Candidates, Parties and Voters in the Belgian Partitocracy Audrey Vandeleene 2018-11-03 This book focuses on the triadic relationship between electoral candidates and the two other poles of the delegation and accountability triangle—political parties and voters. The chapters rely mostly on the Belgian Candidate Survey (CCS project), gathering about 2000 candidates belonging to 15 parties represented in Parliament and running for the 2014 federal and regional elections, and the authors' conclusions serve at answering broad political science questions linked with elite recruitment, party and candidate electoral strategies, personalisation, party cohesion, and descriptive and substantive representation. Its multilevel semi-open electoral system, atypical federal structure, extreme party system fragmentation and volatility make Belgium an exceptionally rich but complex case that offers findings highly relevant to research on candidates in other democracies.

Talk Show Campaigns Michael Parkin 2014-02-05 Over the past twenty years, presidential candidates have developed an entertainment talk show strategy in which they routinely chat with the likes of Oprah Winfrey, David Letterman, and Jon Stewart. In fact, between 1992 and 2012, there have been more than 200 candidate interviews on daytime and late night talk shows with nearly every presidential candidate—from long shot primary contender to major party nominee—hitting the talk show circuit at some point during the campaign. This book explores the development of the entertainment talk show strategy and assesses its impact on presidential campaigns. The chapters mix detailed narrative with extensive empirical data on audiences, content, viewer reaction, and press coverage to explain why candidates have embraced this strategy and the conditions under which these interviews are most likely to meet their expectations. The book also explores how these interviews can enhance campaigns by connecting a critical segment of the voting population with candidates who provide useful political information in a casual setting. Talk Show Campaigns shows that this is more than a gimmick—it's a key part of how candidates communicate with voters, which reveals a lot about how campaigns have changed over the past two decades.

Candidate Character Traits in Presidential Elections David B. Holian 2015 Voter perceptions of the personal traits of presidential candidates are widely regarded to be important influences on the vote. Media pundits frequently explain the outcome of presidential elections in terms of the personal appeal of the candidates. Despite the emphasis on presidential character traits in the media, the scholarly investigation in this area is limited. In this book, David Holian and Charles Prysby set out to examine the effect that trait perceptions have on the vote, how these perceptions are shaped by other attitudes and evaluations, and what types of voters are most likely to cast a ballot on the basis of the character traits of the presidential candidates. Using the American National Election Studies (ANES) surveys, the authors find that traits do have a very substantial effect on the vote, that different candidates have advantages on different traits, and that the opinions expressed by media pundits about how the candidates are viewed by the voters are often simplistic, and sometimes quite mistaken. Character traits are important to voters, but we need a better and more complete understanding of how and why these factors influence voters. An essential read which provides a clear and original argument to all those interested in furthering their understanding of the importance of candidate character traits for the quality of American elections and democracy.

Parliamentary Candidates Between Voters and Parties Lieven De Winter 2020-10-27 This book offers the first comprehensive, comparative and coherent perspective on parliamentary candidates in contemporary representative democracy. Based on the unique database of the 'Comparative Candidate Survey' project which interrogated parliamentary candidates in more than 30 countries, it fills a significant lacuna by focusing on the thousands of ordinary candidates that participate in national elections. It examines who the candidates are in terms of their socio-demographic background and political career patterns, how they were selected by their parties, what their policy preference are and whether these are congruent to those held by their voters, who they seek to represent and how they intend to do so once elected, and what their visions are on representative democracy and party government. Last but not least, it investigates how they go about reaching out to their potential voters during the election campaign. This book will be of key interest to scholars and students of political parties and party politics, political elites, political communication, political participation, elections, theories of democracy and representation, legislative studies, voting behaviour and more broadly to European politics, as well as to political and policy professionals throughout Europe.

The Rise of International Parliaments Frank Schimmelfennig 2020-12-14 International parliaments are on the rise. An increasing number of international organizations establishes 'international parliamentary institutions' or IPIs, which bring together members of national parliaments or - in rare cases - elected representatives of member state citizens. Yet, IPIs have generally remained powerless institutions with at best a consultative role in the decision-making process of international organizations. Why do the member states of international organizations create IPIs but do not vest them with relevant institutional powers? This study argues that neither the functional benefits of delegation nor the internalization of democratic

norms answer this question convincingly. Rather, IPIs are best understood as an instrument of strategic legitimation. By establishing institutions that mimic national parliaments, governments seek to ensure that audiences at home and in the wider international environment recognize their international organizations as democratically legitimate. At the same time, they seek to avoid being effectively constrained by IPIs in international governance. *The Rise of International Parliaments* provides a systematic study of the establishment and empowerment of IPIs based on a novel dataset. In a statistical analysis covering the world's most relevant international organizations and a series of case studies from all major world regions, we find two varieties of international parliamentarization. International organizations with general purpose and high authority create and empower IPIs to legitimate their region-building projects domestically. Alternatively, the establishment of IPIs is induced by the international diffusion of democratic norms and prominent templates, above all that of the European Parliament. *Transformations in Governance* is a major academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions, subnational governments, and public-private networks. It brings together work that advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

