The Immoralist - Andre Gide 2014-12-17

First published in 1902 and immediately assailed for its themes of omnisexual abandon and perverse aestheticism, *The Immoralist* is the novel that launched André Gide's reputation as one of France's most audacious literary stylists, a groundbreaking work that opens the door onto a universe of unfettered impulse whose possibilities still seem exhilarating and shocking. Gide's protagonist is the frail, scholarly Michel, who shortly after his wedding nearly dies of tuberculosis. He recovers only through the ministrations of his wife, Marceline, and his sudden, ruthless determination to live a life unencumbered by God or values. What ensues is a wild flight into the realm of the senses that

culminates in a remote outpost in the Sahara--where Michel's hunger for new experiences at any cost bears lethal consequences. *The Immoralist* is a book with the power of an erotic fever dream--lush, prophetic, and eerily seductive.

The Hydrogen Sonata - Iain M. Banks
2012-10-04

The novels of Iain M. Banks have forever changed the face of modern science fiction. His Culture books combine breathtaking imagination with exceptional storytelling, and have secured his reputation as one of the most extraordinary and influential writers in the genre. 'Banks is a phenomenon' William Gibson *The Scavenger* species are circling. It is, truly, the End Days for

the Gzilt civilisation. An ancient people, organised on military principles and yet almost perversely peaceful, the Gzilt helped set up the Culture ten thousand years earlier. Now they've made the collective decision to follow the well-trodden path of millions of other civilisations: they are going to Sublime, elevating themselves to a new and almost infinitely more rich and complex existence. But, amid preparations, the Regimental High Command is destroyed. Vyr Cossont, a former soldier for the Gzilt, appears to have been involved, and she is now wanted - dead, not alive. Aided only by an ancient, reconditioned android and a suspicious Culture avatar, Cossont must complete a final mission; she must find the oldest person in the Culture, a man over nine thousand years old, who might just hold the key to understanding what happened . . . The final days of the Gzilt civilisation may prove its most perilous. Praise for the Culture series: 'Epic in scope, ambitious in its ideas and absorbing in its execution'

Independent on Sunday 'Banks has created one of the most enduring and endearing visions of the future' Guardian 'Jam-packed with extraordinary invention' Scotsman 'Compulsive reading' Sunday Telegraph The Culture series: Consider Phlebas The Player of Games Use of Weapons Excession Inversions Look to Windward Matter Surface Detail The Hydrogen Sonata The State of the Art Other books by Iain M. Banks: Against a Dark Background Feersum Endjinn The Algebraist Also now available: The Culture: The Drawings - an extraordinary collection of original illustrations faithfully reproduced from sketchbooks Banks kept in the 1970s and 80s, depicting the ships, habitats, geography, weapons and language of Banks' Culture series of novels in incredible detail.

Zanoni - Edward Bulwer Lytton Lytton 1842

Gravity's Rainbow - Thomas Pynchon
2012-06-13

Winner of the 1974 National Book Award “A screaming comes across the sky. . .” A few months after the Germans’ secret V-2 rocket bombs begin falling on London, British Intelligence discovers that a map of the city pinpointing the sexual conquests of one Lieutenant Tyrone Slothrop, U.S. Army, corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial

superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in *The New Republic* as “the most profound and accomplished American novel since the end of World War II.”

Paranoia & Power - Gene N Landrum 2007-11-01
Landrum's 13th book is a self-help work on the inhibiting inner fears that either motivate or debilitate. He discusses the notion of fear, and how it stands in the way of individuals realizing their purpose in life.

The Cultural Contradictions Of Capitalism - Daniel Bell 1996-10-18

With a new afterword by the author, this classic analysis of Western liberal capitalist society contends that capitalism—and the culture it creates—harbors the seeds of its own downfall by creating a need among successful people for personal gratification—a need that corrodes the work ethic that led to their success in the first place. With the end of the Cold War and the emergence of a new world order, this

The financier - Theodore Dreiser 1912

Set in 19th century Philadelphia and based on the life of flamboyant financier C.T. Yerkes, Dreiser's portrayal of the unscrupulous magnate Frank Cowperwood embodies the idea that behind every great fortune there is a crime. In Philly the protagonist is eventually imprisoned for embezzlement of public funds. He later leaves prison, departs for Chicago, makes another fortune, and becomes involved in still further shady practices. You don't read Dreiser for literary finesse, but his great intensity and keen journalistic eye give this portrait a powerful reality. The author wrote two subsequent novels based on the life of Yerkes: "The Titan" and "The Stoic." --Amazon.com.

