*Biomedicine, Healing and Modernity in Rural Bangladesh* - Md. Faruk Shah 2019-12-02

This book provides an ethnographic account of the ways in which biomedicine, as a part of the modernization of healthcare, has been localized and established as the culturally dominant medical system in rural Bangladesh. Dr Faruk Shah offers an anthropological critique of biomedicine in rural Bangladesh that explains how the existing social inequalities and disparities in healthcare are intensified by the practices undertaken in biomedical health centres through the healthcare bureaucracy and local gendered politics. This work of villagers' healthcare practices leads to a fascinating analysis of the local healthcare bureaucracy, corruption, structural violence, commodification of health, pharmaceutical promotional strategies and gender discrimination in population control. Shah argues that biomedicine has already achieved cultural authority and acceptability at almost all levels of the health sector in Bangladesh. However, in this system healthcare bureaucracy is shaped by social capital, power relations and kin networks, and corruption is a central element of daily care practices.

**Borderland Lives in Northern South Asia** - David N. Gellner 2013-12-02

Borderland Lives in Northern South Asia provides valuable new ethnographic insights into life along some of the most contentious borders in the world. The collected essays portray existence at different points across India's northern frontiers and, in one instance, along borders within India. Whether discussing Shi'i Muslims striving to be patriotic Indians in the Kashmiri district of Kargil or Bangladeshis living uneasily in an enclave surrounded by Indian territory, the contributors show that state borders in Northern South Asia are complex sites of

contestation. India's borders with Bangladesh, Bhutan, Burma/Myanmar, China, and Nepal encompass radically different ways of life, a whole spectrum of relationships to the state, and many struggles with urgent identity issues. Taken together, the essays show how, by looking at state-making in diverse, border-related contexts, it is possible to comprehend Northern South Asia's various nation-state projects without relapsing into conventional nationalist accounts. Contributors. Jason Cons, Rosalind Evans, Nicholas Farrelly, David N. Gellner, Radhika Gupta, Sondra L. Hausner, Annu Jalais, Vibha Joshi, Nayanika Mathur, Deepak K. Mishra, Anastasia Piliavsky, Jeevan R. Sharma, Willem van Schendel [International Public Health](#) - Michael H. Merson 2005

**Sex, Science and Morality in China** - Joanna McMillan 2014-07-30

After decades of near silence on the matter, sex is being talked about in China. But what is being said? Who is allowed to speak? And whose purposes are being served? This ground-breaking book takes a critical look at how sex in China is thought and talked about. Drawing on the work of the country's foremost sex experts, and years of research in the field, it gives an overview of the sexual landscape in China today. Including new material on transsexuals, fetishism, sex aids and pornography, the book shows that the dominant ways of thinking about sex are neither innocent nor inconsequential, and that amid catalogues of prescriptions linking self-management to the collective good, people are making decisions about how to live their sexual lives. The most lively and accessible critique of sexual discourse, this book will be essential reading for scholars in Chinese studies, cultural studies and sexuality and gender studies.

**Himāl** - 2000

**Bitter Pills** - Muhammad Hamid Zaman 2018

Cities in crisis -- The life of a pill -- An age-old problem -- Of mice and cats -- Unaware, unable or unwilling? -- Crime and punishment -- Trust and mistrust -- The disconnected citizens -- The technological fix? -- The ivory trade

**Clinical Gynecology** - Eric J. Bieber 2015-04-23

Written with the busy practice in mind, this book delivers clinically focused, evidence-based gynecology guidance in a quick-reference format. It explores etiology, screening, tests, diagnosis, and treatment for a full range of gynecologic health issues. The coverage includes the full range of gynecologic malignancies, reproductive endocrinology and infertility, infectious diseases, urogynecologic problems, gynecologic concerns in children and adolescents, and surgical interventions including minimally invasive surgical procedures. Information is easy to find and absorb owing to the extensive use of full-color diagrams, algorithms, and illustrations. The new edition has been expanded to include aspects of gynecology important in international and resource-poor settings.

***The Globalization of Crime*** - United Nations Office on Drugs and Crime 2010

In *The globalization of crime: a transnational organized crime threat assessment*, UNODC analyses a range of key transnational crime threats, including human trafficking, migrant smuggling, the illicit heroin and cocaine trades, cybercrime, maritime piracy and trafficking in environmental resources, firearms and counterfeit goods. The report also examines a number of cases where transnational organized crime and instability amplify each other to create vicious circles in which countries or even subregions may become locked. Thus, the report offers a striking view of the global dimensions of organized crime today.

**Infertility in the Male** - Larry I. Lipshultz 2009-09-24

The new edition of this canonical text on male reproductive medicine will cement the book's market-leading position. Practitioners across many specialties - including urologists, gynecologists, reproductive endocrinologists, medical endocrinologists and many in internal medicine

and family practice - will see men with suboptimal fertility and reproductive problems. The book provides an excellent source of timely, well-considered information for those training in this young and rapidly evolving field. While several recent books provide targeted 'cookbooks' for those in a male reproductive laboratory, or quick reference for practising generalists, the modern, comprehensive reference providing both a background for male reproductive medicine as well as clinical practice information based on that foundation has been lacking until now. The book has been extensively revised with a particular focus on modern molecular medicine. Appropriate therapeutic interventions are highlighted throughout.

