Evaluation of the Sexually
Abused Child - Astrid M. Heger
2000-09-07

Written by a group of nationally-recognized physicians, *Evaluation of the Sexually Abused Child, 2E* is a comprehensive and authoritative resource that provides a step-by-step discussion of how to interview and clinically evaluate suspected child sexual abuse cases. The contributors draw on their extensive experience to provide sensitive and practical guidance on psychological aspects of abuse, conducting the medical interview and physical exam to make a diagnosis, sexually transmitted disease, and the role of the physician in court. This new edition includes

updated information on lab techniques, revised protocols for intervention programs, and a host of new data from several recently released longitudinal studies that followed abused children into adolescence and adulthood. A key feature of the first edition, a photographic atlas documenting and classifying ambiguous signs of abuse, has been expanded by more than 40% to incorporate new photos on the sexual abuse of adolescents, patterns of healing trauma, and additional examples of normal variations and medical conditions.

What We Talk About When We Talk About Rape - Sohaila Abdulali 2018-10-25

Thoughtful, provocative and intelligent, this game-changing book looks at sexual assault and the global discourse on rape from the viewpoint of a survivor, writer, counsellor and activist. Sohaila Abdulali was the first Indian rape survivor to speak out about her experience. Gang-raped as a teenager in Mumbai and indignant at the deafening silence on the issue in India, she wrote an article for a women's magazine questioning how we perceive rape and rape victims. Thirty years later she saw the story go viral in the wake of the fatal 2012 Delhi rape and the global outcry that followed. Drawing on three decades of grappling with the issue personally and professionally, and on her work with hundreds of other survivors, she explores what we think about rape and what we say. She also explores what we don't say, and asks

pertinent questions about who gets raped and who rapes, about consent and desire, about redemption and revenge, and about how we raise our sons. Most importantly, she asks: does rape always have to be a life-defining event, or is it possible to recover joy?

This book will also be available as translated versions over the following months. Created with heart and keen intelligence, The Clinical Companion of the Donkey has all the attributes of the animal it aims to aid, and will surely be the textbook of professionals involved with donkeys for years to come.
