Sex + Faith - Kate Ott 2013

Talking with your child about sex can be scary! Sex + Faith helps parents incorporate their faith values with sexual information so they can answer questions, discuss sexuality at each stage of childhood, and show support of sexual differences. Section one explains how faith relates to sexuality and the essential role parents play in forming healthy, faithful, sexually educated children. The second section designates a chapter for four age groupings of children from infancy through high school. Each chapter explains the biological and developmental issues of the age, answers questions children tend to have, provides relevant Biblical and faith stories helpful to discuss with children of that age, and lists five to ten key educational issues for parents to keep in mind. Shaded text boxes are interspersed throughout the book with real life, practical questions that parents and children ask. Expertly written by Kate Ott, Sex + Faith is an easy to use reference guide for parents of kids of all ages.

Rabid - Pamela Redmond Satran 2012-01-01

Dogs now dominate the \$55 billion a year pet business, with nearly 40 percent of American households owning a total of 78.2 million dogs. Dog products, dog services, dog admiration--okay, let's call it dog worship--has become totally over the top, with doggie treadmills, dog swimming pools, caffeine-free doggie java, dog massage, dog perfume, aromatherapy, hair coloring, and, yes, dog tattoos that would have seemed outlandish a generation ago when applied to your everyday household Rover. But Rover isn't called Rover anymore: he's called Rufus. Or Lola, according to the Tumblog Hipster Puppies. In fact, all Top Ten Dog Names are people names. And the canine Rufus doesn't stay home alone all day; he goes to Doggie Daycare. Eats brightly frosted martini-shaped doggie treats. Wears designer tutus. Gets married on the beach. Has...Well, you'll see. With hilarious full-color photos throughout, *Rabid* holds a humorous mirror up to our dog-centered society, helping us laugh at our own behavior and at the even-more-insane antics of all those other dog people.

Women and the Media - Maggie Andrews 2014-04-24

The media have played a significant role in the contested and changing social position of women in Britain since the 1900s. They have facilitated feminism by both providing discourses and images from which women can construct their identities, and offering spaces where hegemonic ideas of femininity can be reworked. This volume is intended to provide an overview of work on Broadcasting, Film and Print Media from 1900, while appealing to scholars of History and Media, Film and Cultural Studies. This edited collection features tightly focused and historically contextualised case studies which showcase current research on women and media in Britain since the 1900s. The case studies explore media directed at a particularly female audience such as *Woman's Hour*, and magazines such as *Vogue*, *Woman* and *Marie Claire*. Women who work in the media, issues of production, and regulation are discussed alongside the representation of women across a broad range of media from early 20th-century motorcycling magazines, *Page 3* and regional television news.

Diagnostic Controversy - Carolyn Smith-Morris 2015-08-20

This collection is dedicated to the diagnostic moment and its unrivaled influence on encompassment and exclusion in health care. Diagnosis is seen as both an expression and a vehicle of biomedical hegemony, yet it is also a necessary and speculative tool for the identification of and

response to suffering in any healing system. Social scientific studies of medicalization and the production of medical knowledge have revealed tremendous controversy within, and factitiousness at the outer parameters of, diagnosable conditions. Yet the ethnographically rich and theoretically complex history of such studies has not yet congealed into a coherent structural critique of the process and broader implications of diagnosis. This volume meets that challenge, directing attention to three distinctive realms of diagnostic conflict: in the role of diagnosis to grant access to care, in processes of medicalization and resistance, and in the transforming and transformative position of diagnosis for 21st-century global health. Smith-Morris's framework repositions diagnosis as central to critical global health inquiry. The collected authors question specific diagnoses (e.g., Lyme disease, Parkinson's, andropause, psychosis) as well as the structural and epistemological factors behind a disease's naming and experience.
