Tun-huang Popular Narratives Professor Victor H Mair 1983-11-10 Tun-huang Popular Narratives presents authoritative translations of four vernacular Chinese stories, taken from fragmentary texts usually referred to as pien-wen or 'transformation texts'. Dating from the late T'ang (618-907) and Five Dynasties (907-959) periods, the texts were discovered early last century in a cave at Tun-huang, in Chinese Central Asia. However, written down in an early colloquial language by semi-literate individuals and posing formidable philological problems, the texts have not been studied critically before. Nevertheless they represent the only surviving primary evidence of a widespread and flourishing world of popular entertainment during these centuries. The tales deal with both religious (mostly Buddhist) and secular themes, and make exciting and vivid reading.

Essentials of Interventional Cancer Pain Management Amitabh Gulati 2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. *Essentials of Interventional Cancer Pain Management* globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and fellows.

Reasons and Persons Derek Parfit 1986-01-23 This book challenges, with several powerful arguments, some of our deepest beliefs about rationality, morality, and personal identity. The author claims that we have a false view of our own nature; that it is often rational to act against our own best interests; that most of us have moral views that are directly self-defeating; and that, when we consider future generations the conclusions will often be disturbing. He concludes that moral non-religious moral philosophy is a young subject, with a promising but unpredictable future.

Edward Turner Jeff Clew 2006 For the first time the life of Edward Turner, one of Britain's most talented motorcycle designers, is revealed in full, so this is much more than just another book about Triumph motorcycles. Although seen by many as an irascible man who ran a very tight ship, it is an inescapable fact that that his was a highly profitable company. His hugely successful sales campaign after World War 2 stunned America's own manufacturers and had long lasting repercussions on their own home market. As Bert Hopwood once said to the Author, Turner was an inventive genius who had the flair for pleasing shapes and an uncanny ability to perceive what the buying public would readily accept, to produce it at the right price. No one will deny the impact made at the annual Motor Cycle Show by his aerial Square Four in 1931, his superbly-styled single cylinder Tiger models in 1936, and his revolutionary Speed Twin that dominated the Show in 1937. Even more was to follow with his post-war Thunderbird and Bonneville twins.

An Introduction to Applied Semiotics Louis Hébert 2019-11-28 An Introduction to Applied Semiotics presents nineteen semiotics tools for text and image analysis. The Meaning of Cricket Jon Hotten 2016-07-07 Cricket is a strange game. It is a team sport that is

almost entirely dependent on individual performance. Its combination of time, opportunity and the constant threat of disaster can drive its participants to despair. To survive a single delivery propelled at almost 100 miles an hour takes the body and brain to the edges of their capabilities, yet its abiding image is of the gentle village green, and the glorious absurdities of the amateur game. In *The Meaning of Cricket*, Jon Hotten attempts to understand this fascinating, frustrating and complex sport. Blending legendary players, from Vivian Richards to Mark Ramprakash, Kevin Pietersen to Ricky Ponting, with his own cricketing story, he explores the funny, moving and melancholic impact the game can have on an individual life.

Cyberpragmatics Francisco Yus 2011-08-22 *Cyberpragmatics* is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail, Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. The Last Act of Adam Campbell Andy Jones 2020-01-09 'Astoundingly good. Brave, wickedly funny and profoundly affecting. Wow!' Miranda Dickinson 'An emotional punch-packer of a book. Be prepared for it to swallow you whole' Milly Johnson 'A big-hearted, funny, hugely emotional and uplifting novel - I loved it!' Rachael Lucas 'Such a beautifully written book with characters that will linger in your head and heart' Sarah J Naughton **** You don't need talent to join this group of actors. The ability to remember lines or stay awake throughout a performance is appreciated, but not essential. The only mandatory is a terminal diagnosis. But Adam Campbell is less than enthusiastic about this eccentric form of group therapy. He has under one year to live, and a heck of lot to get done. Like explaining mortality to his six-year-old daughter. And making amends with the woman who should have been his wife. The last thing Adam needs is a part in an amateur production of 'Shakespeare's Greatest Deaths'. But help and hope can be found where we least expect them. And perhaps camaraderie, and a shared purpose, will turn out to be the best medicine after all. As Shakespeare, didn't quite put it: Shuffling off this mortal coil is a drag; but it's no reason to stop living. The Cancer Ladies' Running Club meets The One Hundred Years of Lenni and Margot, The Last Act of Adam Campbell is a warm, poignant and wise tale about love, friendship, and making the most of every minute of life that we're granted.

approach, this collection of articles gives a state-of-the-art picture of current directions in pragmatic humour studies. The contributors assume multifarious theoretical perspectives and discuss a wide array of issues germane to different types of humour across discourse domains. Consequently, the whole gamut of humorous forms and mechanisms are elucidated, such as surrealist irony, incongruity in register humour, mechanisms of pun formation, as well as interpersonal functions of conversational humour. In addition, the papers address diversified manifestations of humour, such as puns in Shakespeare's plays, gendered jokes on the Internet, sexuality in anti-proverbs, Woody Allen's prose, humour in "Friends", and parody by Monty Python's Flying Circus. Most importantly, the chapters offer new research findings and advocate novel theoretical conceptualisations of humorous phenomena, drawing on the wealth of existing scholarship. Therefore, the volume is bound to serve as a well of knowledge and inspiration for both seasoned and beginning researchers with interests in the pragmatics of humour.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Experimental and Quasi-Experimental Designs for Research Donald T. Campbell 2015-09-03 We shall examine the validity of 16 experimental designs against 12 common threats to valid inference. By experiment we refer to that portion of research in which variables are manipulated and their effects upon other variables observed. It is well to distinguish the particular role of this chapter. It is not a chapter on experimental design in the Fisher (1925, 1935) tradition, in which an experimenter having complete mastery can schedule treatments and measurements for optimal statistical efficiency, with complexity of design emerging only from that goal of efficiency. Insofar as the designs discussed in the present chapter become complex, it is because of the intransigency of the environment: because, that is, of the experimenter's lack of complete control.