Dictionary of the British English Spelling System - Greg Brooks 2015-03-30

This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for

teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography.

However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

format, the 13 winning behaviors modeled by the
13 greatest athletes of the modern era.

not from genetic superiority, but from winning
behaviors and learned emotional
dispositions. With a delightful blend of gifted

such as Michael Jordan, Lance Armstrong, Martina Navratilova and Tiger Woods are analyzed in psycho-biographical profiles that focus on the underlying motivations and behaviors of these preeminent personalities rather than on what they achieved. In this respect and in its connection to the recent research in brain function and psychology, Dr. Landrum's work is unprecedented in the extant literature on athletes and athletic technique."-- Amazon.com.

Cover Your Assets and Become Your Own Liability - Gene Landrum 2009-11-01

Sacrifice Tomorrow for Today and You'll have Destroyed Tomorrow While America was landing on the moon, Japan was landing in our living room. One nation focused on the conquest of space; the other on the conquest of mass consumer markets. Cover Your Assets delves into how an export power became an importer in three decades through self-serving. CYA management and discusses the need for

leadership transformation to return to the days of glory. The cost of a nation's leadership adopting a take care of me now mentality is huge. When they sacrifice tomorrow for today, they have sold tomorrow. CYA includes a self-assessment on how to change personally and professionally. There is a need to zap the Yes Men in our heads and understand what makes us tick. Those who don't are hard-pressed to understand how to manage, motivate or control others. We all have a need to feel good today but too much of today leads to too little tomorrow.

Exotic England - Yasmin Alibhai-Brown 2015-03-05

England may be a small country on a small island, but its inhabitants have always had a boundless curiosity about the world beyond their shoreline. From the nation's modern origins in the Renaissance, travellers have eagerly roamed the globe and been enticed by the diversity and richness of other civilizations. And while this appetite for adventure has often been tainted by

aggression or exploitation, the English have also carried within them a capacity to soak up new experiences and ideas and to weave them into every aspect of life back home, from language and literature to customs and culture. Here we trace this golden thread of otherness through five centuries of English history to reveal how it has shaped the buildings, flavoured the food, powered the economy, and created a truly diverse society. Today, when England is no longer synonymous with Britain and the English ask themselves who they are, Yasmin Alibhai-Brown paints a sumptuous and illuminating portrait of who they have been and brings a fresh, invigorating perspective on what 'Englishness' really means.

Profiles of Genius - Gene N. Landrum 1993
The story of creative and innovative behavior is about change," says author Gene N. Landrum. "In this case it is about thirteen iconoclastic individuals who have demonstrated a unique ability to deal with change in the world and

redefine it for their own purposes." Landrum calls these individuals the "change masters," entrepreneurial geniuses whose innovations have had a profound influence on modern society: Steven Jobs (Apple Computer), Fred Smith (Federal Express), Tom Monaghan (Domino's Pizza), Nolan Bushnell (Atari), William Gates III (Microsoft), Marcel Bich (Bic), Solomon Price (The Price Club), Howard Head (Head Ski), William Lear (Lear Jet), Soichiro Honda (Honda), Akio Morita (Sony), Arthur Jones (Nautilus), and Ted Turner (CNN). Each of these business giants was motivated by what Landrum describes as an "innovisionary personality," which drove them to follow a unique inner vision of success and gave them an inviolable belief in themselves. Profiles of Genius demonstrates, through thirteen dynamic examples, that future entrepreneurial success in a global marketplace will depend on technological innovation, adaptability to change, intelligent risk-taking, and competitive drive.

Myth in The Pursuit of Power - Gene N.

Landrum 2005

The Positive Mental Moxie of Myth for Personal Growth Joseph Campbell defined a myth as "a life-shaping image, a metaphor that creates a hero out of those who heed it." Author Dr. Gene Landrum takes Campbell's definition one step further by offering a variety of motivational techniques that will propel you to heroic success. Dr. Landrum describes the "superman syndrome" as a series of common behaviors that permit an otherwise average person to rise above the norm. He points out that some of the

world's most renowned visionaries--Catherine the Great, Walt Disney, and Ian Fleming--did not conform to tradition because they modeled their behavior on heroic ideals and mythical mentors. Learn how to transform your life from ordinary to extraordinary by focusing on several key ideas: Chasing money is entropic and the path to the poorhouse Happiness is a side effect of being--never trying Romance only comes to those not trying to find romance Anxiety is a by-product of unrealistic expectations Breakdown leads to breakthrough Being stupid is the pathway to being smart Do you have the Superman Syndrome?