The Neurodivergent Job Candidate Marcia Scheiner 2021-11-10 This book provides guidance on recruiting, interviewing, and onboarding practices that will allow employers to successfully hire neurodivergent professionals into inclusive, competitive employment. Today, 35% of 18-year-olds with an autism spectrum diagnosis attend college, yet they have a 75–85% under-employment and unemployment rate after graduation. While organizations are looking to expand their diversity and inclusion hiring efforts to include neurodivergent professionals, current recruiting and interviewing practices in general are not well-suited to this. With over one-third of the US population identifying as neurodivergent, employers need to address how to attract this talent pool to take advantage of a meaningful segment of the workforce. Readers of this book will gain an understanding of how to guide their organizations through the creation of recruiting, interviewing, and onboarding processes tailored to neurodivergent professionals in any field. Written by authors with extensive experience working in the corporate world and consulting with Fortune 1000 companies on autism hiring efforts, this book is targeted at employers, acknowledging their perspective. Structured as a reference guide for busy recruiters, hiring managers, and supervisors, this book can be read in its entirety, in relevant sections as needed, or used as a refresher whenever necessary. This book also provides a background on the thinking styles of autistic individuals, giving the reader a deeper understanding of how to best support neurodivergent jobseekers.

How Voters Decide Richard R. Lau 2006-06-26 This book attempts to redirect the field of voting behavior research by proposing a paradigm-shifting framework for studying voter decision making. An innovative experimental methodology is presented for getting 'inside the heads' of citizens as they confront the overwhelming rush of information from modern presidential election campaigns. Four broad theoretically-defined types of decision strategies that voters employ to help decide which candidate to support are described and operationally-defined. Individual and campaign-related factors that lead voters to adopt one or another of these strategies are examined. Most importantly, this research proposes a new normative focus for the scientific study of voting behavior: we should care about not just which candidate received the most votes, but also how many citizens voted correctly - that is, in accordance with their own fully-informed preferences.

The Importance of Campaign Promises Tabitha Bonilla 2022-02-03 Campaign promises are a cornerstone of representative democracy. Candidates make promises to signal to voters their intentions in office and voters evaluate candidates based on those promises. This study unpacks the theorized pathway regarding campaign promises: not whether promises are kept, but what purpose promises serve, what they signal, and how they affect voter

decision-making. The author explores the pathways and conditions influencing promises and finds that promises tend to have a polarizing effect on voters' opinions of politicians, attracting similarly-positioned voters and strongly repelling voters who disagree with a candidate's position. In addition, voters perceive promise breakers as less honest and less likely to follow through than candidates who more weakly took the same position. With a wealth of data and fascinating case studies, this book is full of important insights into electoral psychology and the study of promises, campaigning, and representation.

Candidate Experience. What do Candidates experience and what do they expect during Application Processes? Jacqueline Mortsiefer 2018-04-03 Master's Thesis from the year 2017 in the subject Psychology - Work, Business, Organisational and Economic Psychology, grade: 1,0, Rhine-Waal University of Applied Sciences, language: English, abstract: The present explorative research study dealt with the candidate experience which is the sum of individual experiences of candidates with a potential employer during a recruiting process. The study examined which experiences candidates made and which expectations they have within application processes. In order to answer this question, a mixed-method approach was used. First, qualitative interviews (N = 4) were conducted. The content analysis revealed eleven categories which played an important role from the subjects' perspective. Second, a quantitative online questionnaire (N = 170), based on these categories, was performed. The data were analyzed by means of descriptive analyses, t-tests or rather Mann-Whitney U tests, analyses of variance, and correlations. In general, the findings showed that the applicants had a quite positive candidate experience. However, some basic features have to be considered within application processes including aspects such as giving feedback, providing information about the application status, sending confirmations of receipt and rejections and the

indication of a personal contact person. Furthermore, the study found significant differences between particular groups of applicants e.g. females and males, which are specified in the present work. In addition, the candidate experience correlated with the willingness for a renewed application and the likelihood to recommend the employer to others. Summarizing, it can be stated that taking into account the candidate experience offers a promising approach to master challenges like the demographic change, the skill shortage, the war for talent, and the digitization. By ensuring a positive candidate experience companies can differentiate from competitors in times in which there is change from an employer to an applicant market.

