*Listen Up or Lose Out* Robert Bolton 2018-02-22 Learning how to actively listen and absorb what a person is saying, thinking, and feeling can set the stage for dramatically improved relationships and increased personal success. In *Listen Up or Lose Out*, communications expert Robert Bolton highlights the underestimated and underutilized tool of active listening and explains how it can be used to gather perspectives, bridge differences, and resolve problems. Bolton teaches you key communication skills by: breaking down listening into a set of learnable skills such as avoiding the urge to criticize, question, or advise; focusing on the speaker's point of view; asking the right questions, in the right order; and learning how to read people's feelings and reflect them back. *Listen Up or Lose Out* explains how one can become a skilled listener who experiences fewer conflicts, makes better decisions, and discovers opportunities that others might miss. communication? Give listening a try!

### **Creating a Culture for High-Performing Schools** Cletus R.

Bulach 2008-08-28 A high performing school is described as one where student achievement is high and student and teacher absenteeism is low. Student behavior is such that teachers seldom have to control them or tell them what to do. This results in greater time on task, higher teacher morale, low teacher absenteeism, and improved parental support. One other distinctive feature of a high performing school is that the student peer group is a positive force and not a negative force. The end result is a school culture where faculty and students trust and care about each other, and there is a cooperative attitude.

*Jewish Rhetorics* Michael Bernard-Donals 2014-12-02 This volume, the first of its kind, establishes and clarifies the significance of Jewish rhetorics as its own field and as a field within rhetoric studies. Diverse essays illuminate and complicate the editors' definition of a Jewish rhetorical stance as allowing speakers to maintain a "resolute sense of engagement" with their fellows and their community, while also remaining aware of the dislocation from the members of those communities. Topics include the historical and theoretical foundations of Jewish rhetorics; cultural variants and modes of cultural expression; and intersections with Greco-Roman, Christian, Islamic, and contemporary rhetorical theory and practice. In addition, the contributors examine gender and Yiddish, and evaluate the actual and potential effect of Jewish rhetorics on contemporary scholarship and on the ways we understand and teach language

and writing. The contributors include some of the world's leading scholars of rhetoric, writing, and Jewish studies.

*Clinical Leadership* Dickon Weir-Hughes 2013-09-13 The definitive guide to clinical leadership, by Dickon Weir-Hughes, the Chief Executive of the NMC. The book provides a helpful and practical summary of the key leadership principles within healthcare. Dickon has drawn on his personal experience of the 'sharp end' of clinical leadership in a number of organisations. Utilising his experience as a leadership programme facilitator, mentor and coach, he understands the need for students and practitioners to grasp leadership concepts and terminology, to assess their competence against such a framework and to have some suggestions for taking forward personal development. This book fulfils that in an accessible and novel way.

Focus on Them Ryan Changcoco 2018-12-26 Perfect the Skills to Excel as a Manager An engagement crisis, a management skill shortage, a retention problem—call it what you will, today's research and workplace insights emphasize that many employees leave managers. . . not companies. Good managers know they need to deliver results to be successful. But great ones? They understand the essence of managing encompasses something more: making connections, embodying the right skills, and developing their direct reports. They also realize managing well takes practice. With *Focus on Them*, you'll get the tools and know-how to excel as a manager. Edited by the Association for Talent Development's own management authority Ryan Changcoco, research expert Megan Cole, and content developer Jack Harlow, this book explores ATD's new management framework—the ACCEL model. Each chapter, written by a leader in management and talent development, focuses on one of the five skills all managers need: Accountability (Timothy Ito) Communication (Ken O'Quinn) Collaboration (Winsor Jenkins)

Engagement (Hunter Haines) Listening and assessing (Michele Nevarez) By investing in your own development—boosting your ACCEL skills—you signal to your employees that you’re serious about their development and learning, too. *Strategic Listening* Mats Heide 2023-11-29 Listening is so simple, yet so difficult. Many times, listening is taken for granted. One could therefore say that listening is the forgotten part of communication. Although organizations have more digital and analog communication channels than ever, too little time is spent listening to customers, employees, and other influential groups. It is a shame that listening is not given more attention, as it is linked to many positive values. Examples include better conversations, increased trust and confidence, more outstanding commitment and job satisfaction, lower absenteeism due to illness, higher productivity and quality of work, increased sales, better relationships with customers and employees, and many other positive effects. To the extent that listening takes place, organizations rarely take a holistic approach to it. Strategic listening means a given objective for listening, thoughts about who should listen, when it should happen, and so on. An organization's listening must become a strategic issue to exploit the great potential of increased listening. This book provides answers to the following: Why is listening important? What are the barriers to listening? How can both individuals and organizations become better at listening? How can organizations

develop strategic listening skills? How does one build a system to improve an organization's strategic listening?
