Popular Science - 2005-09

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Behavioral Neuroscience - George Spilich 2023-05-16

Behavioral Neuroscience by George Spilich, presents the neurophysiological aspects of behavior to the 21st-century, digital-native learner in the context of human experience, rather than in that of laboratory experiments with non-human animals. Whether a student has enrolled in the course to prepare them for a career in medicine or science, or they are fulfilling a general education science requirement, Behavioral Neuroscience is written to meet them where they are. The text has an accessible writing style, real-life examples and data sets, active-learning exercises, and multimodal media and quizzes—all designed to make the subject more engaging and relevant. This ground-breaking first edition is ideal for the Introductory Behavioral Neuroscience or the Biological Psychology course.

Computer Vision - ECCV 2022 - Shai Avidan 2022-11-02

The 39-volume set, comprising the LNCS books 13661 until 13699, constitutes the refereed proceedings of the 17th European Conference on Computer Vision, ECCV 2022, held in Tel Aviv, Israel, during October 23-27, 2022. The 1645 papers presented in these proceedings were carefully reviewed and selected from a total of 5804 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

Compensated Dating - Cassini Sai Kwan Chu 2018-01-16

This book considers a burgeoning social phenomenon, compensated dating in Hong Kong, that facilitates direct commercial sex exchange between consenting females from their mid-teens through the late 20s and males from their early 20s to mid-adulthood. Informed by the transformation of intimacy, the breakdown of institutional constraints, the emergence of a new female sexual autonomy and the advancement of information technology, this book moves beyond stereotypes of sex work to look at the complexities of compensated dating. The phenomenon of compensated dating is distinctive from most other sex trades in that it involves intense emotional interactions and often extends beyond the commercial boundary. Given the dynamic, flexible and ambiguous nature of compensated dating, it has become more of a space for sexual explorations and less of a rigid model of commercial sex, at least in the eye of the participants. This book walks through how men become involved in compensated dating and also sheds lights on how gender relations are negotiated, with important implications on what it means to be a man and a woman in contemporary Hong Kong society. It also speaks to the broader transformations of some of the key social structures and elements, particularly gender and sexualities, in the era of late modernity.

Bulletin of the Atomic Scientists - 1970-12

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

America Unzipped - Brian Alexander 2008

Welcome to the America we don't usually talk about. As journalist Alexander uncovers, fringe

experimentation has gone suburban--soccer moms, your accountant, even your own parents could be turning kinky. Stunned by the uninhibited questions from ordinary people on his msnbc.com column, "Sexploration," Alexander was driven to understand Americans' desire to get down and dirty--especially in an era where conservative family values dominate. To find out what people are really doing, he set out on a sexual safari. Whether mixing it up at a convention of fetishists, struggling into his own pair of PVC pants for a wild night at a sex club, being tutored on sex toys by a nineteen-year-old supervisor while working in an adult store, or learning the surprising ways of Biblical sex from an evangelical preacher, Alexander uses humor and insight to reveal a sexual world that is quickly redefining the phrase "polite society."--From publisher description.

Bodies That Matter - Judith Butler 2014-09-03

In *Bodies That Matter*, Judith Butler further develops her distinctive theory of gender by examining the workings of power at the most "material" dimensions of sex and sexuality. Deepening the inquiries she began in *Gender Trouble*, Butler offers an original reformulation of the materiality of bodies, examining how the power of heterosexual hegemony forms the "matter" of bodies, sex, and gender. Butler argues that power operates to constrain "sex" from the start, delimiting what counts as a viable sex. She offers a clarification of the notion of "performativity" introduced in *Gender Trouble* and explores the meaning of a citational politics. The text includes readings of Plato, Irigaray, Lacan, and Freud on the formation of materiality and bodily boundaries; "Paris is Burning," Nella Larsen's "Passing," and short stories by Willa Cather; along with a reconsideration of "performativity" and politics in feminist, queer, and radical democratic theory.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Murder Online - G. C. Manville

Popular Mechanics - 2000-01

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Tribune for Victory and Socialism - 2007

The Advocate - 2001-02-13

The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

Esquire - 2007

The Story of Us - Logan Meredith 2019-09-17

Sometimes getting everything you're dreaming of means letting go of what you think you want. There is

nothing special about Kyle McMillan. The forty-year-old construction manager for a high-end home builder is pursuing a lifelong goal of obtaining a college degree when his average, uneventful life literally collides with Lucas Cass. When Lucas opens the door for a spontaneous sexual encounter, Kyle walks through it. Soon, the hottest, most instinctive thing Kyle has ever done turns upside-down. Lucas isn't only out of Kyle's league and seventeen years younger, but he's also a gay porn star. Lucas is so used to being reduced to a single body part that he's not sure how to react to Kyle's interest then rejection. He loves what he does and the company he works for, but Kyle is exactly what he's always wanted. He's not walking away without taking another shot. After finding themselves in the same summer class, the two put off the discussion of Lucas' porn career and agree to date casually. Lucas is determined to show Kyle how fun kinky sex is and how amazing they can be together. When the road gets rocky, Kyle must finally deal with Lucas' job and his own sexual hang-ups or risk hitting a dead end. But if they can negotiate a compromise, they might just end up someplace extraordinary.

I Confess! - Thomas Waugh 2019-11-21

In the postwar decades, sexual revolutions - first women's suffrage, flappers, Prohibition, and Mae West; later Alfred Kinsey, Hugh Hefner, and the pill - altered the lifestyles and desires of generations. Since the 1990s, the internet and its cataclysmic cultural and social technological shifts have unleashed a third sexual revolution, crystallized in the acts and rituals of confession that are a staple of our twenty-first-century

lives. In *I Confess!*, a collection of thirty original essays, leading international scholars such as Ken Plummer, Susanna Paasonen, Tom Roach, and Shohini Ghosh explore the ideas of confession and sexuality in moving image arts and media, mostly in the Global North, over the last quarter century. Through self-referencing or autobiographical stories, testimonies, and performances, and through rigorously scrutinized case studies of "gay for pay," gaming, camming, YouTube uploads, and the films *Tarnation* and *Nymph()*maniac, the contributors describe a spectrum of identities, desires, and related representational practices. Together these desires and practices shape how we see, construct, and live our identities within this third sexual revolution, embodying both its ominous implications of surveillance and control and its utopian glimmers of community and liberation. Inspired by theorists from Michel Foucault and Gilles Deleuze to Gayle Rubin and José Esteban Muñoz, *I Confess!* reflects an extraordinary, paradigm-shifting proliferation of first-person voices and imagery produced during the third sexual revolution, from the eve of the internet to today.

PISA Take the Test Sample Questions from OECD's PISA Assessments - OECD 2009-02-02

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.