**Contemporary Treatment of Erectile Dysfunction** - Kevin T. McVary 2010-12-17

Erectile dysfunction can affect all age groups. Numerous physical and emotional risk factors may contribute to the problem. These risk factors can range from chronic diseases and medications to psychological factors. In the U.S. alone, it has been estimated that 18 to 30 million men suffer from erectile dysfunction. This number has increased significantly as awareness of the disorder has heightened. Researchers and health care professionals now have a better understanding of what causes erectile dysfunction and the effective medications and non-medication treatments used to treat the condition. Comprehensive and state-of-the-art, *Contemporary Treatment of Erectile Dysfunction: A Clinical Guide* synthesizes the literature and covers all aspects of treating erectile dysfunction and other related male sexual dysfunctions. This invaluable title offers all physicians, residents, and fellows -- and even medical students and other health professionals such as nurse practitioners and physician assistants - an essential reference for enhancing diagnosis and treatment of this debilitating disorder.

**I.P.I. Report** - 1998**Lost in Transition** - Kristen Ghodsee 2011-09-14

Through ethnographic essays and short stories based on her experiences in Eastern Europe between 1989 and 2009, Kristen Ghodsee explains

why many Eastern Europeans are nostalgic for the communist past.

World Development Report 1978 - 1978

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

*Pakistan & Gulf Economist* - 2002

**Sociological Abstracts** - Leo P. Chall 2003

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

**Carved Flesh / Cast Selves** - Tone Bleie 2021-01-07

All the papers in this volume deal with the central theme of gender. The social contexts they examine range widely from Melanesia and Southeast Asia to Africa, Europe and America; yet in each case of these very diverse cases the concern is to analyse the ways in which gender is constructed.

Focus Group Methodology - Pranee Liamputtong 2011-03-11

Focus Group Methodology is an introductory text which leads readers through the entire process of designing a focus group study, from conducting interviews to analysing data and presenting the findings. It also includes discussions on cross-cultural and virtual focus group. Liamputtong presents clear, practical advice in simple terms which will be appropriate for undergraduate and postgraduate students who are undertaking research, making this an ideal starter text for anyone new to

focus group research. Like her previous book, *Researching the Vulnerable*, Liamputtong's latest work pays close attention to research ethics and will also be of great interest to researchers who are working with different social groups - such as women, men, older people, children and ethnic groups - and anybody who is engaging in cross-cultural research. Illustrated with case studies and examples throughout, this is a perfect introduction to focus group methods for students and new researchers alike.

*Male Sexual Function* - John J. Mulcahy 2007-11-16

The first edition of *Male Sexual Function: A Guide to Clinical Management* was published in 2001. Since that time, two new oral medications for erectile dysfunction (ED), Vardenafil (Levitra) and Tadalafil (Cialis), have been introduced. Links between ED and lower urinary tract symptoms have been postulated, advances in the basic science of erectile physiology have occurred, and the appreciation of ED as a form of endothelial dysfunction and a harbinger of other more potentially lethal forms of vascular disease has become more widespread. In some instances, third-party payers have reduced or eliminated coverage for ED treatments in an attempt to cut costs. They have classified sexual activity as "recreational," "lifestyle," or not medically necessary, but have failed to appreciate the negative consequences of ED, such as depression with all of its ramifications. *Male Sexual Function: A Guide to Clinical Management, Second Edition* is a comprehensive overview of the field of male sexual function and includes a chapter on female sexual dysfunction, an emerging field with a very high incidence in the population and an ever-growing following.

**Pelvic Organ Dysfunction in Neurological Disease** - Clare J. Fowler 2010-11-04

*Pelvic Organ Dysfunction in Neurological Disease* describes the neurological control of human bladder, bowel and sexual function and then details the dysfunctions which may arise as a consequence of various neurological diseases. Easy to read, the book will be of value to any healthcare professional managing patients in whom pelvic organ functions have been compromised by neurological disease. The book

provides a structured approach to present day understanding of the neurological control of pelvic organs and the investigation and management of each type of organ dysfunction. A unique feature of this book is that it addresses the impact of specific neurological disorders on all three functions. The authors have all been associated with the Department of Uro-Neurology at the National Hospital for Neurology and Neurosurgery, London since it was established 20 years ago. This book is a timely review of their accumulated knowledge and the latest literature. *Multiple Sclerosis Therapeutics* - Jeffrey A. Cohen 2011-10-20

This book comprehensively reviews the current state of clinical trial methods in multiple sclerosis treatment, providing investigators, sponsors and specialists with current knowledge of outcome measures and study designs for disease and symptom management. The status of

the rapidly evolving field of disease-modifying drugs is presented, with emphasis on the most promising therapies currently being tested. Experts discuss disease and symptom management for MS subtypes, including neuromyelitis optica and pediatric MS. In addition, key scientific advances in MS pathology, genetics, immunology and epidemiology are presented. The fourth edition has been extensively revised, featuring more than 50% new material. All chapters have been substantially updated to provide current information on rapidly evolving topics and this volume contains 15 new chapters, reflecting the growth of the field in recent years. This book is an essential reference for practitioners caring for MS patients, investigators planning or conducting clinical trials, and clinical trial sponsors.
