Heroic Identity in the World of Beowulf -

Scott Gwara 2009-01-31

In exploring the identities of foreign fighters seeking glory abroad, this revisionist book challenges the traditional view of Beowulf as a "hero." Beowulf emphasizes the obligations attending excellence and the temptation of power, both personal and civic.

Dragons, Serpents, and Slayers in the Classical and Early Christian Worlds - Daniel Ogden 2013-04-08

Stories about dragons, serpents, and their slayers make up a rich and varied tradition within ancient mythology and folklore. In this sourcebook, Daniel Ogden presents a comprehensive and easily accessible collection of dragon myths from Greek, Roman, and early Christian sources. Some of the dragons featured

are well known: the Hydra, slain by Heracles; the Dragon of Colchis, the guardian of the golden fleece overcome by Jason and Medea; and the great sea-serpent from which Perseus rescues Andromeda. But the less well known dragons are often equally enthralling, like the Dragon of Thespieae, which Menestratus slays by feeding himself to it in armor covered in fish-hooks, or the lamias of Libya, who entice young men into their striking-range by wiggling their tails, shaped like beautiful women, at them. The texts are arranged in such a way as to allow readers to witness the continuity of and evolution in dragon stories between the Classical and Christian worlds, and to understand the genesis of saintly dragon-slaying stories of the sort now characteristically associated with St George, whose earliest dragon-fight concludes the volume. All texts, a considerable number of which have not previously been available in English, are offered in new translations and accompanied by lucid commentaries that place

the source-passages into their mythical, folkloric, literary, and cultural contexts. A sampling of the ancient iconography of dragons and an appendix on dragon slaying myths from the ancient Near East and India, particularly those with a bearing upon the Greco-Roman material, are also included. This volume promises to be the most authoritative sourcebook on this perennially fascinating and influential body of ancient myth.

A History of Russian Literature - Andrew Kahn
2018

Russia possesses one of the richest and most admired literatures of Europe, reaching back to the eleventh century. A History of Russian Literature provides a comprehensive account of Russian writing from its earliest origins in the monastic works of Kiev up to the present day, still rife with the creative experiments of post-Soviet literary life. The volume proceeds chronologically in five parts, extending from Kievan Rus' in the 11th century to the present day. The coverage strikes a balance between extensive overview and in-depth thematic focus. Parts are organized thematically in chapters, which a number of keywords that are important literary concepts that can serve as connecting motifs and 'case studies', in-depth discussions of writers, institutions, and texts that take the reader up close and. Visual material also

underscores the interrelation of the word and image at a number of points, particularly significant in the medieval period and twentieth century. The History addresses major continuities and discontinuities in the history of Russian literature across all periods, and in particular bring out trans-historical features that contribute to the notion of a national literature. The volume's time-range has the merit of identifying from the early modern period a vital set of national stereotypes and popular folklore about boundaries, space, Holy Russia, and the charismatic king that offers culturally relevant material to later writers. This volume delivers a fresh view on a series of key questions about Russia's literary history, by providing new mappings of literary history and a narrative that pursues key concepts (rather more than individual authorial careers). This holistic narrative underscores the ways in which context and text are densely woven in Russian literature, and demonstrates that the most exciting way to

The Medieval Hero on Screen - Martha W. Driver 2004-07-01

Few figures have captured Hollywood's and the public's imagination as completely as have medieval heroes. Cast as chivalric knight, warrior princess, "alpha male in tights," or an amalgamation, and as likely to appear in Hong Kong action flicks and spaghetti westerns as films set in the Middle Ages, the medieval hero on film serves many purposes. This collection of

essays about the medieval hero on screen, contributed by scholars from a variety of disciplines, draws upon a wide range of movies and medieval texts. The essays are grouped into five sections, each with an introduction by the editors: an exploration of historic authenticity; heroic children and the lessons they convey to young viewers; medieval female heroes; the place of the hero's weapon in pop culture; and teaching the medieval movie in the classroom. Thirty-two film stills illustrate the work, and each essay includes notes, a filmography, and a bibliography. There is a foreword by Jonathan Rosenbaum, and an index is included.

Islamic Art - Sara Kuehn 2011-07-12

This book is a pioneering work on a key iconographic motif, that of the dragon. It examines the perception of this complex, multifaceted motif within the overall intellectual and visual universe of the medieval Irano-Turkish world. Using a broadly comparative approach, the author explores the ever-shifting semantics of the dragon motif as it emerges in neighbouring Muslim and non-Muslim cultures. The book will be of particular interest to those concerned with the relationship between the pre-Islamic, Islamic and Eastern Christian (especially Armenian) world. The study is fully illustrated, with 209 (b/w and full colour) plates, many of previously unpublished material. Illustrations include photographs of architectural structures visited by the author, as well as a vast collection of artefacts, all of which are described and discussed in detail with inscription readings, historical data and textual sources.

Back in the USSR - Rory MacLean 2014-10-30
Ian Fleming could not have imagined a better place to set a thriller: an upstart mini-state on the edge of Europe, Transnistria is a nowhere-land, a Soviet museum occupied by Russian peace-keepers near the Black Sea. Its oligarchs in Adidas tracksuits hunt wild boar with AK-47s. Its young people train for revolution at the Che Guevara High School of Political Leadership. Its secret factories have supplied arms to Chechnya and electrical cable to Iran's Bushehr nuclear power plant. Its isolation and tiny size belie the real threat it poses to the West. To many observers, Transnistria is the North Korea of Europe. Yet its new president has launched a cunning coup of political marketing, appointing as his top ministers personable young women like the Facebook-savvy Cheryl Cole lookalike Foreign Minister, sexing-up the republic's image abroad, and using their glitter to obscure this internationally unrecognised non-state's

Moses - George W. Coats 1988-02-01
Dr Coats, widely recognized for his work over two decades on the Pentateuchal traditions, here presents us with his distinctive portrait of Moses. George Coats identifies two strands in the Moses tradition, the tradition of the hero who represents the people of God, and that of the 'man of God', distinctly unheroic in folkloristic terms, who represents God to the people. This duality in the portrayal of Moses

becomes evident already in the call narrative of Exodus 3, a narrative that should not be divided between J and E but reflects the most ancient perception of the character Moses and his significance.
