Women, Aging, and Ageism - Evelyn R Rosenthal  
2014-04-23

Here is a unique text that examines the lives of middle-aged and old women. Women, Aging and Ageism, in response to the lack of literature that focuses on aging women, presents timely and definitive research that illustrates the implications of ageism and sexism. This landmark volume challenges powerful myths and dangerous stereotypes and identifies the damaging restrictions that society forces upon aging women. In extending feminist research to middle and old age, the chapters taken together comprise a critique of the conditions of the last third of women's lives. The authors use analytical tools and methodologies developed and modified by feminists to explore questions previously unasked. They focus on issues of deep concern to women at midlife and beyond, including the politics of reproduction, sexuality, social isolation, violence against women, equal opportunity, and the feminization of poverty. Women, Aging and Ageism is available for classroom adoption. Ideal for students and helping professionals working with middle-aged and old women and their families, this book provides models of effective interventions grounded in field research and clinical practice. For all readers concerned about middle-aged and old women and the quality of their lives, Women, Aging and Ageism is a rich resource filled with ideas and information and an affirmative new volume about the limitless possibilities of women's achievement in midlife and old age.

Awareness of the importance of sexuality and its disorders in the aging population is increasing as the proportion of older people increases. Based in part on the author's clinical experience and research at Mount Sinai Medical Center in New York, this book presents an up-to-date overview of the sexuality of aging men in health and illness, within a multidimensional conceptual framework. It takes into account physiological, psychological, interpersonal, and social influences. The book also discusses the impact of medical illness, psychopathology, and drugs, with a review of coping strategies in shaping individual sexual responses to aging and

disease. The author incorporates many case studies and vignettes, and devotes a chapter to the sexuality of older gay men. A balanced account of medical and psychosocial evaluation and treatment concludes the book, which will be of broad interest to clinicians and students interested in sexuality and aging.
