

Being Independent In A Relationship

Friendships and Relationships - Claudette G. Henderson 2007-07-10
Every poem in this book relates to something that took place in my life and made a big change in it. It started when my husband, the love of my life, was literally fine one day and dead the next. He had diabetes and didn't know it. He had no signs or symptoms. I took him to the hospital one Saturday evening and came back home Sunday morning without him. I didn't realize until I got to the car, in the hospital parking lot, that it was my birthday. He died on my birthday January, 26. I was angry at God, I asked him for a trade. We had three children and I was afraid to raise them alone. The first poem in this book is called January 26 in reference to that day. After he died, I got very little sleep at night, so, I wrote to release angry feelings. Every situation I went through or have to deal with came out in poetry. I tried to date once or twice, over the past couple of years, but, I think I forgot how. After all, it's been a number of years since I had to. My husband and I were married for 20 years before he died. Trying to decide whether you wanted to be in a friendship or relationship is what it's all about. I think it frightens me to decide which. I'm afraid of love, you can read about that! I've experienced some good times, some confusing times, and a lot of funny times. When I get close to a man I run him away. The book is also about being a pretty, independent woman, standing on her own and making sure every man that comes in her path knows just how independent she is. Every now and then she goes back to her long time friend, who she has known for most of her life, but, she keeps him at a distance. When he's free, she's not, and when she's free he's not. They got use to being each other's support system and wonder if their time together has passed.

Secrets of an Independent Woman - Laurah Henderson 2021-11-24
Sex, lies, and broken promises are what she carried around in her purse. This was what she had, so it's what she gave to the men who crossed her path. As an independent woman who didn't need a man, Laurah had no clue what it really meant to be in a relationship, or what a man's true value was. The trifecta of an absentee father, combined with chaotic dating experiences, and being raised by a single mother, contributed to her toxic independent woman mindset. After multiple failed relationships and a cancelled wedding, she wondered: Can an "independent woman" truly have a successful union with a man or would she have to change? Join her on the journey of emotional truth and healing as she learns to love herself, and a man, for more than what's in his wallet.

British Machinations and (B)uganda's Struggle for Independence* - Apollo N. Makubuya 2019-01-17
In the scramble for Africa, Britain took a lion's share of the continent. It occupied and controlled vast territories, including the Uganda Protectorate - which it ruled for 68 years. Early administrators in the region encountered the progressive kingdom of Buganda, which they incorporated into the British Empire. Under the guise of protection, indirect rule and patronage, Britain overran, plundered and disempowered the kingdom's traditional institutions. On liquidation of the Empire, Buganda was coaxed into a problematic political order largely dictated from London. Today, 56 years after independence, the kingdom struggles to rediscover itself within Uganda's fragile politics. Based on newly de-classified records, this book reconstructs a history of the machinations underpinning British imperial interests in (B)uganda and the personalities who embodied colonial rule. It addresses Anglo-Uganda relations, demonstrating how Uganda's politics reflects its colonial past, and the forces shaping its future. It is a far-reaching examination of British rule in (B)uganda, questioning whether it was designed for protection, for patronage or for plunder.

The Stressed Heart - Marianne J. Legato 2012-12-06

The Stressed Heart is truly unique in concept and will provide an eXCItmg adventure to the reader no matter what his or her field of expertise and interest. The title, although quite appropriate, does not adequately indicate the range of topics considered or the rational interrelationships among them. Indeed, perhaps the most important point to be learned from the book is that a serious consideration of the response of the heart to mechanical overload, ischemia, or excessive humoral stimuli must include evaluation of each of the topics in the table of contents. The heart responds to stress through alterations in both structure and function. How these changes are brought about is the subject of the initial chapters. These consider first the normal regulation of gene expression in the heart, the rapid response to mechanical overload that leads to both quantitative and qualitative changes in the contractile proteins, and our current understanding of the signals that might be elicited by stress and alter gene expression. One chapter emphasizes the fact that, regardless of the nature of the stress, the common denominator is a discrepancy between energy requirements and expenditure. The central role of cellular acidosis in initiating the sequence of responses to stress and the possible roles of peptide regulators of transcription and protein regulators of translation are considered in detail.
