Greece's most acclaimed living novelist gives us a magical realist portrait of contemporary Europe and contemporary Europeans. Here are seven tales that explore the themes of materialism, post Cold War politics, love, religious faith, and the power of imagination. In the tradition of Gabriel García Márquez and Luigi Pirandello, Vassilikos writes of the fantasies within reality, the spirit in existence, and the art within life.

**To my crush** - Brendon Thutso 2019-10-15

This book is a concoction of the poet's thoughts on a person they have an unquenchable crush on. The poet is not a very direct person and uses metaphors, riddles, and many other language tricks to embody what they intend to say. In the poem, "The Dream", the poet talks about watching the earth flood as he sits at the brink of the cumulonimbus, but as he continues through the poem it unravels to the reader that the poet is not talking about the real flood or cumulonimbus, instead the poet uses all those meteorological terms as a way to censor their language. In many other poems like "imagine", the poet expresses their love and admiration for their crush and the things they wish they could do together. contact: brentee01@gmail.com (author)

[The 48 Laws of Power](#) - Robert Greene 2000-09-01

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

*The Power of Starting Something Stupid* - Natalie Norton 2019

What if the smartest people in the world understand something that the rest of us don't? (They do.) What if they know that in order to achieve success, they will sometimes have to do things that others may initially perceive as stupid? The fact of the matter is that the smartest people in the world don't run from stupid, they lean into it (in a smart way). In *The Power of Starting Something Stupid*, Richie Norton redefines stupid as we know it, demonstrating that life-changing ideas are often tragically mislabeled stupid. What if the key to success, creativity, and fulfillment in your life lies in the potential of those stupid ideas? This deeply inspiring book will teach you: ÷ How to crush fear, make dreams happen, and live without regret. ÷ How to overcome obstacles such as lack of time, lack of education, or lack of money. ÷ The 5 actions of the New Smart to achieve authentic success. No more excuses. Learn how to start something stupid-the smartest thing you can do. Drawing on years of research, including hundreds of face-to-face interviews and some of the world's greatest success stories past and present, Richie shows you how stupid is the New Smart-the common denominator for success, creativity, and innovation in business and life.