See how They Ran Gil Troy 1996 Convinced that the expensive, vulgar presidential campaign is worse than it has ever been, Americans long for the good old days of dignified campaigns and worthy candidates which, as this book demonstrates, never existed. Troy shows that our disappointment with campaigns is simply the latest chapter in a centuries-long struggle to make peace with the idea of leadership in a democratic society.

The Politics of Emotions, Candidates, and Choices Heather E. Yates 2016-05-29 Anchored in the idea that political campaigns matter to electoral outcomes, *The Politics of Emotions, Candidates and Choices* analyzes the dynamics of emotional voting and decision-making over the course of three presidential elections between 2004 and 2012. Each presidential campaign reflects a unique tone and mood, which influences voters' perceptions of choices and candidate image. Accounting for the idiosyncratic nature of a campaign environment and a candidate's message, this analysis isolates specific emotional dimensions that were influential on voters' appraisals of specific campaign issues. Relying on the Affective Intelligence theory and the Transfer-of-Affect thesis to narrate the causal relationships between voters' emotional responses and issue appraisals, this book illustrates the specific electoral contexts when voters' emotions are trusted as political knowledge and transferred to their beliefs about certain policies.

Surviving the Evacuation, Book 10: The Last Candidate Frank Tayell 2017-04-26 Whoever wins the election, humanity will lose. Nine months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland. Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative to a slide into despotism, an election is called. It is hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright's journals.

Re-Selecting Members of the European Parliament Elena Frech 2018-04-03 Elena Frech addresses the issue of candidate (re-)selection for the European elections. Studying German parties, the author investigates both, the rules and practice of candidate selection. The study is one of the first to shed light on the goals political parties pursue when selecting candidates in the European context. First, the author provides a detailed account of the formal and informal procedures German parties use to construct the electoral lists for the European elections. Then she turns towards the individual candidates, showing which factors determine the list placement of incumbent parliamentarians. The findings highlight the importance of individual candidate characteristics as well as party institutions and are of interest not only to scientists but also to parties, politicians, and citizens.

Political Candidate Selection Jeanette Ashe 2019-12-05 The "secret garden of politics", where some win and others lose their candidate selection bids, and why some aspirant candidates are successful while others fail have been enduring puzzles within political science. This book solves this puzzle by proposing and applying a universally applicable multistage approach to discover the relationship between selection rules, selectors' biases, aspirants' attributes, and selection outcomes. Rare party and survey data on winning and losing candidates and insider views on what it takes to win a selection contest at multiple selection stages are compared and used to reveal the inner workings of the secret garden. With a primary focus on the British Labour party over several elections, the findings challenge many long-held assumptions about why some aspirant candidate types are successful over others and provides real-world and controversial solutions to addressing women's and other marginalised groups' descriptive underrepresentation. As such, it provides a much-needed fresh look at party selection processes and draws new conclusions as to why political underrepresentation occurs and should inform policies to remedy it. This text will be of key interest to scholars and students of gender and ethnicity in politics, political parties and candidate selection, and more broadly to the study of political elites, comparative politics, sociology, labour studies, gender, race, and disability studies, and to practitioners.

Political Recruitment Pippa Norris 1995 Asking why some politicians succeed in moving into the highest offices of state while others fail, this text examines the relative lack of women, black and working class Members of Parliament, and whether this evident social bias matters for political

representation.

Candidate of Hell lazarus Mbanje 2020-07-18 My book, "Candidate of hell" presents a situation which is out of this world which was only managed by Jesus Christ alone. A dead father comes back from the dead as a ghost to tell his only son who was born after his demise the true story of his life. The story is heart tearing as Daglous is put through hell by his own father who only believes that a son can only be a strongman in future if he is molded along military discipline. The obstacle to Daglous' father was that Daglous himself did not want anything to do with the army training. Conflict explodes as the two engage in day to day scuffles as the young boy resist training while the father was determined to turn him into a fully flagged commando by the time he grows to a man. Daglous was a loser on each and everyone of the scuffles as he is beaten at every disagreement in the name of army discipline. As if that was not enough, events at home also affected things at school. Daglous's class teacher Miss Magoche does not take time to understand his problems. She also starts beating him as he fails to cope up with his school work. Left with nowhere to run Daglous finally says enough is enough and he runs away to the mining town of Zvishavane where he believes he will make a good life but alas the streets have their own mishaps and troubles. New challenges confront him as he tries to term life in the streets.
