## **Women in Prison -**

Queensland. Anti-Discrimination Commission 2006

Women prisoners are victims as well as offenders. Very few are serious violent offenders. They pose little risk to public safety. Many are single parents with dependent children. More than half have been diagnosed with a specific mental illness. Significant numbers have been drug users, and more than 40% have been victims of non-consensual sexual activity, often as young girls.

Incapacitation - Marijke Malsch 2016-05-23

In many criminal justice systems a new trend towards incapacitation can be witnessed. A ubiquitous want for control seems to have emerged as a consequence of perceived safety risks. This can be seen not only in the mass incarceration of offenders but

*Downloaded from  
[legacy.opendemocracy.net](http://legacy.opendemocracy.net)  
on 2022-09-30 by guest*

also in the disqualification of offenders from jobs, in chemical castration in cases of sexual crimes, the increased use of electronic monitoring and in the life-long monitoring of individuals who pose certain risks. Trends towards incapacitation are now even spreading to public administration and the employment sector, in the refusal of licenses and the rejection of employees with past criminal records. This book discusses the topic of incapacitation from various angles and perspectives. It explores how theories of punishment are affected by the more recent emphasis on incapacitation and how criminal justice practice is changing as a consequence of this new emphasis. Many contributors express criticisms with this trend towards incapacitation. They argue for a better calibration of measures to the severity of the misconduct. In addressing an increasingly important development in criminal justice, the book will be an

essential resource for students, researchers, and policy-makers working in the areas of criminal law, sentencing, probation and crime prevention.

*Child Sexual Abuse in Queensland* - Queensland Crime Commission 2000

*Preventing Crime or Punishing Propensities? A Purposive Examination of the Preventative Detention of Sex Offenders in Queensland and Western Australia* - Michelle Edgely 2015

According to their stated objectives, the Dangerous Prisoners (Sexual Offenders) Act 2003 (Qld) and the Dangerous Sexual Offenders Act 2006 (WA) are aimed at protecting the community by detaining dangerous sex offenders after the expiration of their sentences. This paper questions the scientific validity and reliability of psychiatric assessments of sex offender dangerousness. It also considers whether preventative detention imposes additional punishment on sex offenders

and/or punishes them for their propensities.

Sex Offenders and Preventive Detention - Bernadette McSherry 2009

How should society manage sex offenders who are released from prison? How can sex offenders be detained in a way that prevents re-offending while respecting civil liberties? Is preventive detention a type of double punishment? Do prison-based sex offender treatment programs work? What is the best way to protect the community from sex offending? Professors McSherry and Keyzer focus on three key modern policy responses to such questions, and the cases that propelled their development: Earl Shriner in Washington State, and the United States approach of detaining 'sexually violent predators' in special institutions; Dennis Ferguson in Queensland, and the Australian post-sentence detention and supervision schemes; John Cronin in Scotland, and the Scottish approach of making orders for lifelong restriction at

the time of sentence.

Dangerous People - Bernadette McSherry 2011-11-28

Experienced legal academics and mental health professionals explore the current approaches to "dangerousness" and preventive detention. The defining characteristics of those deemed dangerous by society vary according to culture, place, and time, and the contributors to this text have gathered to analyze the policies and practices related to current out-groups such as sex offenders, suspected terrorists, and young offenders in the United States, Scotland, England, and Australia. *Dangerous People* is the result of their research, workshopping, and writing.

The text is organized logically

and begins with a section on Parameters that explores the international human rights and legal limitations related to preventive detention schemes. It moves on to Policy, where contributors examine legislative policy, and Prediction, or risk assessment, especially in terms of violent crimes in youth. The section on Practice focuses on recent schemes to prevent re-offending. This text is indispensable as a resource that deals with the practical issues surrounding preventive detention and supervision schemes, the assessment of the risk of future harm in offenders, and different programs and sentencing options for high-risk offenders with mental illnesses. It contains case examples that bring real-life issues to light and sets forth an agenda to provide effective ways to protect communities from harm.

DON'T REPORT RAPE - Trish

Wyatt 2022-10-26

Women have been told for years to report violent crimes and hold offenders accountable. Trish Wyatt is the survivor of a vicious sex crime, so how can her advice to other survivors be, don't report it? Despite the emergence of No means No campaigns, #MeToo, Enough is Enough and the March 4 Justice movement. The system is broken. Find out firsthand what it is like for a survivor of not only an eight-hour brutal, violent sexual assault and rape, but a survivor of the cruel processes of our justice system. Trish endured a three year ordeal in an attempt to get justice, to hold a violent sex offender accountable and to protect other women in the community. Amongst the darkness and injustice of this story, there is a hidden gem. A sisterhood of women who formed to create a safety net for this survivor, who supported and encouraged her through the process, who reassured her that she was doing the right thing even when she wanted to give up.
