently

The Social Construction Of Sexuality

forged primacy on both scientific literature and popular culture. "Lively and provocative."—Carol Tavis, New York Times Book Review "A valuable primer . . . misses no significant twists in sexual politics."—Gary Indiana, Village Voice Literary Supplement "One of the most important—if not outright subversive—works to emerge from gay and lesbian studies in years."—Mark Thompson, The Advocate
Embodying the Social - Esther

Saraga 2005-08-17
This book opens the series with a consideration of the social construction of social difference. Taking the body as the point of departure, it deals with the processes through which social problems and social inequalities are constructed. In particular, it examines the shifting ways in which our ideas about issues such as 'disability', 'race' and ethnicity, and sexuality influence the development of social policies.
